

Content

**Introduction** ..... 3

**1. Basic terms of operational research** ..... 4

    1.1 System approach ..... 4

    1.2 System ..... 4

    1.3 Analyses and synthesis ..... 5

    1.4 Operational research ..... 6

**2. Mathematical model** ..... 7

**3. Linear programming** ..... 9

    3.1 Introduction to linear programming ..... 9

    3.2 Formulation of the mathematical model ..... 12

    3.3 Graphical solution of problems of linear programming ..... 16

    3.4 The simplex method ..... 20

        3.4.1 Transformation of math model into canonical model ..... 22

        3.4.2 Importance of slack variables in the terms of economy ..... 22

        3.4.3 Starting the basic solution, simplex table ..... 23

        3.4.4 Optimality test ..... 23

        3.4.5 Transfer to new basic solution ..... 24

        3.4.6 Slack variables; extended model ..... 29

    3.5 Application of the simplex model on particular cases ..... 33

    3.6 Post optimal analysis ..... 36

    3.7 The use of solver program ..... 37

        3.7.1 Case I ..... 37

        3.7.2 Case II ..... 40

**4. Transportation problem** ..... 43

    4.1 Introduction into transportation problems ..... 43

    4.2 Approximation methods ..... 44

        4.2.1 Ascending index method ..... 45

        4.2.2 Vogel's approximation method (VAM) ..... 45

    4.3 Example of solution of real transportation problem ..... 48

    4.4 Circular transportation problem ..... 51

**5. Method of network analysis** ..... 53

    5.1 Basic description of the area of network analysis ..... 53

    5.2 Evaluation of network graphs ..... 54

    5.3 Classification of network graphs ..... 55

    5.4 Representation of network graph ..... 66

    5.5 Time analyses of link defined NG by the critical path method ..... 68

        5.5.1 Basic principles of CPM method ..... 58

        5.5.2 Time analyses of link defined NG by CPM method ..... 61

        5.5.3 Time analysis of link defined NG of CPM type in table ..... 68

    5.6 Basic principles of method PERT ..... 75

    5.7 Time analysis of node defined network graph ..... 77

    5.8 Time analyses of generalized network flow graph ..... 80

**Literature** ..... 84
