FOREWORD	V
How to use this book.....	VI
JAA exam questions & time limits.....	VII
081 PRINCIPLES OF FLIGHT - AEROPLANE	1
01 SUBSONIC AERODYNAMICS	
01-01 Basics, Laws and Definitions.....	3
01-02 Two-dimensional Airflow Around an Aerofoil.....	14
01-03 Coefficients.....	18
01-04 Three-dimensional Airflow About an Aeroplane.....	24
01-05 Total Drag.....	34
01-06 Ground Effects.....	37
01-07 Relationship between the C_L and Speed in Level Flight.....	41
01-08 The Stall.....	43
01-09 C_{LMAX} Augmentation.....	53
01-10 Means to Reduce the $C_L - C_D$ Ratio.....	60
01-11 The Boundary Layer.....	61
01-12 Aerodynamic Degradation.....	63
02 HIGH SPEED AERODYNAMICS	
02-01 Speeds.....	65
02-02 Shock Waves.....	68
02-03 Effects of Exceeding M_{CRIT}	74
02-04 Buffet Onset.....	79
02-05 Means to Influence M_{CRIT}	82
03 INTENTIONALLY LEFT BLANK	
04 STABILITY	
04-01 Static and Dynamic Stability.....	87
04-02 Intentionally Left Blank.....	
04-03 Static and Dynamic Longitudinal Stability.....	89
04-04 Static Directional Stability.....	99
04-05 Static Lateral Stability.....	101
04-06 Dynamic Lateral/Directional Stability.....	105
05 CONTROL	
05-01 General.....	109
05-02 Pitch (Longitudinal) Control.....	111
05-03 Yaw (Directional) Control.....	113
05-04 Roll (Lateral) Control.....	114
05-05 Roll/Yaw Interaction.....	119
05-06 Means to Reduce Control Forces.....	119
05-07 Mass Balance.....	123
05-08 Trimming.....	124
06 LIMITATIONS	
06-01 Operating Limitations.....	133
06-02 Manoeuvring Envelope.....	137
06-03 Gust Envelope.....	139
07 PROPELLERS	
07-01 Conversion of Engine Torque to Thrust.....	145

07-02 Engine Failure.....	153
07-03 Design Features for Power Absorption.....	154
07-04 Secondary Effects of Propellers.....	157
08 FLIGHT MECHANICS	
08-01 Forces Acting on an Aeroplane.....	163
08-02 Asymmetric Thrust.....	177
08-03 Particular Points on a Polar Curve.....	182
082 PRINCIPLES OF FLIGHT - HELICOPTER	185
01 SUBSONIC AERODYNAMICS	
01-01 Basic Concepts, Laws and Definitions.....	187
01-02 Two-dimensional Airflow.....	188
01-03 The Three-Dimensional Airflow Round a Blade (Wing) and a Fuselage.....	190
02 TRANSONIC AERODYNAMICS AND COMPRESSIBILITY EFFECTS	193
03 ROTORCRAFT TYPES	
03-01 Rotorcraft.....	195
03-02 Helicopters.....	195
04 MAIN ROTOR AERODYNAMICS	
04-01 Hover Flight Outside Ground Effect (OGE).....	197
04-02 Vertical Climb.....	200
04-03 Forward Flight.....	201
04-04 Hover and Forward Flight in Ground Effect (IGE).....	208
04-05 Vertical Descent.....	210
04-06 Autorotation.....	211
05 MAIN ROTOR MECHANICS	
05-01 Flapping of the Blade in Hover.....	215
05-02 Flapping Angles of the Blade in Forward Flight.....	217
05-03 Blade Lag Motion in Forward Flight.....	220
05-04 Forces and Moments on the Hub of Different Rotor Systems.....	222
05-05 Blade Sailing.....	222
05-06 Vibrations Due to Main Rotor.....	223
06 TAIL ROTORS	
06-01 Conventional Tail Rotor.....	225
06-02 The Fenestron.....	227
06-03 The NOTAR.....	227
06-04 Vibrations.....	227
07 EQUILIBRIUM, STABILITY AND CONTROL	
07-01 Equilibrium and Helicopter Attitudes.....	229
07-02 Stability.....	230
07-03 Control.....	231
08 HELICOPTER FLIGHT MECHANICS	
08-01 Performances / Flight Limits.....	235
08-02 Special Conditions.....	237
PICTURE SUPPLEMENTS QUESTIONS	239
PICTURE SUPPLEMENTS EXPLANATIONS	245
