PREFACE.....	5
DIRECTIONS FOR LABORATORY WORK .....	6
SAFETY GUIDELINES FOR HANDLING DANGEROUS SUBSTANCES.....	7
<b>1 BLOOD. ANALYZERS. LABORATORY INVESTIGATION. INTERPRETATION.....</b>	<b>9</b>
1.1 Blood collection .....	9
1.2 Blood processing .....	11
1.3 Manual methods & pipetting .....	13
1.4 Portable and desktop biochemical analyzers .....	16
1.5 Factors influencing results of laboratory examinations .....	18
1.6 Interpretation of results.....	24
1.7 Test requisition forms .....	29
<b>2 INVESTIGATION OF LIPID METABOLISM &amp; CHOLESTEROL.....</b>	<b>30</b>
2.1 Determination of total cholesterol in serum and blood.....	31
2.2 Determination of blood triacylglycerols using analyzer Reflotron® .....	34
2.3 Determination of HDL-cholesterol and LDL-cholesterol .....	35
2.4 Calculation of LDL-cholesterol and derived parameters .....	36
2.5 Electrophoresis of serum lipoproteins .....	37
<b>3 INVESTIGATION OF GLUCOSE METABOLISM. DIABETES MELLITUS .....</b>	<b>39</b>
3.1 Enzymatic determination of serum glucose.....	40
3.2 Determination of glycaemia by personal glucometer .....	42
3.3 Oral glucose tolerance test (oGTT) .....	43
3.4 Test for glucose in urine .....	44
3.5 Test for ketone bodies in urine.....	45
3.6 Determination of glycated haemoglobin HbA <sub>1c</sub> .....	46
3.7 Late complications of diabetes – microalbuminuria.....	47
<b>4 INVESTIGATIONS IN LIVER DISEASE I – ENZYMES.....</b>	<b>49</b>
4.1 Determination of ALT catalytic concentration in serum .....	50
4.2 Determination of AST catalytic concentration in serum .....	51
4.3 Determination of ALP catalytic concentration in serum .....	53
<b>5 INVESTIGATIONS IN LIVER DISEASES II – BILE PIGMENTS AND ALBUMIN .....</b>	<b>56</b>
5.1 Determination of total bilirubin in serum.....	57
5.2 Test for bilirubin in urine .....	59
5.3 Test for urobilinogens in urine.....	59
5.4 Determination of albumin in serum.....	61
<b>6 LABORATORY DIAGNOSTICS OF MYOCARDIAL INFARCTION .....</b>	<b>63</b>
6.1 Determination of creatine kinase catalytic concentration .....	64
6.2 Determination of serum CK-MB catalytic concentration .....	65
6.3 Determination of troponin T in blood .....	66
6.4 Determination of blood myoglobin.....	69
6.5 Determination of catalytic concentration AST in serum.....	70
<b>7 INVESTIGATION OF PLASMA PROTEINS.....</b>	<b>71</b>
7.1 Determination of total protein in serum by biuret test.....	71
7.2 Determination of albumin in serum .....	72
7.3 Electrophoresis of serum proteins .....	73
7.4 Assay of increased level of C-reactive protein .....	74
7.5 Determination of serum IgE by ELISA.....	76

8	BIOCHEMICAL TESTS OF RENAL FUNCTION I .....	79
8.1	Investigation of urine by inspection and physical methods.....	80
8.2	Determination of creatinine in serum and urine .....	84
8.3	Measurement of glomerular filtration rate with creatinine.....	85
8.4	Fractional reabsorption and excretion of water .....	87
9	BIOCHEMICAL TESTS OF RENAL FUNCTION II .....	90
9.1	Detection of proteinuria.....	90
9.2	Test for haem compounds in urine .....	92
9.3	Determination of proteins in urine .....	93
9.4	Detection of microalbuminuria .....	95
9.5	Determination of urea in serum and urine.....	97
9.6	Approximate assessment of nitrogen balance .....	99
10	ROUTINE URINALYSIS. TEST STRIPS .....	101
10.1	Multipurpose diagnostic strips in urinalysis.....	101
10.2	Detection of drugs in urine .....	104
10.3	Detection of barbiturates in urine .....	105
10.4	Detection of luteinising hormone in urine.....	106
11	EXAMINATIONS IN UROLITHIASIS.....	108
11.1	Solubility of uric acid .....	109
11.2	Detection of uric acid by murexide test.....	110
11.3	Simplified chemical analysis of renal calculi.....	110
11.4	Determination of uric acid in serum and in urine.....	113
12	EXAMINATIONS OF GASTROINTESTINAL TRACT .....	117
12.1	Selected examinations of stomach functions .....	117
12.2	Laboratory tests in pancreas diseases.....	120
12.3	Breath tests in gastroenterology.....	121
12.4	Test of occult bleeding in gastrointestinal test.....	123
INDEX.....		125
