Předmluva autorky	5
Introduction	6
Chapter 1: State of the Art	10
1.0 Functional Approach	10
1.1 Pragmatics	11
1.2 Stylistics	13
1.3 Discourse Analysis	19
1.4 Cohesion	24
Chapter 2: The Material under Investigation	38
2.0 The Origin and Purpose of the Investigated Texts	38
2.1 Paralinguistic features: The Format	39
2.2 Linguistic features: The Density of Scientific and Technical Information	40
2.3.1 The Style of Journalese	41
2.3.2 The Popular Scientific Style	42
2.3.3 The Style of Science and Technology	42
2.4 Research Objectives	44
2.5 List of Investigated Texts	46
2.5.1 Set I – Popular Science Texts	46
2.5.2 Set II – Advanced Science Texts	46
2.5.3 Set III – Enriched Science Texts	47
Chapter 3: Classification of Investigated Texts	49
3.0 Criteria of Classification	49
3.1 Differences Manifested	49
3.2 Set I, its features and comparison with Sets II and III	50
3.3 Set II, its features and comparison with Sets I and III	53
3.4 Set III, its features and comparison with Sets I and II	54
3.4.1 Classification of Terms	55
3.4.2 The Occurrence of individual lexical cohesive items	57
Chapter 4: Conclusions	59
4.0 Research Results	59
4.1 The Format	59
4.2 The Density of Technical Vocabulary	61
4.3 The Style of Science and Technology	64
4.4 Lexical Cohesive Relations	65
4.5 Target Groups of Recipients	66
4.6 Postulates	68
Chapter 5: Analysis of Investigated Texts	70
5.1 Set I – Popular Science Texts	70
Text I/1 Robotic Buddies	70
Text I/2 Fast Feedback	71
Text I/3 The whole world in your hand	72
Text I/4 It's a game of numbers	74

	Text I/5 The scent of music	75
	Text I/6 Spectacular display	77
	Text I/7 Once more with feeling	78
	Text I/8 Electric Cars	80
5.2	Set II – Advanced Science Texts	82
	Text II/1 Lost in the machine translation	82
	Text II/2 Programs and programming languages	84
	Text II/3 Data Communications	86
	Text II/4 How computer viruses work	87
	Text II/5 Electric Protection devices	89
	Text II/6 Control Devices	91
	Text II/7 Satellite Communications	93
	Text II/8 Database management systems	94
5.3	Set III – Enriched Science Texts	95
	Text III/1 GPS systems	95
	Text III/2 The Stanford Hydra CMP	98
	Text III/3 Artificial neural networks	100
	Text III/4 TM UNICAM	102
	Text III/5 Output Stages	104
	Text III/6 The Pumping Station: The Heart	105
	Text III/7 Comparison of Techniques for Estimating Baroflex Gain	106
	Text III/8 Evaluation of Syncope	107

Glossary of Terms **109**

Bibliography **112**

Literature excerpted **115**

Appendix I – Corpus of Investigated Texts **117**
