Preface	3
Abstract	7
Abstrakt	8
<b>1 INTRODUCTION</b>	<b>13</b>
<b>2 STRONG WINDS AND THEIR CHARACTERISTICS</b>	<b>15</b>
2.1 Wind and its measurements	15
2.2 Convective storms – fundamental terminology	20
<b>3 HITHERTO KNOWLEDGE ABOUT THE OCCURRENCE OF STRONG WINDS IN THE CZECH REPUBLIC AND THE EUROPEAN CONTEXT</b>	<b>24</b>
<b>4 STRONG WINDS IN THE CZECH REPUBLIC IN THE PERIOD OF SYSTEMATIC (INSTRUMENTAL) OBSERVATIONS</b>	<b>30</b>
4.1 Strong winds in the early instrumental observations	30
4.2 Strong winds in systematic observations of meteorological stations (before 1920)	31
4.3 Strong winds in the period of instrumental measurements (after 1920)	35
4.3.1 Fluctuation of the mean wind speed	35
4.3.2 Wind gusts in the period 1961-1990	38
4.3.2.1 Fluctuations of the number of days with wind gusts	43
4.3.2.2 Maximum wind gusts and the probabilities of their occurrence	44
4.3.3 Relation between mean wind speed and wind gusts	47
<b>5 SYNOPTIC-CLIMATOLOGICAL ANALYSIS OF STRONG WINDS IN THE TERRITORY OF THE CZECH REPUBLIC</b>	<b>50</b>
5.1 Convective storms and windstorms	50
5.2 Synoptic situations favourable for the origin of squalls	50
5.3 Synoptic situations favourable for the occurrence of windstorms	52
5.3.1 Typical synoptic situations with the occurrence of strong winds from the directions 190°-360°	52
5.3.2 Typical synoptic situations with the occurrence of strong winds from the directions 090°-180°	53
5.4 Intensification of the wind speed in the region of atmospheric fronts	53
5.5 Synoptic analysis of selected strong winds in the territory of the Czech Republic in the period 1989-2002	57
5.5.1 Description of selected strong winds	58
5.6 Summary evaluation of selected strong winds	91
5.6.1 Typical synoptic situations favourable for the occurrence of squalls and windstorms	91
5.6.2 The effect of atmospheric fronts for the rise of squalls and windstorms	94
5.6.3 Measured and geostrophic winds	95

<b>6</b>	<b>DATABASE OF STRONG WINDS IN THE CZECH REPUBLIC</b>	<b>97</b>
6.1	Characteristic of data about strong winds in documentary sources	97
6.2	Methodology of the database compilation and evaluation of strong winds	104
<b>7</b>	<b>THE DESCRIPTION OF STRONG WINDS IN THE CZECH LANDS IN THE LAST MILLENNIUM</b>	<b>108</b>
7.1	The earliest recorded gale in the Czech Lands	108
7.2	Strong winds up to 1500	110
7.3	Strong winds in the 16th century	115
7.4	Strong winds in the 17th century	127
7.5	Strong winds in the 18th century	140
7.6	Strong winds in the 19th century	157
7.7	Strong winds in the 20th century	189
<b>8</b>	<b>CLIMATOLOGICAL ANALYSIS OF STRONG WINDS IN THE CZECH REPUBLIC</b>	<b>204</b>
8.1	Characteristic of data about strong winds in individual centuries	204
8.2	Chronology of strong winds in the period 1500–1999	209
8.2.1	Fluctuation of frequencies of the occurrence of strong winds	209
8.2.2	Annual variation of frequency of strong winds	217
8.2.3	Impacts of strong winds	218
8.3	The tornado climatology in the Czech Republic	223
8.4	Selected aspects of the climatology of strong winds in the Czech Republic	229
8.4.1	Strong winds in the Czech Republic in the reference period 1961–1990	229
8.4.2	Dynamic climatology of strong winds in the Czech Republic	232
8.4.3	Sea level pressure fields on days with strong wind	233
8.4.4	Strong winds and characteristics of circulation in Central Europe	235
8.4.5	The relation of the occurrence of strong winds to the temperature character of winters	239
8.5	Chronology of strong winds in the Czech Republic – an European context	241
<b>9</b>	<b>CONCLUSIONS</b>	<b>244</b>
<b>10</b>	<b>REFERENCES</b>	<b>246</b>
<b>11</b>	<b>WRITTEN HISTORICAL SOURCES AND ABBREVIATIONS OF THEIR EDITIONS</b>	<b>286</b>
	<b>APPENDIX I</b>	<b>303</b>
	<b>APPENDIX II</b>	<b>373</b>
