

**Contents**

page

**Preface**

**Introduction**

1. 1	Partial Safety Factors	6
1. 2	Material Characteristics	7

**Members in Tension and Compression**

2. 1	Tension Member	8
2. 2	Compressed Member of IPE Section	9
2. 3	Compressed Member of Chanel Section	10
2. 4	Compressed Member of Unequal-Leg Angle Section	11
2. 5	Welded Compression Member	13
2. 6	Member Composed of Two Equal-Leg Angles	14
2. 7	Built-up Battened Member	18
2. 8	Built-up Latticed Member	22
2. 9	Compressed Member of Hollow Section	26
2. 10	Welded Lattice Girder	29

**Beams**

3. 1	Laterally Restrained Beam	33
3. 2	Laterally Unrestrained Beam	35
3. 3	Continuous Beam	38
3. 4	Beam with Cantilever	43
3. 5	Portal Frame	48
3. 6	Torsion of Open Section	55
3. 7	Torsion of Hollow Section	61
3. 8*	Cantilever Beam	64
3. 9*	Beam with Slender Web	67
3. 10*	Crane Girder	71
3. 11*	Beam Column - Cantilever	76
3. 12*	Bi-axial Bending	80
3. 13*	Singly Symmetrical Beam	83

**Steel Concrete Composite Members**

4. 1	Composite Secondary Floor Beam	86
4. 2	Composite Primary Beam	90
4. 3*	Composite Column	95

## 1.2 Material Characteristics

**Joints**

5. 1	Welds of Tension Member	96
5. 2	Welds of Fin Plate Connection	97
5. 3	Welded Truss Connection	99
5. 4	Bolted Connection of Tension Member	101
5. 5	Bolted Truss Connection	103
5. 6	Bolted Slip Resistant Connection	105
5. 7	Header Plate Connection	106
5. 8	Bolted Web Cleated Connection	108
5. 9	Bolted Beam Splices	110
5. 10	Bolted Extended Plate Joint	114
5. 11	Simple Column Base	118
5. 12*	Bolted Long Connection	120
5. 13*	Bolted Connection with Packing	121
5. 14*	Single Lap Connection with One Bolt	123
5. 15*	Fin Plate Connection	124
5. 16*	Welded Connection of T Cantilever	126
5. 17*	Beam-to-Column Welded Connection	128
5. 18*	Pin Connection	129
5. 19*	Fixed Column Base	131

**Fatigue**

6. 1*	Fatigue of Crane Girder	134
-------	-------------------------	-----

**Cold-Formed Members**

7. 1*	Cold-Formed Tension Member	139
7. 2*	Cold-Formed Compression Member of Hollow Section	140
7. 3*	Cold-Formed Compression Member of Open Section	141
7. 4*	Cold-Formed Beam of U Section	153

**Bibliography**

157

**Note:**

The worked examples for the advanced courses are marked by a star \*.
