

CONTENTS

ABSTRACT	3
LIST OF PAPERS	6
ABBREVIATIONS	7
INTRODUCTION	8
ACIDAEMIA	10
Definitions and physiology	10
Fetal acid-base status and changes during labour	13
PERINATAL ASPHYXIA	16
PATHOPHYSIOLOGY	20
RISK FACTORS FOR ASPHYXIA AND ACIDAEMIA	23
FEVER AND ACID-BASE BALANCE	24
Fetal temperature and asphyxia	24
Maternal temperature in labour	25
Chorioamnionitis	26
FETAL SURVEILLANCE	27
AIMS OF THE STUDIES	32
MATERIAL AND METHODS	33
Patients and design of the studies	33
Blood-gas and acid-base analyses	35
Temperature recordings	36
Fetal heart rate monitoring	37
Follow-up	38
Data sampling	39
Statistics	39
RESULTS AND DISCUSSION	41
Acid-base status at birth, population data	41
Risk factors for acidaemia	45
Maternal fever in term labour	54
Risk factors for fever	54
Neonatal outcome in relation to maternal fever	57
Fetal heart rate changes in relation to acidaemia at birth	58
Outcome after acidaemia at term birth	65
Neonatal outcome	65
Long-term outcome	67
Outcome in relation to type and severity of acidaemia	70
Outcome in relation to duration of FHR changes	72
CONCLUSIONS	73
SUMMARY IN SWEDISH (Populärvetenskaplig sammanfattning på svenska)	74
ERRATA	78
ACKNOWLEDGEMENTS	79
REFERENCES	80
STUDIES I-VI	95
