Acknowledgments		ix
The <i>Essential Public Health Series</i>		xi
Preface		xiii
About the Author		xv
Prologue		xvii
Part I	Background of the Field	1
Chapter 1	Why Learn Methods in Infectious Disease Epidemiology?	3
	Learning Objectives	3
	Why is Infectious Disease Epidemiology Different From Other Applications of Epidemiology?	5
	How To Use This Book	6
	Discussion Questions	8
	References	9
Chapter 2	Why Study Methods?	11
	Learning Objectives	11
	Why Methods Matter	11
	Measuring Outcomes	12
	Discussion Questions	18
	References	19

Chapter 3	Descriptive Infectious Disease Epidemiology	21
	Learning Objectives	21
	Background	21
	Describing Data	28
	Person, Place, and Time	28
	Specific Methods	36
	Discussion Questions	41
	References	42
Chapter 4	Outbreak Investigations	43
	Learning Objectives	43
	Outbreak Investigations—Descriptive Epidemiology With a Specific Purpose	43
	Steps in an Outbreak Investigation	44
	Data Collection	55
	Epidemic Curves	56
	Discussion Questions	60
	References	61
Chapter 5	Rates and Measures	63
	Learning Objectives	63
	Counting and Comparing Cases—A Cornerstone of Infectious Disease Epidemiology	63
	Standardization	65
	Uses for Absolute Counts, Proportions, Rates, and Ratios	67
	Incidence Measures	68
	Prevalence Measures	70
	Discussion Questions	75
	References	76
Chapter 6	Laying the Foundation: How to Conduct a Study	77
	Learning Objectives	77
	Research Questions and Hypotheses—Structuring Your Study	77
	Research Question Development	78
	Selection of Variables	80
	A Tool to Help Keep Your Study Design in Order: The Research Question Matrix	81
	Discussion Questions	83
	References	84
Chapter 7	Experimental Designs as a Foundation for Observational Studies	85
	Learning Objectives	85
	Experimental Designs in Broad Strokes	85

Steps in a Randomized Controlled Trial	87
The Drug Approval Process in the United States	92
Application of Randomized Designs	95
How to Conduct a Randomized Controlled Trial	96
Moving From Randomized to Observational Studies	100
Discussion Questions	101
References	102
Chapter 8 Cohort Studies	103
Learning Objectives	103
From the Experimental Study to the Cohort Study	103
Types of Cohort Studies	103
Cohort Studies in Infectious Disease Research	106
How to Conduct a Cohort Study	108
Strengths and Limitations	111
Discussion Questions	112
References	113
Chapter 9 Case-Control and Cross-Sectional Studies	115
Learning Objectives	115
From the Cohort Study to the Case-Control Study and Cross-Sectional Study	115
Cross-Sectional Studies	121
Discussion Questions	124
References	125
Chapter 10 Interpretation of Epidemiologic Data	127
Learning Objectives	127
Meet the 2×2 Table	127
The Relative Risk	129
The Odds Ratio	133
The Prevalence Ratio	134
The Prevalence Odds Ratio	135
Interpreting the Measures	135
A Brief Exploration of the Role of Chance	136
Discussion Questions	141
Chapter 11 Threats to Internal and External Validity in the Study of Infectious Disease Epidemiology	143
Learning Objectives	143
From Ideal Study Structure to Practical Realities:	
Real Issues in Study Implementation	143
Bias	143

	Means of Reducing or Eliminating Information Bias	154
	Missing Information	154
	Misclassification	155
	Discussion Questions	161
	References	162
Part II	Special Applications	163
Chapter 12	Surveillance of Infectious Diseases	165
	Learning Objectives	165
	Methods in Practice	165
	Introduction to Infectious Disease Surveillance	166
	Disease Reporting	169
	What Makes a Good Surveillance System?	172
	Benefits of Surveillance Activities	173
	Bias in Surveillance	173
	Changing Case Definitions	180
	Discussion Questions	186
	References	187
Chapter 13	Program Evaluation in the Infectious Disease Setting	189
	Learning Objectives	189
	Differences Between Research and Evaluation	191
	Types of Evaluation	194
	Developing Evaluation Studies	195
	Evaluation Frameworks	195
	Thinking Through Evaluation in the Infectious Disease Setting	199
	Discussion Questions	202
	Resources List	203
Appendix 1	Methodological Resource List	205
Appendix 2	Essential Moments in Infectious Disease History	209
Appendix 3	A Brief Word on Sensitivity and Specificity	213
Index		215
