

## Table of Contents

Delale, Can F.:	<b>Shock Formation in Flows with Nucleation and Condensation .</b>	7
Hrubý, J.:	<b>Adiabatic Processes and Homogeneous Nucleation in Metastable Vapors of Alcohols .....</b>	25
Jiříček, I.:	<b>Simulation of the Liquid Drop .....</b>	48
Konstantinov, M.:	<b>Passive Particles Motion in Vorticity Field .....</b>	53
Lain, J.:	<b>Hydrodynamic Stability Theory and Large Coherent Structures in a Wall Jet .....</b>	55
Lankaš, F., Maršík F., Blaha J.:	<b>Condensation Rate Estimate by Condensation Shock .....</b>	65
Samohýl, I.:	<b>Phenomenological Theory of Chemical Mixtures .....</b>	71
Sopuch, P.:	<b>Binary Nucleation in the Case that one Component Highly Prevails .....</b>	96
Šilhavý, M.:	<b>A Phenomenological Theory of Phase Transitions in Solids ....</b>	109
Šťastný, M., Šejna, M.:	<b>Behaviour of Chemicals in the Steam Flow through Phase Transition Zone of Steam turbines and its Mathematical Modeling .....</b>	129
Ždímal, V.:	<b>Homogeneous Nucleation in Supersaturated 1-Pentanol Vapor .....</b>	135
