KEYNOTE LECTURES

The International Association for Wind Engineering (IAWE): birth, development and perspectives <i>G. Solari</i>	2	#K01
Wind Engineering past, present and future <i>C.J. Baker</i>	4	#K02
Flutter instability of structures <i>M. Matsumoto</i>	6	#K04
Wind engineering in Africa <i>J.A. Wisse</i>	12	#K06
Bluff body aerodynamics and aeroelasticity: a wind effects perspective <i>A. Kareem</i>	16	#K05
Wind response of large roofs of stadiums and arena <i>C. Borri, P. Biagini</i>	18	#K03

CONTRIBUTED PAPERS

Galloping stability of triangular cross-sectional bodies: a systematic approach <i>G. Alonso, J. Meseguer, I. Pérez-Grande</i>	22	#196
Wind tunnel tests on partially clad buildings and structures <i>S. Amoroso, K. Hebert, M.L. Levitan</i>	24	#230
Systemic methodological approach for the analysis of exploitation and development environment of a wind power station <i>M. Annabi, Y. Abdellaoui</i>	26	#205
Solutions of the debris equations <i>C.J. Baker</i>	28	#124
A simplified method to evaluate the critical flutter speed for flexible bridge decks <i>G. Bartoli, C. Mannini</i>	30	#209
Guyed masts subjected to wind and other environmental actions <i>J. Bęć, A. Flaga</i>	32	#139
Comparison among different techniques for reliability assessment of no-tensile structures under turbulent wind <i>M. Betti, P. Biagini, L. Facchini</i>	34	#206
Monitoring of the environmental action of wind on a cable stayed bridge <i>J. Biliszczuk, M. Hildebrand, C. Machelski, W. Barcik, K. Sadowski</i>	36	#200
Wind action on hip roofs <i>J. Blessmann</i>	38	#122
Validation of wind-driven rain simulations on a low-rise building <i>B. Blocken, J. Carmeliet</i>	40	#110
A numerical study of the wind speed conditions in passages between buildings and the venturi-effect <i>B. Blocken, J. Carmeliet, T. Stathopoulos</i>	42	#112

Wind tunnel tests and aerodynamical analysis of a new designed footbridge in Katowice <i>A. Flaga, G. Bosak, M. Pańtak, M. Bigosiński, P. Ziętara</i>	110	#137
Investigation of vortex-induced vibration of Lupu Bridge — The longest arch bridge in the world <i>Y.J. Ge, F.C. Cao, Z.Y. Zhou, H.F. Xiang</i>	122	#211
Aerodynamic investigation on flutter instability of the first sea-crossing bridge in China — The East Sea Bridge <i>Y.X. Yang, Y.J. Ge, L. Zhao</i>	342	#328
Full bridge aeroelastic model test of Third Nanjing Bridge over Yangtze River <i>L.D. Zhu, D.L. Wang, Z.S. Guo, M. Wang, F.C. Cao</i>	356	#143

Bridges: deterministic/random excitation and response, vibration damping **BRI-DYN**

A numerical and experimental investigation on aerodynamic non linearities in bridge response to turbulent wind <i>G. Diana, S. Bruni, D. Rocchi</i>	86	#247
Improvement of aeroelastic instability of pylon of cable-stayed bridge by means of separation interference method <i>Y. Kubo, K. Tasaki, H. Higashi, K. Kimura, K. Kato</i>	192	#117
Experimental study — Elimination of excessive vibration amplitudes by liquid damper <i>M. Pirner, S. Urushadze</i>	266	#116
Three-dimensional simulations of suspension bridges under wind load: Influence of mean steady configuration and effects of load nonlinearities <i>L. Salvatori, P. Spinelli</i>	290	#288
A study into the performance of wind shields on both streamlined and bluff bridge deck sections <i>I.J. Taylor, M. Vezza, I. Salisbury</i>	316	#157
Aeroelasticity of slender shell bridges <i>A. Tesár</i>	318	#109

Bridges: aerodynamic parameters, flutter derivatives, indicial functions, vortex shedding **BRI-LOA**

Determination of flutter derivatives by taut strip model — I: Theory <i>A.R. Chen, R.J. Ma</i>	64	#173
An experimental and numerical approach to consider vortex induced vibrations in brige aerodynamics <i>G. Diana, F. Resta, M. Belloli, D. Rocchi</i>	84	#222
Wind tunnel control software for identification of flutter derivatives on bridge sectional tests <i>J.A. Jurado, A. León, S. Hernández</i>	160	#108
Determination of flutter derivatives by taut strip model — II: Application <i>R.J. Ma, A.R. Chen</i>	218	#174

Bridges: aeroelastic stability, flutter, galloping **BRI-ST A**

Galloping stability of triangular cross-sectional bodies: a systematic approach <i>G. Alonso, J. Mesequer, I. Pérez-Grande</i>	22	#196
A simplified method to evaluate the critical flutter speed for flexible bridge decks <i>G. Bartoli, C. Mannini</i>	30	#209
Assessment on the instability of a suspension bridge with a hexagonal cross-section under wind action <i>Yi-Chao Li, Fuh-Min Fang, Tsung-Chi Liang</i>	206	#146
Modelling of nonlinear aeroelastic effects on a structure <i>J. Náprstek, S. Pospíšil, S. Hračov</i>	244	#235
A numerical investigation of the bifurcation characteristics of a 2D nonlinear airfoil in turbulent flow <i>D. Poirel</i>	270	#280

Identification of 18 flutter derivatives using CFD turbulence modelling <i>D. Sun, N.G. Wright, J.S. Owen, K. Liaw</i>	310	#241
Study on flutter characteristics of 4-span suspension bridge <i>H. Yamada, H. Katsuchi</i>	340	#195
Wind climate and structure: cyclones, large area disasters	CLS-CYC	
In-field measurement and stochastic modeling of tropical cyclone winds <i>F.J. Masters, T.A. Reinhold, K.R. Gurley, L.D. Aponte-Bermúdez</i>	224	#129
Development of typhoon simulation technique — Toward estimation of typhoon risk in Japan <i>T. Okazaki, H. Watabe, T. Ishihara</i>	246	#167
Hurricane loss prediction model and coastal damage mitigation <i>J.-P. Pinelli, K.R. Gurley, C.S. Subramanian, S. Hamid</i>	262	#224
Issues in estimating local damage by wind disaster — A case study in Chiba prefecture, Japan <i>H. Watabe, T. Okazaki, T. Ishihara</i>	336	#166
Wind damage and cyclones management scenario in India <i>S.C. Yaragal, Y. Tamura, M. Matsui</i>	344	#105
Wind climate and structure: wind flow general studies	CLS-GEN	
Numerical simulation of turbulent wind fields at airports in complex terrain <i>M. Burlando, L. Carassale, M.V. Borghesi, F. Tubino, C.F. Ratto, G. Solari</i>	52	#277
Evaluating the response of an individual to a sudden change in wind speed <i>S.C. Jordan, M. Sterling, C.J. Baker</i>	158	#327
Wind climate and structure: wind field in particular areas	CLS-WFI	
Ten-minute wind velocities and gusts of wind in the Czech Republic <i>J. Král</i>	186	#147
Analysis of turbulence statistics above a Scots pine forest in a sub-arctic northern region <i>I. Mammarella, B. Tammelin</i>	222	#270
Analysis of wind speeds measured on Ostankino TV tower <i>N.A. Popov, V.I. Travovush</i>	272	#295
A new statistical approach for extreme wind speed in France <i>C. Sacré, J.M. Moisselin, M. Sabre, J.P. Flori, B. Dubuisson</i>	284	#220
In-situ measurement of wind statistical characteristics at the northeastern costal region of Taiwan <i>Bao-Shi Shiau, Yuan-Bin Chen</i>	298	#186
Further studies on the statistical properties of the wind filed near Taichung Harbour, Taiwan <i>J.Z. Yim, Chung-Ren Chou</i>	346	#227
Investigation of wind speed on the southern coast of the Baltic Sea <i>J.A. Żurański, S. Kosiński, W.E. Maciążek, A. Piekarczyk, M.K. Piekarski, A. Pietrzykowska, W. Stepko, I. Zwolska</i>	358	#184
Design practice: standards and codes	DSG-COD	
Modifications on the alongwind design wind load <i>C.M. Cheng</i>	74	#192
An investigation into European design wind speed differences <i>D.A. Gatey, C.A. Miller</i>	120	#221
South African wind loading specifications: the Euro way? <i>A.M. Goliger</i>	128	#128

A consistent model for the codification of wind loads on gable roofs <i>M. Kasperski</i>	164	#188
Basic code parameters for wind action in Romania harmonised with EC1 <i>D. Lungu, S. Demetriu, C. Arion, A. Aldea</i>	216	#275
Design practice: design practice with respect to wind effects		DSG-PRA
Probabilistic description of tall building response to wind: Database- assisted design, dynamics, and wind directionality effects <i>W.P. Fritz, E. Simiu</i>	118	#281
A case-based design wind load expert system for tall buildings <i>J. Wang, Y.Y. Lin, C.M. Cheng</i>	332	#132
A study on comparisons of design wind loads and responses for tall buildings with actual wind load distributions and responses <i>Dae Young Kim, Ji Young Kim, Myung Ho Lee, Sang Dae Kim</i>	172	#324
Design practice: reliability, limit states, benchmarks		DSG-REL
Analysis of building glass-aluminium façades subjected to wind loadings <i>K.T. Chatzinikos, C.C. Baniotopoulos</i>	60	#257
Probabilistic design of structures considering omni-directional wind load <i>P. Hanzlík, P. Marek, L. Němec</i>	134	#264
Thermal atmospheric stratification and wind-induced fatigue of structures <i>M.P. Repetto, G. Solari</i>	278	#262
Experimental measurements: data acquisition and processing		EXP-DAT
Analysis of wind time history using wavelet transform <i>A.R. Chen, Y. Wang</i>	62	#175
Experimental measurements: special devices and equipment		EXP-DEV
Measurement of the velocity field in a ribbed channel <i>Z. Chára</i>	58	#236
The role of ultrasonic anemometry in Wind Engineering <i>A. Cuerva, A. Sanz-Andrés, S. Franchini</i>	80	#152
Development of a wireless pressure sensing system for coastal wind monitoring <i>J.-P. Pinelli, C.S. Subramanian, C. Lapilli, L. Buist</i>	264	#225
Experimental measurements: wind tunnel equipment		EXP-TUN
Flow field near a 2D building and its pressure response <i>M. Jirsák, D. Zachoval, J. Matěcha, J. Novotný</i>	154	#158
Assessment of the influence of geometrical details on wind-tunnel measurement results by means of CFD <i>P. Moonen, B. Blocken, S. Roels, J. Carmeliet</i>	236	#115
A two-degree of freedom flexible support for wind tunnel modeling of tall buildings <i>M.G.K. Oliveira, A.M. Loredou-Souza</i>	248	#191
A comparison of effective wind loads and wind-induced responses according to pressure measuring locations on test models <i>Ji Young Kim, Dae Young Kim, Han Young Kim, Sang Dae Kim</i>	174	#323

Flow and structure interaction: cylinders in a cross-flow, aerodynamic vibration damping	FSI-CYL
<hr/>	
Instability mechanisms of skewed circular cylinders	
<i>L. Carassale, A. Freda, G. Piccardo</i>	54 #291
Numerical simulation of two-dimensional cross flow past a cylinder using an unstructured mesh based fully implicit second order coupled method	
<i>E. Didier, A.R.J. Borges</i>	90 #243
A reduced-order model for the lift on a cylinder undergoing forced transverse oscillations	
<i>M.R. Hajj, L. Qin, F. Owis</i>	132 #284
Measurement of the corner effects of a square prism on the near wake using an on-line phase-locked PIV technique	
<i>J.C. Hu, Y. Zhou, J.F. Huang</i>	148 #317
Applicability of LES to turbulent wake of rectangular cylinder — Comparison with PIV data	
<i>M. Kuroda, T. Tamura, M. Suzuki</i>	198 #169
Numerical simulation of aerodynamic forces on a square cylinder in oscillating flows with non-zero mean velocities	
<i>Tsung-Chi Liang, Yi-Chao Li, Fuh-Min Fang, Shuh-Fang Shih</i>	208 #145
Vortex-induced oscillation of a circular cylinder in slowly fluctuating wind	
<i>M. Noda, F. Nagao, E. Arima, T. Morita, H. Utsunomiya</i>	240 #273
Aeroelastic effects on externally forced circular cylinders and their analytical acquisition by coupled oscillator-models	
<i>G. Sedlacek, C. Butz, C.-B. Gromke</i>	294 #131
Flow and structure interaction: debris motion	FSI-DEB
<hr/>	
Solutions of the debris equations	
<i>C.J. Baker</i>	28 #124
Non-dimensional solutions for trajectories of wind-driven compact objects	
<i>E.C. English, J.D. Holmes</i>	104 #293
Investigation of flight mechanics of 1D (rod-like) debris	
<i>N. Lin, C.W. Letchford, T. Gunn</i>	210 #300
Flow and structure interaction: determ./rand. excitation and response, vibration damping	FSI-DYN
<hr/>	
Comparison among different techniques for reliability assessment of no-tensile structures under turbulent wind	
<i>M. Betti, P. Biagini, L. Facchini</i>	34 #206
Passive dynamic vibration absorbers — comparison of different types	
<i>O. Fischer</i>	108 #118
Simulation of across-wind action caused by vortex excitation	
<i>A. Flaga, T. Lipecki</i>	112 #140
Flow and structure interaction: fluid structure interaction general studies	FSI-GEN
<hr/>	
A fully coupled method for computing uniform fluctuating flow around bluff bodies	
<i>E. Didier, A.R.J. Borges</i>	88 #127
Dominant flow features of twin jets in crossflow	
<i>V. Kolář, E. Savory</i>	180 #239
Application of the Discrete Vortex Method to determining parameters of fluid flow around bluff body	
<i>J. Podgórski, E. Bazik-Borowa, T. Nowicki</i>	268 #185

Flow and structure interaction: inclined cables and cylinders	FSI-INC
<hr/>	
Thin water film around a cable subject to wind	
<i>C. Lemaitre, P. Hémon, E. de Langre</i>	202 #276
Dry inclined cable galloping — Theoretical analysis and structural damping required for its prevention	
<i>J.H.G. Macdonald, G.L. Larose</i>	220 #190
Drag loading of circular cylinders inclined in the along-wind direction	
<i>S. Poulin, A. Larsen</i>	274 #197
<hr/>	
High-rise buildings: dynamic response due to wind effects	HIG-DYN
<hr/>	
Coupled dynamic wind load effects on buildings	
<i>X. Chen, A. Kareem</i>	72 #256
Wind induced aeroelastic lock-in instability of tall buildings	
<i>H. Eimani-Kalehsar</i>	98 #272
Monitoring tall buildings under the action of wind: the role of GPS in urban zones	
<i>M. Kochly, T. Kijewski-Correa</i>	178 #246
Dynamic response of two high-rise residential buildings during a typhoon	
<i>K.C.S. Kwok, H.Y. Leung, S. Campbell, P.A. Hitchcock</i>	200 #319
Comparison of analytically-numerically predicted value of maximum height of tall square buildings subjected to peak wind loads	
<i>D. Mitra, A. Mazumdar</i>	230 #123
<hr/>	
High-rise buildings: special effects in wind loading of high-rise buildings	HIG-LOA
<hr/>	
Wind-induced interference effects of different side ratio on high-rise buildings	
<i>K. Cho, S. Hong, Y.S. Kim, K.S. Hwang</i>	78 #194
Effect of interfering building size on non-dimensional acrosswind force spectrum on a tall rectangular building	
<i>H. Eimani-Kalehsar, M. Abitorabi, A. Kolahdoz-Mohammadi</i>	100 #294
Effects of surroundings on wind induced local pressures	
<i>J. Král</i>	188 #148
Flow around a finite length square prism	
<i>H.F. Wang, Y. Zhou, C.K. Chan</i>	330 #314
<hr/>	
Wind loading: atmospheric boundary layer, gradient	LOA-BOU
<hr/>	
Modelling of the wind speed profiles obtained by a sodar in complex terrain	
<i>J. Hošek</i>	142 #312
Large eddy simulation of wind flows over large roughness elements	
<i>K. Nozawa, T. Tamura</i>	242 #176
LES analysis of turbulent boundary layer over 3D steep hill covered with vegetation	
<i>T. Tamura, A. Okuno, Y. Sugio</i>	314 #170
Exposure model for wind loading of buildings	
<i>K. Wang, T. Stathopoulos</i>	334 #193

Wind loading: dynamic deterministic/random loading, turbulence, admittance	LOA-DYN
The surface pressures of 2-D rectangular cylinder with small angle of oncoming flow <i>J.H. Chen, D.H. Chen</i>	66 #187
Full-scale investigation of corner flow <i>C. Li, M.H. de Wit</i>	204 #228
Spectral aerodynamic admittance analysis <i>U. Peil, M. Behrens</i>	260 #155
Time domain model for buffeting wind loads verified in full-scale measurements <i>U. Peil, M. Clobes</i>	258 #154
Proper Orthogonal Decomposition to understand and simplify wind loads <i>F. Ricciardelli, E.T. de Grenet</i>	280 #207
Wind loading: combined wind/rain/snow effects	LOA-RAI
Validation of wind-driven rain simulations on a low-rise building <i>B. Blocken, J. Carmeliet</i>	40 #110
Correlation influence between snow and wind loading on their combination factor <i>R.I. Kinash</i>	176 #104
Driving rain and methods of its estimation <i>M. Sadaghashvili</i>	286 #106
Interaction of the wind driven rain with buildings <i>M. Sadaghashvili</i>	288 #107
Wind loading: static component or equivalent	LOA-STA
Wind tunnel tests on partially clad buildings and structures <i>S. Amoroso, K. Hebert, M.L. Levitan</i>	24 #230
Pressure equalisation of brick masonry cavity walls <i>C.P.W. Geurts, P.W. Bouma, A. Aghaei</i>	126 #232
Wind loads on solar energy systems, mounted on flat roofs <i>C.P.W. Geurts, C. van Bentum, P.A. Blackmore</i>	124 #231
Variations in static pressure — application to wind engineering <i>R.P. Hoxey, A.D. Quinn, P.J. Richards</i>	144 #315
Design wind loads for a low-rise building taking into account directional effects <i>M. Kasperski</i>	166 #278
Universal wind load distribution simultaneously reproducing maximum load effects in all subject members on large-span cantilevered roof <i>A. Katsumura, Y. Tamura, O. Nakamura</i>	168 #252
Wind loading: thunderstorm structure and induced loading	LOA-THU
Simulation of extreme winds from thunderstorm downbursts <i>L. Chen, C.W. Letchford</i>	68 #298
An analysis of extreme non-synoptic winds <i>V. Durañona, C.J. Baker, M. Sterling</i>	96 #254
Gust buffeting of long span bridges by Double Modal Transformation <i>G. Solari, F. Tubino</i>	304 #263
Field site data collection of thunderstorms at Texas Tech University <i>H. Zhu, D.A. Smith</i>	352 #163

Roofs and low-rise structures: large roofs under turbulent wind	RFS-LAR
Wind action on hip roofs	
<i>J. Blessmann</i>	38 #122
Reduction of wind uplift loads on pitched roofs using retro-fit devices	
<i>G. Breeze, J. Smith</i>	50 #303
Identification of wind pressures on the buildings of the Ciudad de la Cultura in Santiago de Compostela (Spain)	
<i>S. Hernández, J.A. Jurado, J. Toimil, J. Díaz</i>	140 #250
Roofs and low-rise structures: special low-rise structures	RFS-LOW
Towards wind load paths on wood buildings	
<i>G. Doudak, A. Ghallagher, B. Kasal, G. McClure, M. Mohammad, I. Smith, T. Stathopoulos, I. Zisis</i> .	94 #285
Numerical simulation of wind loads on structures and effects of incident turbulence	
<i>M.A.K. Elsayed, Y.M. Elokda, S.A. Ragab, M.R. Hajj</i>	102 #282
Wind tunnel modelling of the Silsoe Cube	
<i>P.J. Richards, R.P. Hoxey, B.D. Connell, D.P. Lander</i>	282 #313
Wind loads on a steel greenhouse with a wing-like cross section	
<i>Y. Uematsu, T. Orimo, S. Watanabe, S. Kitamura, M. Iwaya</i>	324 #101
Wind force coefficients for designing free-standing canopy roofs	
<i>Y. Uematsu, E. Iizumi, T. Stathopoulos</i>	326 #102
C-130 Tests on a low-rise gable roof building	
<i>H. Zhu, D.A. Smith</i>	354 #164
Slender structures: chimneys	SLE-CHI
Dynamical analysis of the wind response of tall industrial chimney with flexibility of soil	
<i>T. Chmielewski, P. Górski</i>	76 #180
Cross-wind vibrations of steel chimneys — a new case history	
<i>J. Kawecki, J.A. Żurański</i>	170 #183
Long-term measurements of structural response of a tall steel chimney equipped with different damping devices	
<i>P. Tranvik, G. Alpsten</i>	322 #134
Slender structures: groups	SLE-GRO
Aerodynamic interference of a set of circular cylinders	
<i>O. Kopylov, J. Wojciechowski</i>	182 #269
Measurement of extreme aerodynamic interference forces acting on circular cylinders in turbulent boundary layers	
<i>I. Krönke, H. Sockel</i>	190 #130
Interference of two tapered flagpoles in the wind flow	
<i>M. Studničková</i>	308 #261
Slender structures: masts	SLE-MAS
Guyed masts subjected to wind and other environmental actions	
<i>J. Bęc, A. Flaga</i>	32 #139
Wind response of cable stayed masts	
<i>A.L. Materazzi, I. Venanzi</i>	226 #199

Wind effects on out-of-service tower cranes

S. Bodéré, G. Grillaud 44 #212

Wind dynamic analysis of a latticed communication tower

C.F. Carril Jr, R.M.L.R.F Brasil, N. Isyumov 56 #165

Ambient vibration measurements and along-wind response of the Brancusi Endless Column, Romania

D. Lungu, G. Solari, R. Vacareanu, A. Aldea, C. Arion, S. Demetriu 214 #267

Slender structures: transmission lines

SLE-TRA

Galloping of tramway catenary

O. Flamand, J. Leclair 114 #215

Galloping simulation and observation of a 4-conductor bundle transmission line

M. Shimizu, J. Sato 300 #268

Means of transport: trains and other vehicles and interaction with supporting structure

TRA-VEH

Determination of safe vehicle driving speeds on highways during hurricane evacuations

S.R. Chen, C.S. Cai, M.L. Levitan, B. Wolshon 70 #258

Unsteady crosswind forces on trains and corresponding aerodynamic parameters

Y. Ding, M. Sterling, C.J. Baker 92 #306

On the transient response of road vehicles to cross-wind gust

P. Hémon 150 #244

A new approach to estimate the wind speed probability distribution along a railway track based on international standards

J. Herb, U. Hoppmann, C. Heine, T. Tielkes 138 #125

Probabilistic assessment of road vehicle safety in windy environments

J.Th. Snæbjörnsson, C.J. Baker, R. Sigbjörnsson 302 #296

Twisted flow wind tunnel design for yacht aerodynamic studies

A. Zasso 350 #153

Urban wind problems: building internal and near field aerodynamics

URB-BUI

Numerical study of wind-induced ventilation with the local dynamic similarity model

C. Hu, T. Kurabuchi, M. Ohba 146 #150

Wind Engineering for the new European Court of Justice, Luxembourg

H.H. Koss, C.T. Georgakis 184 #266

Effects of a tall building on the ventilation system of a low building

R.N. Pavlovskiy, P.N. Vinogradskiy, S.G. Kuznetsov, P.V. Artamonov 252 #159

Influence of the aerodynamic test conditions on the aerodynamic efficiency of cowls

S. Sanquer, B. Blanchard, S. Deuchst 292 #218

Penetration of snow into roof construction — Wind tunnel testing of different eave cover designs

T.K. Thiis, P. Barfoed, P. Delpech, A. Gustavsen, V. Hofseth, S. Uvsløkk, M. Dufresne de Virel 320 #179

Urban wind problems: urban wind comfort

URB-COM

A numerical study of the wind speed conditions in passages between buildings and the venturi-effect

B. Blocken, J. Carmeliet, T. Stathopoulos 42 #112

Numerical simulation of the flow across an asymmetric street intersection

J. Franke, W. Frank 116 #138

Wind tunnel simulations of flow and dispersion over urban area <i>Z. Jaňour, K. Bezpalcová, H. Šeděnková</i>	152	#136
Effects of street orientation on dispersion at or near urban street intersections <i>K.F. McNamara, X. Wang</i>	228	#265
Effects of roadside trees on thermal environment and pollutant diffusion in street canyon <i>A. Mochida, K. Sasaki, T. Iwata, N. Hataya, H. Yoshino</i>	232	#309
Numerical study on the regional characteristics of heat balance inside a city located at coastal areas <i>A. Mochida, K. Sasaki, T. Yoshida, H. Yoshino</i>	234	#310
Comparison of high resolution spectra to mean velocity approaches for urban wind comfort simulations — A CFD study <i>Ch. Reichl, M. Mann, G. Haider, H. Lang</i>	276	#322
Design for wind comfort in The Netherlands: procedures, criteria and open research issues <i>E. Willemsen, J.A. Wisse</i>	338	#311
Urban wind problems: pedestrian wind environment		URB-PED
Pedestrian wind comfort assessment criteria: A comparative case study <i>P. Delpech, C.J. Baker, P.A. Blackmore, H.H. Koss, A. Sanz-Andrés, T. Stathopoulos, E. Willemsen</i> ...	82	#217
Mechanical model of human loss of balance due to wind gusts <i>T. Johnson, T. Prevezer</i>	156	#234
Cooperative project for CFD prediction of pedestrian wind environment in the Architectural Institute of Japan <i>R. Yoshie, A. Mochida, Y. Tominaga, H. Kataoka, K. Harimoto, T. Nozu, T. Shirasawa</i>	348	#292
Urban wind problems: dispersion of pollutants		URB-POL
Eolian erosion of a granular material placed on a rectangular box <i>A.D. Ferreira</i>	106	#316
The level-3 mesoscale turbulence model for wind climate and pollutant dispersion in cities <i>A.F. Kurbatskiy, L.I. Kurbatskaya</i>	196	#113
Development of a new model MCD (Monte Carlo Dispersion) <i>V.G. i Llorens, A.M. Sánchez, V. Berbegall, G. Verdú</i>	212	#119
LES study of fluctuating dispersion of hazardous gas in urban canopy <i>H. Nakayama, T. Tamura, Y. Okuda</i>	238	#168
Wind tunnel experiments on the dispersion of continuous heavy gas spill for different ground surface roughness lengths <i>Bao-Shi Shiau, Yin-Chin Chen, Meng-Xun Wu</i>	296	#133
The physical modelling of gas dispersion in topographically complicated terrain <i>R. Ulman, Z. Jaňour, H. Šeděnková, J. Drbohlav</i>	328	#189
Urban wind problems: airflow in stadia		URB-STA
Thermal comfort assessment in semi-outdoor environments: application to comfort study in stadia <i>J. Bouyer, J. Vinet, P. Delpech, S. Carré</i>	48	#219
Influence of canopy on airflow in stadia <i>A. Szucs, S. Moreau, F. Allard</i>	312	#216
Wind energy: environmental studies		WEN-ENV
The status of wind energy <i>G.A.M. van Kuik, W.A.A.M. Bierbooms</i>	194	#260

Multidisciplinary optimization of wind turbine blades		
<i>M. Jureczko, A. Mężyk</i>	162	#126
Aerodynamic loads in dynamics of HAWT rotor		
<i>M. Pawlak, A. Mężyk</i>	254	#182
Numerical simulation of breaking wave load on offshore wind turbines		
<i>U. Peil, C. Corte</i>	256	#149

Wind effects on out-of-service tower cranes <i>S. Bodéré, G. Grillaud</i>	44	#212
Time-domain buffeting simulations for bridges <i>C. Borri, C. Costa</i>	46	#279
Thermal comfort assessment in semi-outdoor environments: application to comfort study in stadia <i>J. Bouyer, J. Vinet, P. Delpech, S. Carré</i>	48	#219
Reduction of wind uplift loads on pitched roofs using retro-fit devices <i>G. Breeze, J. Smith</i>	50	#303
Numerical simulation of turbulent wind fields at airports in complex terrain <i>M. Burlando, L. Carassale, M.V. Borghesi, F. Tubino, C.F. Ratto, G. Solari</i>	52	#277
Instability mechanisms of skewed circular cylinders <i>L. Carassale, A. Freda, G. Piccardo</i>	54	#291
Wind dynamic analysis of a latticed communication tower <i>C.F. Carril Jr, R.M.L.R.F Brasil, N. Isyumov</i>	56	#165
Measurement of the velocity field in a ribbed channel <i>Z. Chára</i>	58	#236
Analysis of building glass-aluminium façades subjected to wind loadings <i>K.T. Chatzinikos, C.C. Baniotopoulos</i>	60	#257
Analysis of wind time history using wavelet transform <i>A.R. Chen, Y. Wang</i>	62	#175
Determination of flutter derivatives by taut strip model — I: Theory <i>A.R. Chen, R.J. Ma</i>	64	#173
The surface pressures of 2-D rectangular cylinder with small angle of oncoming flow <i>J.H. Chen, D.H. Chen</i>	66	#187
Simulation of extreme winds from thunderstorm downbursts <i>L. Chen, C.W. Letchford</i>	68	#298
Determination of safe vehicle driving speeds on highways during hurricane evacuations <i>S.R. Chen, C.S. Cai, M.L. Levitan, B. Wolshon</i>	70	#258
Coupled dynamic wind load effects on buildings <i>X. Chen, A. Kareem</i>	72	#256
Modifications on the alongwind design wind load <i>C.M. Cheng</i>	74	#192
Dynamical analysis of the wind response of tall industrial chimney with flexibility of soil <i>T. Chmielewski, P. Górski</i>	76	#180
Wind-induced interference effects of different side ratio on high-rise buildings <i>K. Cho, S. Hong, Y.S. Kim, K.S. Hwang</i>	78	#194
The role of ultrasonic anemometry in Wind Engineering <i>A. Cuerva, A. Sanz-Andrés, S. Franchini</i>	80	#152
Pedestrian wind comfort assessment criteria: A comparative case study <i>P. Delpech, C.J. Baker, P.A. Blackmore, H.H. Koss, A. Sanz-Andrés, T. Stathopoulos, E. Willemsen</i> ..	82	#217
An experimental and numerical approach to consider vortex induced vibrations in bridge aerodynamics <i>G. Diana, F. Resta, M. Belloli, D. Rocchi</i>	84	#222
A numerical and experimental investigation on aerodynamic non linearities in bridge response to turbulent wind <i>G. Diana, S. Bruni, D. Rocchi</i>	86	#247
A fully coupled method for computing uniform fluctuating flow around bluff bodies <i>E. Didier, A.R.J. Borges</i>	88	#127
Numerical simulation of two-dimensional cross flow past a cylinder using an unstructured mesh based fully implicit second order coupled method <i>E. Didier, A.R.J. Borges</i>	90	#243

Unsteady crosswind forces on trains and corresponding aerodynamic parameters <i>Y. Ding, M. Sterling, C.J. Baker</i>	92	#306
Towards wind load paths on wood buildings <i>G. Doudak, A. Ghallagher, B. Kasal, G. McClure, M. Mohammad, I. Smith, T. Stathopoulos, I. Zisis</i> .	94	#285
An analysis of extreme non-synoptic winds <i>V. Durañona, C.J. Baker, M. Sterling</i>	96	#254
Wind induced aeroelastic lock-in instability of tall buildings <i>H. Eimani-Kalehsar</i>	98	#272
Effect of interfering building size on non-dimensional acrosswind force spectrum on a tall rectangular building <i>H. Eimani-Kalehsar, M. Abitorabi, A. Kolahdoz-Mohammadi</i>	100	#294
Numerical simulation of wind loads on structures and effects of incident turbulence <i>M.A.K. Elsayed, Y.M. Elokda, S.A. Ragab, M.R. Hajj</i>	102	#282
Non-dimensional solutions for trajectories of wind-driven compact objects <i>E.C. English, J.D. Holmes</i>	104	#293
Eolian erosion of a granular material placed on a rectangular box <i>A.D. Ferreira</i>	106	#316
Passive dynamic vibration absorbers — comparison of different types <i>O. Fischer</i>	108	#118
Wind tunnel tests and aerodynamical analysis of a new designed footbridge in Katowice <i>A. Flaga, G. Bosak, M. Pańtak, M. Bigosiński, P. Ziętara</i>	110	#137
Simulation of across-wind action caused by vortex excitation <i>A. Flaga, T. Lipecki</i>	112	#140
Galloping of tramway catenary <i>O. Flamand, J. Leclair</i>	114	#215
Numerical simulation of the flow across an asymmetric street intersection <i>J. Franke, W. Frank</i>	116	#138
Probabilistic description of tall building response to wind: Database- assisted design, dynamics, and wind directionality effects <i>W.P. Fritz, E. Simiu</i>	118	#281
An investigation into European design wind speed differences <i>D.A. Gatey, C.A. Miller</i>	120	#221
Investigation of vortex-induced vibration of Lupu Bridge — The longest arch bridge in the world <i>Y.J. Ge, F.C. Cao, Z.Y. Zhou, H.F. Xiang</i>	122	#211
Wind loads on solar energy systems, mounted on flat roofs <i>C.P.W. Geurts, C. van Bentum, P.A. Blackmore</i>	124	#231
Pressure equalisation of brick masonry cavity walls <i>C.P.W. Geurts, P.W. Bouma, A. Aghaei</i>	126	#232
South African wind loading specifications: the Euro way? <i>A.M. Goliger</i>	128	#128
Severe wind phenomena in Southern Africa and the related damage <i>A.M. Goliger, J.V. Retief</i>	130	#325
A reduced-order model for the lift on a cylinder undergoing forced transverse oscillations <i>M.R. Hajj, L. Qin, F. Owis</i>	132	#284
Probabilistic design of structures considering omni-directional wind load <i>P. Hanzlík, P. Marek, L. Němec</i>	134	#264
Renewable energy for Sub-Saharan Africa — structural aspects of classical wind turbines and innovative solar chimney concept <i>R. Harte, G.P.A.G. Van Zijl</i>	136	#326

A new approach to estimate the wind speed probability distribution along a railway track based on international standards		
<i>J. Herb, U. Hoppmann, C. Heine, T. Tielkes</i>	138	#125
Identification of wind pressures on the buildings of the Ciudad de la Cultura in Santiago de Compostela (Spain)		
<i>S. Hernández, J.A. Jurado, J. Toimil, J. Díaz</i>	140	#250
Modelling of the wind speed profiles obtained by a sodar in complex terrain		
<i>J. Hošek</i>	142	#312
Variations in static pressure — application to wind engineering		
<i>R.P. Hoxey, A.D. Quinn, P.J. Richards</i>	144	#315
Numerical study of wind-induced ventilation with the local dynamic similarity model		
<i>C. Hu, T. Kurabuchi, M. Ohba</i>	146	#150
Measurement of the corner effects of a square prism on the near wake using an on-line phase-locked PIV technique		
<i>J.C. Hu, Y. Zhou, J.F. Huang</i>	148	#317
On the transient response of road vehicles to cross-wind gust		
<i>P. Hémon</i>	150	#244
Wind tunnel simulations of flow and dispersion over urban area		
<i>Z. Jaňour, K. Bezpalcová, H. Šeděnková</i>	152	#136
Flow field near a 2D building and its pressure response		
<i>M. Jirsák, D. Zchoval, J. Matěcha, J. Novotný</i>	154	#158
Mechanical model of human loss of balance due to wind gusts		
<i>T. Johnson, T. Prevezer</i>	156	#234
Evaluating the response of an individual to a sudden change in wind speed		
<i>S.C. Jordan, M. Sterling, C.J. Baker</i>	158	#327
Wind tunnel control software for identification of flutter derivatives on bridge sectional tests		
<i>J.A. Jurado, A. León, S. Hernández</i>	160	#108
Multidisciplinary optimization of wind turbine blades		
<i>M. Jureczko, A. Mężyk</i>	162	#126
A consistent model for the codification of wind loads on gable roofs		
<i>M. Kasperski</i>	164	#188
Design wind loads for a low-rise building taking into account directional effects		
<i>M. Kasperski</i>	166	#278
Universal wind load distribution simultaneously reproducing maximum load effects in all subject members on large-span cantilevered roof		
<i>A. Katsumura, Y. Tamura, O. Nakamura</i>	168	#252
Cross-wind vibrations of steel chimneys — a new case history		
<i>J. Kawecki, J.A. Żurański</i>	170	#183
A study on comparisons of design wind loads and responses for tall buildings with actual wind load distributions and responses		
<i>Dae Young Kim, Ji Young Kim, Myung Ho Lee, Sang Dae Kim</i>	172	#324
A comparison of effective wind loads and wind-induced responses according to pressure measuring locations on test models		
<i>Ji Young Kim, Dae Young Kim, Han Young Kim, Sang Dae Kim</i>	174	#323
Correlation influence between snow and wind loading on their combination factor		
<i>R.I. Kinash</i>	176	#104
Monitoring tall buildings under the action of wind: the role of GPS in urban zones		
<i>M. Kochly, T. Kijewski-Correa</i>	178	#246
Dominant flow features of twin jets in crossflow		
<i>V. Kolář, E. Savory</i>	180	#239

Aerodynamic interference of a set of circular cylinders		
<i>O. Kopylov, J. Wojciechowski</i>	182	#269
Wind Engineering for the new European Court of Justice, Luxembourg		
<i>H.H. Koss, C.T. Georgakis</i>	184	#266
Ten-minute wind velocities and gusts of wind in the Czech Republic		
<i>J. Král</i>	186	#147
Effects of surroundings on wind induced local pressures		
<i>J. Král</i>	188	#148
Measurement of extreme aerodynamic interference forces acting on circular cylinders in turbulent boundary layers		
<i>I. Krönke, H. Sockel</i>	190	#130
Improvement of aeroelastic instability of pylon of cable-stayed bridge by means of separation interference method		
<i>Y. Kubo, K. Tasaki, H. Higashi, K. Kimura, K. Kato</i>	192	#117
The status of wind energy		
<i>G.A.M. van Kuik, W.A.A.M. Bierbooms</i>	194	#260
The level-3 mesoscale turbulence model for wind climate and pollutant dispersion in cities		
<i>A.F. Kurbatskiy, L.I. Kurbatskaya</i>	196	#113
Applicability of LES to turbulent wake of rectangular cylinder — Comparison with PIV data		
<i>M. Kuroda, T. Tamura, M. Suzuki</i>	198	#169
Dynamic response of two high-rise residential buildings during a typhoon		
<i>K.C.S. Kwok, H.Y. Leung, S. Campbell, P.A. Hitchcock</i>	200	#319
Thin water film around a cable subject to wind		
<i>C. Lemaitre, P. Hémon, E. de Langre</i>	202	#276
Full-scale investigation of corner flow		
<i>C. Li, M.H. de Wit</i>	204	#228
Assessment on the instability of a suspension bridge with a hexagonal cross-section under wind action		
<i>Yi-Chao Li, Fuh-Min Fang, Tsung-Chi Liang</i>	206	#146
Numerical simulation of aerodynamic forces on a square cylinder in oscillating flows with non-zero mean velocities		
<i>Tsung-Chi Liang, Yi-Chao Li, Fuh-Min Fang, Shuh-Fang Shih</i>	208	#145
Investigation of flight mechanics of 1D (rod-like) debris		
<i>N. Lin, C.W. Letchford, T. Gunn</i>	210	#300
Development of a new model MCD (Monte Carlo Dispersion)		
<i>V.G. i Llorens, A.M. Sánchez, V. Berbegall, G. Verdú</i>	212	#119
Ambient vibration measurements and along-wind response of the Brancusi Endless Column, Romania		
<i>D. Lungu, G. Solari, R. Vacareanu, A. Aldea, C. Arion, S. Demetriu</i>	214	#267
Basic code parameters for wind action in Romania harmonised with EC1		
<i>D. Lungu, S. Demetriu, C. Arion, A. Aldea</i>	216	#275
Determination of flutter derivatives by taut strip model — II: Application		
<i>R.J. Ma, A.R. Chen</i>	218	#174
Dry inclined cable galloping — Theoretical analysis and structural damping required for its prevention		
<i>J.H.G. Macdonald, G.L. Larose</i>	220	#190
Analysis of turbulence statistics above a Scots pine forest in a sub-arctic northern region		
<i>I. Mammarella, B. Tammelin</i>	222	#270
In-field measurement and stochastic modeling of tropical cyclone winds		
<i>F.J. Masters, T.A. Reinhold, K.R. Gurley, L.D. Aponte-Bermúdez</i>	224	#129
Wind response of cable stayed masts		
<i>A.L. Materazzi, I. Venanzi</i>	226	#199

Effects of street orientation on dispersion at or near urban street intersections <i>K.F. McNamara, X. Wang</i>	228	#265
Comparison of analytically-numerically predicted value of maximum height of tall square buildings subjected to peak wind loads <i>D. Mitra, A. Mazumdar</i>	230	#123
Effects of roadside trees on thermal environment and pollutant diffusion in street canyon <i>A. Mochida, K. Sasaki, T. Iwata, N. Hataya, H. Yoshino</i>	232	#309
Numerical study on the regional characteristics of heat balance inside a city located at coastal areas <i>A. Mochida, K. Sasaki, T. Yoshida, H. Yoshino</i>	234	#310
Assessment of the influence of geometrical details on wind-tunnel measurement results by means of CFD <i>P. Moonen, B. Blocken, S. Roels, J. Carmeliet</i>	236	#115
LES study of fluctuating dispersion of hazardous gas in urban canopy <i>H. Nakayama, T. Tamura, Y. Okuda</i>	238	#168
Vortex-induced oscillation of a circular cylinder in slowly fluctuating wind <i>M. Noda, F. Nagao, E. Arima, T. Morita, H. Utsunomiya</i>	240	#273
Large eddy simulation of wind flows over large roughness elements <i>K. Nozawa, T. Tamura</i>	242	#176
Modelling of nonlinear aeroelastic effects on a structure <i>J. Náprstek, S. Pospíšil, S. Hračov</i>	244	#235
Development of typhoon simulation technique — Toward estimation of typhoon risk in Japan <i>T. Okazaki, H. Watabe, T. Ishihara</i>	246	#167
A two-degree of freedom flexible support for wind tunnel modeling of tall buildings <i>M.G.K. Oliveira, A.M. Loredou-Souza</i>	248	#191
Systemic analysis function of automation and regulation of a wind turbine <i>A. Ouelbani, Y. Abdellaoui, Y. Gritli, S. Ben Ezzine</i>	250	#203
Effects of a tall building on the ventilation system of a low building <i>R.N. Pavlovskiy, P.N. Vinogradskiy, S.G. Kuznetsov, P.V. Artamonov</i>	252	#159
Aerodynamic loads in dynamics of HAWT rotor <i>M. Pawlak, A. Mężyk</i>	254	#182
Numerical simulation of breaking wave load on offshore wind turbines <i>U. Peil, C. Corte</i>	256	#149
Time domain model for buffeting wind loads verified in full-scale measurements <i>U. Peil, M. Clobes</i>	258	#154
Spectral aerodynamic admittance analysis <i>U. Peil, M. Behrens</i>	260	#155
Hurricane loss prediction model and coastal damage mitigation <i>J.-P. Pinelli, K.R. Gurley, C.S. Subramanian, S. Hamid</i>	262	#224
Development of a wireless pressure sensing system for coastal wind monitoring <i>J.-P. Pinelli, C.S. Subramanian, C. Lapilli, L. Buist</i>	264	#225
Experimental study — Elimination of excessive vibration amplitudes by liquid damper <i>M. Pirner, S. Urushadze</i>	266	#116
Application of the Discrete Vortex Method to determining parameters of fluid flow around bluff body <i>J. Podgórski, E. Bazik-Borowa, T. Nowicki</i>	268	#185
A numerical investigation of the bifurcation characteristics of a 2D nonlinear airfoil in turbulent flow <i>D. Poirel</i>	270	#280
Analysis of wind speeds measured on Ostankino TV tower <i>N.A. Popov, V.I. Travoush</i>	272	#295
Drag loading of circular cylinders inclined in the along-wind direction <i>S. Poulin, A. Larsen</i>	274	#197

Comparison of high resolution spectra to mean velocity approaches for urban wind comfort simulations — A CFD study		
<i>Ch. Reichl, M. Mann, G. Haider, H. Lang</i>	276	#322
Thermal atmospheric stratification and wind-induced fatigue of structures		
<i>M.P. Repetto, G. Solari</i>	278	#262
Proper Orthogonal Decomposition to understand and simplify wind loads		
<i>F. Ricciardelli, E.T. de Grenet</i>	280	#207
Wind tunnel modelling of the Silsoe Cube		
<i>P.J. Richards, R.P. Hoxey, B.D. Connell, D.P. Lander</i>	282	#313
A new statistical approach for extreme wind speed in France		
<i>C. Sacré, J.M. Moisselin, M. Sabre, J.P. Flori, B. Dubuisson</i>	284	#220
Driving rain and methods of its estimation		
<i>M. Sadaghashvili</i>	286	#106
Interaction of the wind driven rain with buildings		
<i>M. Sadaghashvili</i>	288	#107
Three-dimensional simulations of suspension bridges under wind load: Influence of mean steady configuration and effects of load nonlinearities		
<i>L. Salvatori, P. Spinelli</i>	290	#288
Influence of the aerodynamic test conditions on the aerodynamic efficiency of cowls		
<i>S. Sanquer, B. Blanchard, S. Deuchst</i>	292	#218
Aeroelastic effects on externally forced circular cylinders and their analytical acquisition by coupled oscillator-models		
<i>G. Sedlacek, C. Butz, C.-B. Gromke</i>	294	#131
Wind tunnel experiments on the dispersion of continuous heavy gas spill for different ground surface roughness lengths		
<i>Bao-Shi Shiau, Yin-Chin Chen, Meng-Xun Wu</i>	296	#133
In-situ measurement of wind statistical characteristics at the northeastern costal region of Taiwan		
<i>Bao-Shi Shiau, Yuan-Bin Chen</i>	298	#186
Galloping simulation and observation of a 4-conductor bundle transmission line		
<i>M. Shimizu, J. Sato</i>	300	#268
Probabilistic assessment of road vehicle safety in windy environments		
<i>J.Th. Snæbjörnsson, C.J. Baker, R. Sigbjörnsson</i>	302	#296
Gust buffeting of long span bridges by Double Modal Transformation		
<i>G. Solari, F. Tubino</i>	304	#263
Wind and agriculture — an essential subject of the African Participatory Research Agenda		
<i>C.J. Stigter, L.O.Z. Onyewotu, N.K.N. Al-amin</i>	306	#103
Interference of two tapered flagpoles in the wind flow		
<i>M. Studničková</i>	308	#261
Identification of 18 flutter derivatives using CFD turbulence modelling		
<i>D. Sun, N.G. Wright, J.S. Owen, K. Liaw</i>	310	#241
Influence of canopy on airflow in stadia		
<i>A. Szucs, S. Moreau, F. Allard</i>	312	#216
LES analysis of turbulent boundary layer over 3D steep hill covered with vegetation		
<i>T. Tamura, A. Okuno, Y. Sugio</i>	314	#170
A study into the performance of wind shields on both streamlined and bluff bridge deck sections		
<i>I.J. Taylor, M. Vezza, I. Salisbury</i>	316	#157
Aeroelasticity of slender shell bridges		
<i>A. Tesár</i>	318	#109
Penetration of snow into roof construction — Wind tunnel testing of different eave cover designs		
<i>T.K. Thiis, P. Barfoed, P. Delpéch, A. Gustavsen, V. Hofseth, S. Uvsløkk, M. Dufresne de Virel</i>	320	#179

Long-term measurements of structural response of a tall steel chimney equipped with different damping devices		
<i>P. Tranvik, G. Alpsten</i>	322	#134
Wind loads on a steel greenhouse with a wing-like cross section		
<i>Y. Uematsu, T. Orimo, S. Watanabe, S. Kitamura, M. Iwaya</i>	324	#101
Wind force coefficients for designing free-standing canopy roofs		
<i>Y. Uematsu, E. Iizumi, T. Stathopoulos</i>	326	#102
The physical modelling of gas dispersion in topographically complicated terrain		
<i>R. Ulman, Z. Jaňour, H. Šeděnková, J. Drbohlav</i>	328	#189
Flow around a finite length square prism		
<i>H.F. Wang, Y. Zhou, C.K. Chan</i>	330	#314
A case-based design wind load expert system for tall buildings		
<i>J. Wang, Y.Y. Lin, C.M. Cheng</i>	332	#132
Exposure model for wind loading of buildings		
<i>K. Wang, T. Stathopoulos</i>	334	#193
Issues in estimating local damage by wind disaster — A case study in Chiba prefecture, Japan		
<i>H. Watabe, T. Okazaki, T. Ishihara</i>	336	#166
Design for wind comfort in The Netherlands: procedures, criteria and open research issues		
<i>E. Willemsen, J.A. Wisse</i>	338	#311
Study on flutter characteristics of 4-span suspension bridge		
<i>H. Yamada, H. Katsuchi</i>	340	#195
Aerodynamic investigation on flutter instability of the first sea-crossing bridge in China — The East Sea Bridge		
<i>Y.X. Yang, Y.J. Ge, L. Zhao</i>	342	#328
Wind damage and cyclones management scenario in India		
<i>S.C. Yaragal, Y. Tamura, M. Matsui</i>	344	#105
Further studies on the statistical properties of the wind filed near Taichung Harbour, Taiwan		
<i>J.Z. Yim, Chung-Ren Chou</i>	346	#227
Cooperative project for CFD prediction of pedestrian wind environment in the Architectural Institute of Japan		
<i>R. Yoshie, A. Mochida, Y. Tominaga, H. Kataoka, K. Harimoto, T. Nozu, T. Shirasawa</i>	348	#292
Twisted flow wind tunnel design for yacht aerodynamic studies		
<i>A. Zasso</i>	350	#153
Field site data collection of thunderstorms at Texas Tech University		
<i>H. Zhu, D.A. Smith</i>	352	#163
C-130 Tests on a low-rise gable roof building		
<i>H. Zhu, D.A. Smith</i>	354	#164
Full bridge aeroelastic model test of Third Nanjing Bridge over Yangtze River		
<i>L.D. Zhu, D.L. Wang, Z.S. Guo, M. Wang, F.C. Cao</i>	356	#143
Investigation of wind speed on the southern coast of the Baltic Sea		
<i>J.A. Żurański, S. Kosiński, W.E. Maciążek, A. Piekarczyk, M.K. Piekarski, A. Pietrzykowska, W. Stepko, I. Zwolska</i>	358	#184

Table of Contents

(order according to the Sections and Subsections)

Keynote lectures		KEY
Wind Engineering past, present and future		
<i>C.J. Baker</i>	4	#K02
Wind response of large roofs of stadions and arena		
<i>C. Borri, P. Biagini</i>	18	#K03
Bluff body aerodynamics and aeroelasticity: a wind effects perspective		
<i>A. Kareem</i>	16	#K05
Flutter instability of structures		
<i>M. Matsumoto</i>	6	#K04
The International Association for Wind Engineering (IAWE): birth, development and perspectives		
<i>G. Solari</i>	2	#K01
Wind engineering in Africa		
<i>J.A. Wisse</i>	12	#K06
Wind engineering in Africa: general studies		AFR-GEN
Severe wind phenomena in Southern Africa and the related damage		
<i>A.M. Goliger, J.V. Retief</i>	130	#325
Wind and agriculture — an essential subject of the African Participatory Research Agenda		
<i>C.J. Stigter, L.O.Z. Onyewotu, N.K.N. Al-amin</i>	306	#103
Wind engineering in Africa: wind energy in Africa		AFR-WEA
Systemic methodological approach for the analysis of exploitation and development environment of a wind power station		
<i>M. Annabi, Y. Abdellaoui</i>	26	#205
Renewable energy for Sub-Saharan Africa — structural aspects of classical wind turbines and innovative solar chimney concept		
<i>R. Harte, G.P.A.G. Van Zijl</i>	136	#326
Systemic analysis function of automation and regulation of a wind turbine		
<i>A. Ouelbani, Y. Abdellaoui, Y. Gritli, S. Ben Ezzine</i>	250	#203
Bridges: buffeting		BRI-BUF
Time-domain buffeting simulations for bridges		
<i>C. Borri, C. Costa</i>	46	#279
Bridges: case studies		BRI-CAS
Monitoring of the environmental action of wind on a cable stayed bridge		
<i>J. Biliszczuk, M. Hildebrand, C. Machelski, W. Barcik, K. Sadowski</i>	36	#200
