Session 1: Invited lectures and overviews

- Optical nodes dimensioning for a Pan-European optical backbone (*invited*) **1 – 1/7**
F. Tillerot, D. R. Hjelm, A. Røyset (COST 239)
- SOA-based components and subsystems in the ACTS program (*invited*) **2 – 1/9**
J. Benoit, B. Mikkelsen, N. Agrawal, J. Buus, E. Jahn, R. Hess, D. Marcenac, G. Veith, D. Chiaroni, S. L. Danielsen, C. Guillemot, M. Renaud, M. Chbat, A. Jourdan, M. Puleo, X. Z. Qiu, I. van de Voorde, J. J. E. Reid, G. N. van den Hoven
- SOA-based functional devices — Recent advances in Japan (*invited*) **3 – 1/8**
H. Kawaguchi
- Noise properties of nonlinear semiconductor optical amplifiers (*invited*) **4 – 1/6**
G. Eisenstein, M. Shtaif
- Semiconductor optical amplifiers for signal processing
via four-wave mixing (*invited*) **5 – 1/2**
A. Mecozzi
- Speed and travelling wave effects in cross-gain modulation in semiconductor
optical amplifiers (*invited*) **6 – 1/8**
D. Marcenac, A. E. Kelly, D. Nisset, D. G. Moodie
- Overview of SOA-based components for optical networks **7 – 1/4**
M. Renaud, J. Y. Emery, F. Dorgeuille, T. Ducellier, C. Janz, B. Dagens, F. Pommereau
- SOA applications: Technical requirements and market overview **8 – 1/2**
R. Dall'Ara
- Session 2: Nonlinear dynamic properties of SOAs**
- Modeling of SOA based all-optical wavelength converters and phase conjugators **9 – 1/4**
K. Obermann, S. Kindt, D. Breuer and K. Petermann,
- Time-domain electromagnetic model for HNDFWM
in a travelling-wave semiconductor optical amplifier **10 – 1/3**
I. V. Scherbatko, A. Neruch
- Integrated GAG-SOA (Gain-Attenuation-Gain) for ultra-high
speed wavelength conversion **11 – 1/3**
T. Ducellier, D. Carpentier, J. P. Hébert
- Frequency conversion realized by FWM in SOAs: performance dependence
on device-length and pump-wavelength **12 – 1/4**
S. Scotti, L. Graziani, A. D'Ottavi, F. Martelli, A. Mecozzi, P. Spano, R. Dall'Ara, F. Girardin, G. Guekos

40 Gbit/s wavelength conversion over 24.6 nm using FWM in a semiconductor optical amplifier with an optimised MQW active region <i>A. E. Kelly, D. D. Marcenac, D. Nisset</i>	13 – 1/4
Bit error rate assessment of a wavelength converter based on four-wave mixing in a semiconductor optical amplifier <i>F. Girardin, G. Pham, A. Houbavlis, G. Guekos</i>	14 – 1/3
Fast optical switching of picosecond pulses by four-wave mixing in semiconductor-optical amplifiers <i>S. Diez, C. Schmidt, R. Ludwig, H. G. Weber</i>	15 – 1/5
Performance improvement of dispersion supported transmission at 10 GBit/s by partial chirp compensation in a travelling wave amplifier <i>M. M. Freire, H. J. A. da Silva</i>	16 – 1/4
Session 3: SOAs in linear regime	
Bitrate dependence of the saturation power and the crosstalk of a Gain Clamped Semiconductor Optical Amplifier <i>J. Sun, G. Morthier, R. Baets</i>	17 – 1/4
Computer modelling of a fiber Bragg grating-amplifier <i>H. V. Baghdasaryan., G. G. Karapetyan, T. M. Knyazyan, S. I. Avagyan, N. K. Uzunoglu</i>	18 – 1/3
Fast switching and gain control of burst-mode optical repeaters using semiconductor optical amplifiers <i>B. Stubbe, X. Z. Qiu, C. Coene, J. Vandewege, C. Martin, H. Slabbinck</i>	19 – 1/4
Polarization-induced system penalties in 10 Gbit/s field-trial at 1,3 μm using semiconductor optical amplifiers <i>R. Leppla, A. Mattheus, J. Ruffler, F. Wittl, H. Haunstein, B. Teichmann, L. C. Garcia</i>	20 – 1/4
Wavelength conversion in WDM transport networks <i>B. Van Caenegem, W. Van Parys, A. Kuchar, P. Demeester</i>	21 – 1/5
Transparency in high capacity networks based on an optical layer <i>B. Skjoldstrup, J. Späth, A. Jukan</i>	22 – 1/5
