R.W. Ogden: Evolution of natural configurations and material symmetry during finite deformation induced damage	11
S. Cleja-Țigoiu: Large elasto-plastic deformations in anisotropic and dissipative materials	13
J. Plešek: On the pursuit of objective derivative	27
P. Haupt, T. Kersten: On the modelling of anisotropic material behaviour in viscoplasticity	29
M. Schmidt–Baldassari, K. Hackl: Incremental variational principles in large strain damage mechanics	31
J. Dunwoody, R.W. Ogden: On the thermodynamic stability of elastic heat conducting solids subject to a deformation-temperature constraint	33
Z. Fiala: Theory of finite deformations and differential geometry	37
M. Šraml, I. Potrč, M. Ulbin, J. Stupan: Computer aided analysis and optimisation of the forging process	53
Y.F. Dafalias: Physico-geometrical coupling in finite strain elastoplasticity	65
P. Rougée: Exact and approximated kinematics frames for the statement of constitutive laws in large strain	79
S. Reese, B. Svendsen: On the modeling of internal variables as structure tensors in anisotropic, finite-deformation inelasticity	91
T. Böhlke, A. Bertram, E. Krempl: Simulation and modeling of crystallographic texture induced elastic and plastic anisotropy	93
I. Doltsinis: Significance of gravity in ceramic paste extrusion	95
F. Kroupa, J. Plešek: Elastic nonlinearity due to microcracks in thermally sprayed materials	105
L. Berka: Large high gradient strains in polycrystals— experimental investigation	117
Z. Převorovský, J. Krofta, M. Blaháček, M. Raab: Acoustic emission during necking and plastic elongation of semi-crystalline polymer blends	125

G.A. Holzapfel, T.C. Gasser, R.W. Ogden: A new constitutive framework for arterial wall mechanics and a comparative study of material models	127
T.C. Gasser, G.A. Holzapfel: A structural model for the viscoelastic behavior of soft tissues	129
M. Holeček, F. Poirier: Hyperelastic models of living tissues based on the microcontinual approach	131
M.L. Profit, J. Bonet: Non-linear non-isotropic viscoelastic constitutive models for soft biological tissues	143
L.J. Sluys, Y. Estrin: Multi-level analysis of thin sheet metal forming	159
F. Barlat, J.W. Yoon, J.C. Brem, O. Cazacu: Plane stress yield function for aluminum alloy sheets	161
R. Souchet: Large strains revisited in plasticity	167
S. Alexandrov, E. Lyamina: Damage evolution in axisymmetric solid bars subject to combined tension and torsion	179
O.T. Bruhns, A.T.M. Meyers, H. Xiao: Comments on the logarithmic strain and the logarithmic rate	191
L. Szabó, A. Pethö: A model for large deformation plasticity based on logarithmic rate	193
A. Poživilová, F. Fridrich: Experimental verification of logarithmic hyperelastic models	195
B. Marvalová, R. Urban: Identification of orthotropic hyperelastic material properties of cord-rubber cylindrical air-spring	197
E. Rohan: A two scale updated Lagrangian algorithm for large deformation problems in heterogeneous media	199
E. Hirsch, D. Mordehai: The internal tension when shear-bands form	203
E. Hirsch, D. Mordehai: The one—stream line—model solution of the asymmetric two flow collision problem—limitations and applications	213
M. Landa, J. Plešek: Experimental assessment of various deformation measures in acoustoelasticity	225
