CONTENTS

Foreword

1 Introduction

1.1 How to read the book . . . 3
1.2 Types of variables . . . 5
1.3 Conventions . . . 6

2 Statistical software

2.1 The R Environment . . . 7
2.2 Installation and use of R . . . 9
2.3 Basic operations . . . 11
2.4 Data frames . . . 18

3 Exploratory data analysis (EDA)

3.1 Expected value . . . 23
3.2 Variance . . . 25
3.3 Confidence intervals . . . 26
3.4 Summary tables . . . 27
3.5 Plots . . . 28
3.5.1 Distribution plots . . . 32
3.5.2 Scatter plots . . . 35
3.5.3 Box plots . . . 35
3.5.4 Lattice plots . . . 37
3.5.5 Interaction plots . . . 38
3.5.6 Bar plots . . . 39
3.5.7 Paired plots . . . 40
3.5.8 3D plots . . . 40
3.5.9 Plots with whiskers . . . 40
3.5.10 Curves . . . 41

4 Statistical modelling

4.1 Regression model . . . 43
4.2 General linear model . . . 45
4.3 Generalized linear model . . . 47
4.4 Searching for the "correct" model . . . 51
4.5 Model selection . . . 53
4.6 Model diagnosis . . . 54

5 The first trial

5.1 An example . . . 61
5.2 EDA . . . 61
5.3 Presumed model . . . 63
5.4 Statistical analysis . . . 63
5.4.1 ANOVA table of Type I . . . 65
5.4.2 Nonlinear trends . . . 67
5.4.3 Removal of model terms . . . 70
5.4.4 Comparison of levels using contrasts . . . 74
5.4.5 Contrasts and the model parameterization . . . 77
5.4.6 Posterior simplification . . . 83
5.4.7 Diagnosis of the final model . . . 85
5.5 Conclusion . . . 88

6 Systematic part

6.1 Regression . . . 90
6.2 ANOVA and ANODEV . . . 93
6.3 ANCOVA and ANCODEV . . . 94
6.4 Syntax of the systematic part . . . 96

7 Random part

7.1 Continuous measurements . . . 100
7.2 Counts and frequencies . . . 102
7.3 Relative frequencies . . . 104

8 Gaussian distribution

8.1 Description of LM and GLM . . . 107
8.2 Regression . . . 108
8.3 Weighted regression . . . 116
8.4 Multiple regression . . . 120

8.5 Two-way ANOVA 132
8.6 One-way ANCOVA 141

9 Gamma and lognormal distributions

9.1 Description of the Gamma model 147
9.2 Description of the lognormal model 148
9.3 Regression 149
9.4 Two-way ANODEV 156
9.5 Two-way ANCOVA 163

10 Poisson distribution

10.1 Description of the Poisson model 169
10.2 One-way ANODEV 170
10.3 Overdispersion and underdispersion 175
10.4 Multiple regression 176
10.5 One-way ANCODEV 183
10.6 Three-way ANODEV (Contingency table) 190

11 Negative-binomial distribution

11.1 Description of the negative-binomial model 199
11.2 One-way ANODEV 200

12 Binomial distribution

12.1 Description of binomial model 210
12.2 Two-way ANODEV 212
12.3 Overdispersion and underdispersion 218
12.4 Regression 219
12.5 One-way ANCODEV 226
12.6 Binary one-way ANCODEV 231
