

## CONTENT

<b>Influence of the non-linear resistivity-temperature relationship on the mean wire temperature</b>	
P. Antoš .....	3
<b>Experimental investigation of friction characteristics in unsteady open-channel sewer flow over rough sediment bed</b>	
V. Bareš, J. Jirák, J. Pollert, sen. ....	7
<b>Design of experimental line for PLIF measurement of temperature field</b>	
J. Čížek, M. Falge, J. Nožička .....	15
<b>Resultant swirl flow velocity and its comparison with straight axial flow velocity</b>	
M. Domanová, F. Dzianik .....	21
<b>PIV measurements of velocity field inside an engine cylinder during intake stroke</b>	
M. Emrich, P. Hatschbach .....	28
<b>Influence of UVP probes rotation on velocity measurements</b>	
Z. Chára.....	38
<b>Unsteadiness in effervescent sprays – measurement and evaluation using combined PIV – PLIF technique</b>	
J. Jedelský, M. Jícha .....	43
<b>Comparison of ADV and UVP method for turbulent characteristic measurement of free surface flow in circular pipe</b>	
J. Jirák, V. Bareš.....	53
<b>Comparison of experimental and numerical data in 2D impact flow</b>	
M. Knob., P. Antoš, J. Adamec .....	59
<b>Measurement and visualization of the flow in the openable diffusor using PIV method</b>	
M. Kotek, M. Hoznedl, V. Kopecký, J. Linhart .....	63
<b>Velocity profile in a channel of rectangular cross section</b>	
J. Novotný, L. Nováková, Z. Chára, J. Adamec, J. Matěcha .....	69
<b>The immediate knowledge of the new EIS monitoring system</b>	
J. Pařílková, Z. Zachoval.....	73
<b>The velocity fields measurements by UVP Monitor in physical models of weirs</b>	
J. Pařílková, Z. Zachoval.....	81
<b>Flow structure in the channel behind a backward-facing step</b>	
J. Tihon, V. Pěnkavová .....	87

<b>Directional characteristics of wire and fiber-glass tri-axial probes DANTEC</b>	
V. Uruba.....	93
<b>Experience with the use of CTA for measurements of liquid velocity</b>	
J. Vejražka .....	99
<b>PIV and LDA flow parameters measurement in the water channel with high negative step</b>	
P. Zubík.....	105
