

CONTENTS

1. INTRODUCTION

Preface page n 2

M. Rychnovská

MAB Project No 91: Function of grasslands
in spring region - Kameničky Project 3

M. Rychnovská

2. STATUS OF GRASSLANDS TODAY, THEIR DEVELOPMENT
IN THE PAST

Survey of grassland communities in
the protected area of the Žďárské vrchy Hills 17

E. Balátová-Tuláčková

Syngeneses of the Polygalo-Nardetum strictae
PREISING 1950 corr. OBERDORFER 1957 at Kameničky 23

K. Rybníček et E. Rybníčková

3. ABIOTIC ENVIRONMENTAL FACTORS

Climatic characteristics of the experimental area
at Kameničky 35

I. Bár

The low humic gleys of the Kameničky site and
their oxidation-reduction conditions 45

E. Tomková et V. Šíbl

Evapotranspiration from a natural grassland stand,
estimated by the heat-balance method 51

P. Šmíd

4. PRIMARY PRODUCERS - THEIR STRUCTURE AND EFFICIENCY

Plant cover in the experimental area
of the Kameničky Project 61

V. Zelená

Horizontal variability of vegetation in the Kameničky grassland	69
K. Fiala et V. Zelená	
Primary production of the Kameničky grassland - aboveground	77
J. Jakrlová	
Primary production of the Kameničky grassland - underground	87
K. Fiala	
Vertical structure of the leaf canopy in the Kameničky grassland	93
J. Jakrlová	
Pattern analysis of <i>Nardus stricta</i> and <i>Sanguisorba officinalis</i>	103
V. Zelená	
Appendix: Programming the pattern analysis of plant stands	111
B. Petřík	
Seasonal dynamics of the growth of <i>Nardus stricta</i> L.	115
K. Fiala et J. Jakrlová	
A quantitative study of the leaf morphology and anatomy during the ontogenetic development of <i>Nardus stricta</i> L.	121
Z. Makušová	
Physiological variability of <i>Nardus stricta</i> in natural and managed stands	129
M. Rychnovská	
Fertilization and exploitation effects in natural and man-made grasslands at Kameničky	137
E. Halva et J. Lesák	

5. PRODUCTION PROCESSES

Photosynthetic characteristics of several

important plant species	147
J. Gloser	
Transpiration in natural and man-made grasslands at Kameničky	153
M. Rychnovská	
A versatile chamber for gas exchange measurements of grassland swards	161
J. Gloser	
6. CONSUMERS	
The common vole (<i>Microtus arvalis</i>) in the Kameničky grassland	167
J. Pelikán	
The structure and life forms of terrestrial bugs (Heteroptera Geocorisae) and Orthoptera from the grassland ecosystem of Kameničky	173
B. Dobšík	
Food consumption of the grasshopper <i>Chorthippus biguttulus</i>	179
V. Lapáček	
Coenological characteristics of soil Apterygota in natural grassland at Kameničky	185
J. Rusek	
Two methods used for quantitative sampling of insects in the investigation of the grassland at Kameničky	189
L. Škapec	
7. DECOMPOSITION. FURTHER FATE OF PLANT BIOMASS	
Seasonal dynamics of plant litter in the Kameničky grassland dominated by <i>Nardus stricta</i> L.	197
M. Tesařová	
Soil and root respiration in the Kameničky grassland dominated by <i>Nardus stricta</i> L.	203
M. Tesařová	

8. CYCLING OF MINERAL ELEMENTS. NITROGEN CYCLING	
The mineral composition of rainfall water in the Kameničky area	213
B. Úlehlová	
Relation between rainfall and lysimetric water below the grassland stands at the Kameničky experimental area	221
B. Úlehlová	
Mineral composition of the aboveground biomass of the Kameničky grassland	229
J. Jakrlová	
Methodological aspects of denitrification measurements performed under laboratory conditions .	237
M. Munzarová et K. Tesařík	
Further results of atmospheric nitrogen fixation studies in the Kameničky grasslands	243
M. Šimek, B. Úlehlová et K. Tesařík	
9. MAN AND GRASSLANDS IN THE AREA OF THE ŽDÁRSKÉ VRCHY HILLS	
Relationships of the local population to the landscape in the area of Kameničky	255
H. Librova	
10. BIBLIOGRAPHY OF THE KAMENIČKY PROJECT (MAB PROJECT NO 91)	
O. Tichá	
273
