

CONTENTS

Principles of fluorescence microscopy and fluorescent probes

- Novel fluorescence sensing technologies 1
J.R. Lakowicz
- Phase-FRAP: A novel frequency-domain variant of fluorescence
 recovery after photobleaching 23
J.J. Birmingham
- Fluorescent probes for biological applications: Cyanine dyes revisited 37
M.E. Cooper
- Two-fusion FRET: A new means to observe structural
 and functional protein dynamics in living cells 59
*B. Herman, N. Mahajan, E. Casanova, J. Michaux
 and G. Gordon*
- Total internal reflection fluorescence spectroscopy and microscopy 67
*K. Stock, R. Sailer, W.S.L. Strauss, R. Pavesi, M. Lyttek,
 H. Emmert and H. Schneckenburger*
- Dynamic pbFRET measurements on the actomyosin complex –
 a spectral study of Oregon Green-488 and Texas Red
 as donor-acceptor couple 81
*P.L.T.M. Frederix, W. Hamelink, E.L. de Beer
 and H.C. Gerritsen*
- Quantitative imaging in thick specimen using two-photon FLIM 91
C.J. de Grauw and H.C. Gerritsen

New techniques and instrumentation

- A novel fluorescence lifetime imaging system based on solid-state
 diode-pumped laser technology 99
*M.J. Cole, R. Jones, K. Dowling, D. Parsons-Karavassilis,
 P.M.W. French, M.J. Lever, M.A.A. Neil, R. Juškaitis,
 T. Wilson, A.K.L. Dymoke-Bradshaw and J.D. Hares*

System for fluorescence-lifetime imaging microscopy <i>L. K. van Geest, F.R. Boddeke, P.W. van Dijk, A.F. Kamp, C.J.R. van der Oord and K.W.J. Stoop</i>	109
Photon-counting fluorescence imaging <i>K. Suhling, R.W. Airey and B.L. Morgan</i>	127
Quantification of gene expression in a microarray system using fluorescent dyes <i>K. Taylor and A. McDougall</i>	133
 Fluorescent labels	
Fluorescent coumarin derivatives for cell labelling: 3D-microscopy and scanning near-field optical microscopy <i>C. Geoffroy, M.C. Carré, F. Baros, S. Muller, D. Dumas, J.F. Stoltz, P. van Hoppen, F.C. de Schryver and M.L. Viriot</i>	137
Reactive fluorescent <i>N</i> -triazinyl-1-aminopyrene derivatives <i>P. Kapusta, V. Fidler, M. Nepraš, P. Šoustek and M. Hof</i>	145
Design of fluorescent probes sensitive to membrane potential based on intramolecular excited state proton transfer <i>A.S. Klymchenko, T. Öztürk, V.G. Pivovarenko and A.P. Demchenko</i>	153
Time-resolved fluorescence spectroscopy: Fluorescent-labeled poly(γ -benzyl-L-glutamate) <i>V. Pokorná</i>	159
 Chemical applications of fluorescent probes	
Oxygen phosphorescent probe <i>A.V. Butenin, B.Ya. Kogan, S.N. Dashkevich, O.L. Kaliya, E.A. Lukyanets and G.N. Vorozhtsov</i>	163
pH and pOH in mixed aqueous organic solvents <i>S.G. Schulman</i>	167
Fluorescent study of organic compounds of environmental interest in organized molecular systems. Analytical applications <i>J.J. Santana Rodriguez</i>	179

- Near-field fluorescence microscopy of thiolipid membranes
in liquid environment 193
L. Vaccaro, E.L. Schmid, H. Vogel and F. Marquis-Weible
- Room temperature phosphorescence of aromatic ketones included
into hydrophobic powdered substrates 199
L.F. Vieira-Ferreira, A.S. Oliveira and J.C. Netto-Ferreira
- Fluorescence applications in biology**
- Imaging of pH in plant cells – methods and concepts in
the elucidation of proton signalling 209
W. Roos
- Presence of actin in nuclei of rat NBT II cells 223
A. Pliss, I. Raška and M. Eltsov
- Simultaneous detection of lectins by immuno- and
glycochemistry 235
*K. Smetana, Jr., J. Homolka, V. Froňková, Z. Holíková,
N.C. Bovin, S. André, D.C. Rijken, Fu-tong Li and H.-J. Gabius*
- Difference in susceptibility of individual cells of *Saccharomyces*
cerevisiae to killer toxin K1 243
M. Bartůněk, O. Jelinek and V. Vondřejš
- Interaction of *Bordetella pertussis* adenylate cyclase toxin with
artificial lipid membranes: Kinetics of toxin-mediated
lysis of multilamellar liposomes 251
*J. Mašín, I. Konopásek, M. Kalhous, J. Svobodová
and P. Šebo*
- Topography of some genes and chromosomes in interphase
nuclei of human cells 259
*M. Skalníková, S. Kozubek, E. Lukášová, M. Kozubek,
E. Bártová, A. Marečková, P. Jirsová and A. Cafourková*
- Changes in distribution, size and membrane potential
of mitochondria from density-separated
trout erythrocytes 267
*L. Tiano, A.M. Santroni, P. Ballarini, G. Santoni,
M. Wozniak and G. Falcioni*

Rotation of proteins at room temperature <i>P. Urbanová, E. Amler and O. Jelinek</i>	273
 Applications of fluorescence techniques in medical diagnosis and therapy	
Fluorescence in situ hybridization for detection of numerical chromosomal abnormalities (Chr. 1 and 18) in bladder carcinoma cells in vitro <i>E. Reich, K. Kleinschmidt, R. Hautmann and J. Gschwend</i>	279
Retinal degeneration in animal models – neuron and glial interactions <i>C. Johansson and K. Warfvinge</i>	287
Estimation of T-cell subpopulation significance in multiple sclerosis patients <i>I. Kalnina, M. Mētra, L. Līcītis and I. Meirovics</i>	295
The role of intracellular distribution of 5-aminolevulinic acid-induced protoporphyrin IX for efficacy of photodynamic therapy <i>R. Krieg, S. Fickweiler, H. Messmann and R. Knuechel</i>	301
Cyanine dye labels for the optical monitoring of receptor-mediated endocytosis of peptides and protein in tumor cells <i>A. Becker, C. Hassenius, K. Licha, S. Bhargava, R. Volker-Engert, J. Schneider-Mergener, B. Wiedenmann and W. Semmler</i>	311
Confocal spectral imaging studies of new photosensitizer 3-devinyl-3-formylchlorin P6 in living tumor cells <i>A.V. Feofanov, A.I. Grichine, L.A. Shitova, I.A. Kudelina, T.A. Karmakova, R.I. Yakubovskaya, M. Egret-Charlier and P. Vigny</i>	317
Distribution and interactions of Photosens in murine Ehrlich carcinoma – fluorescent spectral imaging approach <i>A. Feofanov, T. Karmakova, A. Grichine, G. Fomina, I. Nazimov, R. Yakubovskaya, M. Egret-Charlier and P. Vigny</i>	323
Confocal spectral imaging (CSI) analysis of new photosensitizer Photosens and its constituent components in A-549 human lung adenocarcinoma cells <i>A. Feofanov, L. Shitova, A. Grichine, I. Kudelina, I. Nazimov, T. Karmakova, R. Yakubovskaya, M. Egret-Charlier and P. Vigny</i>	331

- Estimation of lymphocyte functional activity in gastrointestinal cancer patients (fluorescent method) 339
L. Klimkāne, I. Kalniņa, L. Enģele, I. Jaunalksne, S. Doniņa, G. Zakenfelds and I. Meirovics
- The position of centromeres in interphase nuclei of human leukemic cells during myeloid differentiation and after gamma-irradiation 347
E. Bártová, S. Kozubek, M. Durm, M. Hausmann, M. Kozubek, E. Lukášová, M. Sklaniková, P. Jirsová, A. Cafourková and K. Buchničková
