

Contents

CONJECTURES AND EXPERIMENTS 1

Lecture 1

Experiments with Texts 2

1. Theories and their Structure 2
2. The Notion of 'Text' 4
3. Reason for Applying Quantitative Approach 7
4. The Aim of the Present Work 10

Lecture 2

Context in a Text 16

1. Word Frequency and Sentence 16
2. Observed Data 18
3. Menzerath-Altmann's Law 23
4. Sentence Aggregates 31
5. Communicative Sense of Aggregates 32
6. Aggregates as a Dynamic System 35
7. Menzerath-Altmann's Law and Similarity Dimension 38
8. The Concept of Dimension 39
9. Aggregates and Semantics 41

Lecture 3

Strings of Levels 47

1. The General Formula 48
2. Observed Data 49
3. Glosses to the Observed Data 67
4. The Strings 70
5. Unified Units 80
6. Evaluation of the Results: Phase Transition 82
7. Segmentation 84

Lecture 4

Increasing Text 90

1. A Note on the Criticism of Menzerath-Altmann's Law 91
2. Observed Data 94
3. Menzerath-Altmann's Law and Increasing Text 106
4. The Distribution of Aggregate Length 107

Lecture 5

Sentence Length 121

1. Why Sentence Length 122
2. Different Approaches to Sentence Length 124
3. Statistic Treatment 126
4. Time Series and Persistence 132
5. Intervals of Persistence 138
6. Iterations 141
7. Transitions Between Sentences 143
8. Scale Factor 144

Lecture 6

Word Frequencies 150

1. Location of Word Frequencies 151
2. First and Last Occurrences of Lexical Units 153
3. Word-Frequency Series 155
4. Increasing Word-Frequency Series 161

TEXT AS A LINGUISTIC PARADIGM 165

(Instead of a summary)

1. Trivial and Non-Trivial Properties of Texts 166
2. Segmentation and Interpretation 168
3. Potentiality of Texts 170
4. Linguistic Reductionism 171
5. The Qualities of Aggregates 172
6. Two Text Phases 175
7. Vocabulary of a Text 178
8. Location of Text Items 181
9. Paradoxes 183
10. Text and Chaos 186
11. The Basic Attributes of Integral Text 187
