

# LIST OF CONTENTS

1	INTRODUCTION .....	1
2	OVERVIEW OF ABRASIVES FOR AWJ CUTTING .....	3
2.1	Natural Abrasives.....	4
2.1.1	Native Elements Class.....	4
2.1.2	Carbides .....	6
2.1.3	Oxides Class.....	6
2.1.4	Spinel Group.....	8
2.1.5	Silicate Class.....	11
2.1.5.2	<i>Garnet Group</i> .....	13
2.1.5.3	<i>Olivine Group</i> .....	17
2.1.5.4	<i>Quartz Group</i> .....	21
2.1.6	Phosphates Class.....	22
2.1.6.1	<i>Apatite Group</i> .....	22
2.2	Manufactured Abrasives .....	23
2.2.1	Glass.....	23
2.2.2	Slag .....	23
2.2.3	Silicate Ceramics.....	26
3	DETERMINATION OF PROPERTIES OF ABRASIVE CONCENTRATES FOR AWJ CUTTING AND BLASTING .....	27
3.1	Determination Of Mineralogical Properties Of Abrasive Concentrate .....	27
3.1.1	Mineralogical Analysis .....	27
3.1.2	Content Of Dominant Mineral And Mineralogical Purity.....	27
3.1.3	Grain Size Distribution .....	28
3.1.3.1	<i>Sieving analysis</i> .....	29
3.1.3.2	<i>Sedimentation method</i> .....	30
3.1.3.3	<i>Microscopic measurement of grain sizes</i> .....	30
3.1.4	Shape Of Grains .....	30
3.1.5	Roundness And Angularity Of Grains .....	30
3.1.6	Application Of Microscopic Image Analysis In Determination Of Mineralogical Properties Of Abrasive Concentrate.....	31
3.1.6.1	<i>The three-dimensional grain image</i> .....	31
3.1.6.2	<i>Determination of shape and dimensional features of abrasive grains by image analysis</i> .....	32
3.2	Determination Of Physical Properties Of Abrasive Concentrate .....	33
3.2.1	Density .....	33
3.2.1.1	<i>Specific density</i> .....	33
3.2.1.2	<i>Volumetric density (apparent density)</i> .....	33
3.2.1.3	<i>Repose mass</i> .....	34
3.2.2	Deformation Constants.....	34
3.2.3	Relative Hardness And Microhardness .....	34
3.2.4	Moisture Absorption .....	35
3.3	Determination Of Cutting Efficiency Of Abrasive Concentrate In AWJ Cutting. ....	35
3.3.1	Specification Of Testing Material .....	36
3.3.1.1	<i>Specification of mild steel samples</i> .....	36

3.3.1.2	<i>Specification of granodiorite samples</i> .....	36
3.3.2	Specification Of Abrasive Material.....	37
3.3.3	Testing Procedure .....	37
3.3.4	Evaluation And Interpretation Of Results .....	38
3.3.5	Determination Of Kerf Geometry By Image Analysis.....	40
3.4	Determination Of Wearing Effects Of Abrasive Concentrate On Focusing Tube	41
3.4.1	Testing Procedure .....	41
3.4.2	Evaluation And Interpretation Of Results .....	42
3.5	Determination Of Suitability Of Abrasive Concentrate For Recycling.....	42
3.5.1	Abrasive Grains At The Input Into The AWJ System.....	43
3.5.2	Interaction Of Abrasive Grains During Mixing With Water Jet And Focusing Of The Jet ..	44
3.5.3	Interaction Of Abrasive Grains Downstream From Focusing Tube Outlet.....	44
3.5.4	Interaction of abrasive grains with target material.....	45
3.5.4.1	<i>Interaction of abrasive grains with metal or plastic material</i> .....	45
3.5.4.2	<i>Interaction of abrasive grains with brittle material without oriented cleavage</i> .....	48
3.5.4.3	<i>Interaction of abrasive grains with material consisting of mineral grains</i> .....	48
3.5.5	Recycling Of Abrasive Concentrate From Cutting Slurry .....	50
3.6	Determination of health effects of respirable dust from abrasive concentrate (co-authors V. Škoda and R. Holuša) .....	51
3.6.1	Preparation Of Dust.....	51
3.6.2	Biological Experiment .....	51
3.6.3	Biochemical Analyses.....	52
3.6.4	Histopathology Of The Lung .....	52
3.6.5	Criteria For Classification Of The Level Of Risk Of Respirable Dust Fibrogenity .....	52
3.6.6	Problem Of Carcinogenicity Of Abrasives .....	52

## EVALUATION OF SELECTED ABRASIVE CONCENTRATES FOR AWJ CUTTING AND BLASTING.....54

4.1	Mineralogical and Physical Properties .....	54
4.1.1	Almandine Garnet I Concentrate (India).....	54
4.1.2	Almandine Garnet II Concentrate (Australia) .....	55
4.1.3	Almandine Garnet III Concentrate (Ukraine) .....	56
4.1.4	Olivine Concentrate (Norway).....	58
4.1.5	C-slag Abrasive Concentrate .....	59
4.1.6	Cu-slag Abrasive Concentrate.....	59
4.2	Cutting Efficiency .....	60
4.3	Wearing Effects On Focusing Tube .....	63
4.4	Recycling Of Abrasive Concentrates .....	64
4.5	Health Effects Of Respirable Dust From Abrasive Concentrates .....	64
4.5.1	Mineralogy And Composition Of Evaluated Abrasives.....	64
4.5.2	Results Of Biochemical Analysis.....	65
4.5.3	Conclusions From Biological Tests .....	65
4.5.3.1	<i>Dust from crystalline minerals</i> .....	65
4.5.3.2	<i>Dust from vitreous or amorphous oxide materials</i> .....	66
4.5.3.3	<i>Real dust (mixed dusts from target materials and abrasives)</i> .....	66
4.5.4	Protection Of Workers .....	66

5	CONCLUSION .....	67
5.1	Abrasive Concentrates From New Localities On The Market .....	67
5.1.1	Deposits of garnet almandine in Czech republic .....	67
5.1.2	Deposits of garnet almandine in Ukraine .....	67
5.1.3	Deposits of garnet almandine in Russia .....	67
5.2	Necessity Of Evaluation Of Abrasive Concentrates For AWJ Technology .....	67
5.3	Orientation Of Future Research Of Abrasives For AWJ Technology .....	68
6	GLOSSARY OF MINERALOGICAL TERMS .....	69
7	REFERENCES .....	73
7.1	Other Related Publications .....	77
8	APPENDIX .....	82
