

CONTENTS

Preface	v
G�rard Bourdaud and Winfried Sickel	
Homeomorphisms which act on Besov spaces	1
Viktor I. Burenkov and W. Desmond Evans	
On compact embeddings of Sobolev spaces and extension operators which preserve some smoothness	17
Niels Jacob and Ren� L. Schilling	
Estimates for Feller semigroups generated by pseudodifferential operators	27
Vakhtang Kokilashvili	
New aspects in the weight theory and applications	51
Miroslav Krbe� and Hans-J�rgen Schmeisser	
Extrapolation of reduced Sobolev imbeddings	71
Alois Kufner	
Hardy's inequality and related topics	89
Hans-Gerd Leopold	
Spectral invariance for pseudodifferential operators on function spaces	101
Olli Martio	
The Hardy-Littlewood maximal function and Sobolev spaces on a metric space	113
Juha Berkovits and Vesa Mustonen	
On systems of telegraph equations	125
Carlos P�rez	
Banach function spaces and the two-weight problem for maximal functions	141
Winfried Sickel	
Composition operators acting on Sobolev spaces of fractional order—a survey on sufficient and necessary conditions	159
Galina S. Balashova	
Sobolev spaces of infinite order with rapidly decreasing	183
Alberto de la Torre	
On the adjoint of the maximal function	189
Ji Gao	
Normal structure and modulus of U -convexity in Banach spaces	195

Amiran Gogatishvili	
Weighted inequalities for one-sided maximal function in Orlicz classes	201
Dorothee Haroske	
Entropy numbers in weighted function spaces and applications	207
Desmond J. Harris	
On the approximation numbers of Hardy-type operators	215
Nikolai K. Karapetyants	
On an isomorphism between generalized Hölder spaces implemented by the fractional integration operator	221
Andriy A. Kondratyuk and Svyatoslav I. Tarasyuk	
Compact operators and normal families of subharmonic functions	227
Ondrej Kováčik	
Integrable majorant of the partial sums for multiple Haar series	233
Mircea Malarski	
Regularity properties of the solution to the wave equation in Besov spaces with $p < 1$	239
Klaus Pflüger	
A semilinear elliptic problem in an unbounded domain	245
Thomas Runst	
Boundary value problems with composition-type non-linearities in generalized Sobolev spaces	251
Myroslav M. Sheremeta	
On analytic continuation of power series with the condition on their Gelfond-Leontev derivatives	261
Thomas Schott	
Function spaces of Lizorkin-Triebel type with exponential weights	267
Verdi G. Verdiev	
On one problem of C. Davis	273
List of participants	279
