LIST OF TABLES

Part I

- Table 1:* Distribution of ceramics in relation to the type of feature
Table 2: Distribution of daub in relation to the type of feature
Table 3: Description of specific pottery characteristics used in seriation
Table 4: Seriation table
Table 5: Seriation table
Table 6: Seriation table
Table 7: Seriation table
Table 8: Occurrence of indicators of manufacturing activity in different types of features
Table 9: Distances between huts and so-called sunken structures at Jenštejn

Part II

- Table 1:* Quantification of the number of bone fragments (NISP) within each of the chronological phases
Table 2: Quantification of the number of identified fragments (NISP) within each feature - Eneolithic
Table 3: Quantification of the number of identified fragments (NISP) within each feature - Bronze age
Table 4: Quantification of the number of bone fragments (NISP), the bone weight (W) (given in grammes) and the ean fragment weight (gm) - Hallstatt D/La Tène A
Table 5: Quantification of the number of bone fragments (N), the number of diagnostic zone fragments (DZF), the minimum number of individuals (MNI) (based on the most numerous non-reproducible element with no reconstruction for pairs) and the bone weight (W), given in grammes - Hallstatt D/La Tène A
Table 6: Quantification/Anatomical representation by diagnostic zone fragments (DZF) of domestic species - Hallstatt D/La Tène A
Table 7: Number of occurrences of species across the different features - Hallstatt D/La Tène A
Table 8: Taphonomic condition of the bones - Hallstatt D/La Tène A
Table 9: Fragmentation pattern of the identifiable bone fragments - Hallstatt D/La Tène A
Table 10: Anatomical representation of the major domestic species - Hallstatt D/La Tène A
Table 11: Cattle dental age data - Hallstatt D/La Tène A
Table 12: Cattle epiphyseal fusion - Hallstatt D/La Tène A
Table 13: Sexing data for the major domestic species - Hallstatt D/La Tène A
Table 14: Pig dental age data - Hallstatt D/La Tène A
Table 15: Pig epiphyseal fusion - Hallstatt D/La Tène A
Table 16: Sheep/Goat dental age data - Hallstatt D/La Tène A
Table 17: Sheep/Goat epiphyseal fusion - Hallstatt D/La Tène A
Table 18: Anatomical representation of the wild species - Hallstatt D/La Tène A
Table 19: Quantification of the number of identified fragments (NISP) within each feature - Hallstatt D/La Tène A
Table 20: Quantification of the number of identified fragments (NISP) by type of archaeological feature - Hallstatt D/La Tène A
Table 21: A comparison of the quantification and relative proportions of identifiable animal bone fragments from domesticated and wild animals at late-Hallstatt/early La Tène sites in Bohemia, Moravia and South-West Germany
Table 22: A comparison of the quantification of identifiable animal bone fragments from domesticated animals at late-Hallstatt/early La Tène sites in Bohemia, Moravia and South-West Germany
Table 23: A comparison of the quantification of identifiable animal bone fragments from wild animals at late - Hallstatt/early La Tène sites in Bohemia, Moravia and South-West Germany
Table 24: A comparison of the quantification of identifiable animal bone fragments from wild animals (fishes and birds) at late-Hallstatt/early La Tène sites in Bohemia, Moravia and South-West Germany
