

Table of Contents

I

Desire as Belief II

D. Lewis 3

Is the Necessary the Apriori?

K. Hossack 15

Logic and Covert Epistemology: Russell's Use of Logical Form in 1913

J. Shosky 31

A Philosophical Problem in Martin-Löf's Type Theory

J. Hiipakka 39

Deductive Reasoning and the Fallacy of Begging the Question

P. McGrath 47

Corresponding to What?

P. Kolář 57

Logical Squares: Generalizations and Interpretations

J. Woleński 67

Logic and Ontology

R. Grossmann 77

Anti-realism, Truth-value Links and Tensed Truth Predicates

B. Weiss 85

First-Order Theory Change Systems with Intuitionistic and Dynamic Semantics

O. Lemon 103

On Constructing Complex Numbers in Transparent Intensional Logic

J. Palomäki 125

II

Recantation or Any Old ω-sequence Would Do After All	
<i>P. Benacerraf</i>	129
Proofs and Arguments in Mathematics	
<i>P. Stekeler-Weithofer</i>	137
Logical Versus Heuristic Falsification in Mathematics: the Case against Lakatos	
<i>C.A. Womack</i>	153
Natural Numbers without Addition	
<i>K. Bendová</i>	169
The Fearless and Moderate Revision: Extending Lewis' Triviality Results	
<i>A. Hájek</i>	171
Some Remarks on Philosophical Aspects of the Laws of Large Numbers	
<i>I. Kramosil</i>	179
Logic for Reasoning from Facts	
<i>P. Jirků</i>	199
Causality in Chaotic Environment: Does strong causality break down in deterministic chaos?	
<i>M. Urchs</i>	209
On the Origin of the Species <i>Computer</i> (or Why There Are No Connectionist Calculators)	
<i>S. Munsat</i>	217
Bell's Theorem and Quantum Logic	
<i>Jan Berg</i>	227
The Money Pump as a Game	
<i>T. Childers, O. Majer</i>	233
