

## CONTENTS

A. Bartkowiak, <i>Wroclaw</i> : Clustering of variables – a regressional approach ...	1
G. Bognár, <i>Budapest</i> : On a special character recognition problem .....	11
T. Cacoullos, <i>Athens</i> : Linear discriminant functions under spherical symmetry	20
K. Eben, <i>Prague</i> : A hidden Markov model with autoregressive observations .	34
P. Fl'ak, <i>Nitra</i> : Principal component analysis in the growth processes of animals .....	40
V. Gáfriková, M. Niewiadomska-Bugaj, <i>Warsaw</i> : The theoretical and simulation study of some separation measures based on the Neyman-Pearson curve .....	50
A. Hardy, <i>Namur</i> : New methods for testing the distinctness of clusters .....	59
D. Hirst, I. Ford, <i>Glasgow</i> , F. Critchley, <i>Warwick</i> : An alternative approach to the estimation of error rates in discriminant analysis .....	74
W. Jahn, <i>Leipzig</i> : Selection of optimal subsets for regression analysis and a possibility for the improvement of subset regression .....	92
L. Jaupi, G. Saporta, <i>Paris</i> : Influence in robust principal component analysis	105
T. Kowalczyk, <i>Warsaw</i> : On measuring heterogeneity in $n \times k$ contingency tables .....	111
P. Kratochvíl, F. Zitek, <i>Prague</i> : Factors of problem solving abilities .....	122
M. Křivánek, <i>Prague</i> : Connected admissible hierarchical clustering .....	130
E. Krusińska, <i>Wroclaw</i> : Two stage distance-based model selection in mixed discriminant analysis .....	141
L. Kubáček, <i>Bratislava</i> : Quadratic estimators in models with constraints ...	152
L. Kubáčková, <i>Bratislava</i> : Optimum elimination transformation in replicated linear models .....	158
A. Lešanovský, J. Rataj, <i>Prague</i> : Determination of compact sets in Euclidean spaces by the volume of their dilation .....	165
J. Meulman, <i>Leiden</i> : Principal components models using distances, including weights for variables and dimensions .....	178
H.-J. Mucha, <i>Berlin</i> : Valuation of stability in cluster analysis .....	197
J. Pocięcha, <i>Cracow</i> : Multivariate comparative analysis in demographic research .....	207

P. Pudíl, J. Novovičová, S. Bláha, <i>Prague</i> : Experimental study of the relationship of the error probability to certain separability measures in normal classification .....	221
W. Schaafsma, E. A. van der Meulen, <i>Groningen</i> : Expressing uncertainty about the truth or falsity of statistical hypothesis .....	233
Z. Šidák, <i>Prague</i> : Nonparametric discrimination of response curves and discrimination of permutations .....	243
M. V. Stefănescu, <i>Bucharest</i> : Some fundamental aspects of hierarchical classification theory .....	251
V. K. Todorov, N. M. Neykov, P. N. Neytchev, <i>Sofia</i> : A program for computation of robust covariance .....	259
V. K. Todorov, D. L. Vandev, <i>Sofia</i> : Discriminant analysis in MSTAT-16 ..	265
