\* In this paper, most of the recent data were drawn from the international comparative survey on "Social Stratification and Circulation of Elites in the Eastern Europe after 1989" (1993) coordinated by UCLA and sponsored by the U. S. National Science Foundation (USA) and NWO (Netherlands). The Grant Agency of the Academy of Sciences, Czech Republic gave partial support to the above survey, as well as to another survey on beliefs and behavior in the Czech and Slovak Republics in the framework of a grant for the research on "Social Stratification and Dynamics of the Post-Communist Transformation in the Czech and Slovak Republics". Both these surveys were further sponsored by a grant of the Czech Ministry of Labour and Social Affairs. The authors express their thanks to all institutions which gave their support.
