

TABLE OF CONTENTS

Preface	iii
Acknowledgements	v
Summary	xi
Souhrn	xiii
 1 INTRODUCTION	 1
1.1 THESIS SCOPE	2
 2 THEORY	 3
2.1 ADVANCED OXIDATION PROCESSES	3
2.1.1 Ultraviolet photolysis	3
2.1.2 Ozone oxidation	3
2.1.3 Hydrogen peroxide oxidation	4
2.1.4 TiO ₂ photocatalysis	5
2.1.5 Electrochemical oxidation	6
2.1.6 Wet oxidation	7
2.1.7 Ultrasonic irradiation	7
2.1.8 Radiolysis of water	8
2.2 ELECTRICAL DISCHARGES IN WATER	8
2.2.1 Types of electrical discharges for water treatment	8
2.2.1.1 Underwater electrical discharges	9
2.2.1.2 Electrical discharges above the water surface	11
2.2.2 Initiation and propagation of pulsed electrical discharges in water	12
2.2.3 Processes initiated by pulsed electrical discharges in water	13
2.2.3.1 Physical processes	13
2.2.3.2 Chemical processes	14
2.2.3.2.1 Production of chemical reactants	14
2.2.3.2.2 Reaction mechanism	15
2.3 OH· RADICAL REACTIONS	16
2.3.1 Types of OH· radical reactions	16
2.3.2 Rate-law for OH· radical reactions	17
2.3.3 Rate constants and competition for OH· radical reactions	18

3 EXPERIMENTAL	21
3.1 MATERIALS	21
3.2 EXPERIMENTAL SETUP	22
3.3 EXPERIMENTAL PROCEDURES	25
3.3.1 Pulsed corona discharge procedures	25
3.3.2 Fenton's process procedures	25
3.3.3 Preparation of 2,4-dinitrophenylhydrazones	25
3.4 ANALYTICAL METHODS	26
3.4.1 Liquid chromatography	26
3.4.1.1 HPLC Method 1 - Analysis of reaction mixture of phenol	26
3.4.1.2 HPLC Method 2 - Analysis of reaction mixture of monochlorophenols	27
3.4.1.3 HPLC Method 3 - Analysis of 2,4-DNP-hydrazones	30
3.4.2 Gas chromatography/Mass spectrometry	30
3.4.3 Total organic carbon	31
3.4.4 UV/VIS spectrometry	31
3.4.4.1 Determination of hydrogen peroxide	31
3.4.4.2 Determination of iron	32
3.4.5 Potassium ferrioxalate actinometry	32
3.4.6 Determination of dissolved oxygen	33
3.4.7 Determination of chlorides	33
3.5 COMPUTING METHODS	34
3.5.1 Determination of energy input	34
3.5.2 Determination of removal efficiency	34
3.5.3 Determination of efficiency of H ₂ O ₂ production	35
4 RESULTS AND DISCUSSION	37
4.1 GENERATION OF UV LIGHT BY THE PULSED CORONA DISCHARGE	37
4.1.1 Determination of $\Phi_{200-300}$	37
4.1.2 Effect of the solution conductivity on $\Phi_{200-300}$	39
4.1.3 Effect of the voltage polarity on $\Phi_{200-300}$	42
Summary of Section 4.1	42
4.2 GENERATION OF HYDROGEN PEROXIDE BY THE PULSED CORONA DISCHARGE	43
4.2.1 Determination of $k_{H_2O_2}$	43
4.2.2 Effect of the applied power parameters on H ₂ O ₂ production	44
4.2.3 Effect of the solution composition on H ₂ O ₂ production	46
4.2.4 Effect of the solution conductivity on H ₂ O ₂ production	47
4.2.5 Effect of voltage polarity on H ₂ O ₂ production	48

4.2.6 Effect of UV light emitted by the discharge on H_2O_2 production	49
4.2.7 Effect of H_2 and O_2 on H_2O_2 production.....	52
Summary of Section 4.2.....	54
4.3 DEGRADATION OF PHENOL BY THE PULSED CORONA DISCHARGE.....	55
4.3.1 Dependence of phenol removal on conditions in the corona discharge reactor	55
4.3.2 Formation of phenol degradation byproducts	56
4.3.2.1 Formation of aromatic byproducts	56
4.3.2.2 Formation of aliphatic byproducts	60
4.3.2.2.1 Formation of organic acids.....	62
4.3.2.2.2 Formation of carbonyl compounds	64
4.3.3 Effect of pH on degradation of phenol.....	67
4.3.4 Effect of iron on degradation of phenol	69
4.3.4.1 Effect of iron state	70
4.3.4.2 Effect of iron concentration	71
4.3.4.3 Distribution of iron ionic forms during phenol degradation	72
4.3.5 Effect of solution conductivity on degradation of phenol.....	74
4.3.6 Effect of voltage polarity on degradation of phenol	76
Summary of Section 4.3.....	77
4.4 DEGRADATION OF MONOCHLOROPHENOLS BY THE PULSED CORONA DISCHARGE	78
4.4.1 Degradation of 2-chlorophenol	78
4.4.2 Degradation of 3-chlorophenol	79
4.4.3 Degradation of 4-chlorophenol	80
4.4.4 Mechanism of degradation of monochlorophenols by the pulsed corona discharge	82
4.4.5 Effect of chlorine atom position on degradation of monochlorophenols.....	84
Summary of Section 4.4.....	87
4.5 COMPARISON BETWEEN PULSED CORONA DISCHARGE AND FENTON'S PROCESS	88
4.5.1 Degradation of phenols by Fenton's system.....	88
4.5.2 Comparison of the specific dose of H_2O_2	90
4.5.3 Comparison of estimated operating costs	92
Summary of Section 4.5.....	93
5 CONCLUSIONS.....	95
5.1 PULSED CORONA DISCHARGE IN WATER.....	95
5.2 OXIDATION OF MODEL COMPOUNDS	96
5.3 OUTLOOK	97
REFERENCES	99

Appendix 1	Ionic conductivity and mobility in water.....	111
Appendix 2	Reactions in pure water treated by the pulsed corona discharge.....	112
Appendix 3	Rate constant for reaction of e_{aq}^- , $H\cdot$ and $OH\cdot$ radicals	113
Appendix 4	List of symbols and abbreviations	114
Curriculum Vitae		117
