Preface	7
Audience for This Book.....	8
What's Not in This Book That You May Expect to Find	8
Book Organization	9
About the Author	10
1: The Calculator	11
The Machine and Its Language.....	12
Red: Operations	12
Blue: Memory.....	12
Purple: Registers.....	13
Black and White: Constants.....	13
Op-codes.....	14
Memory	15
Assembly Language.....	18
Green: Comments	19
Yellow: Decisions.....	20
Orange: Directives and Macros	21
In Case It Matters.....	21
Documentation.....	22
Summary of Color Codes	26
2: Compile, Link, Execute	27
Simple First Program.....	27
Language Interpreter and Compiler	29
Large Programs.....	35
Multiplying and Dividing by Shifting.....	124
Converting Digits into a Number.....	125
Negative Binary Numbers.....	126

3: User Interface	37
Linux Services	37
Read and Write	40
Program Loops.....	41
Current Program Status Register (CPSR)	43
Nested Loops	44
4: Subroutines & Macros	47
Subroutines	47
Efficiency vs. Maintenance.....	51
Registers R13, R14, R15.....	51
Program Counter (PC)	52
Link Register (LR).....	52
Stack Pointer (SP) Register.....	52
Macros	54
5: Binary & Hexadecimal	57
Loop Through 8 Binary Digits (Bits).....	58
Bit Shift Operations	60
Logical Operations.....	61
Hexadecimal Display	65
6: ARM Machine Code	69
Advanced RISC Machine (ARM).....	69
Fetch, Decode, Execute	71
Thumb Machine Code	71
ARM Machine Code.....	73
AND R1,R4,R3,LSR R6.....	78

7: Memory Access	83
Bits, Bytes, Words	83
Arrays, Tables, Vectors, Matrices.....	84
Base Registers.....	85
Indexed Addressing	85
Display in Any Base	86
STRB R2,[R4,#1]!	87
Case Conversion Example	92
Store and Load Multiple Registers	96
8: NEON	101
Scalars and Vectors.....	104
Lanes.....	105
Saturation Integer Arithmetic	108
Promotions to Wide Lanes.....	109
Floating point.....	116
Conclusion	117
A: Raspberry Pi Setup	119
GNU Assembler.....	119
The Hash Symbol (#).....	119
Source Code.....	120
BeagleBone Black	120
B: Binary Numbers	121
What's Binary?	121
Why Binary?.....	121
The Problems with Binary	122
Superscripts and Subscripts	123
Conversion to Any Base	123
Multiplying and Dividing by Shifting.....	124
Converting Digits into a Number.....	125
Negative Binary Numbers	126

C: Hexadecimal Numbers	129
Why Use Hexadecimal?.....	129
D: ASCII	131
What is a Character Code	131
E: Text Editors	135
Program Source Code	135
Leafpad Editor	136
Nano Editor.....	139
vi Editor	141
F: List of Instructions	143
G: Linux Service Calls	145
Service 1: Terminate program	145
Service 3: Read data from I/O device into memory buffer	146
Service 4: Write data from memory buffer to I/O device	146
H: C Programming	147
AAPCS Subroutine Interface	150
Java, C++, C#	150
Index	151
