<i>List of contributors</i>	vii
1 Towards a new age of research methods in public administration, public management and public policy <i>Eran Vigoda-Gadot and Dana R. Vashdi</i>	1
PART I QUANTITATIVE AND MIXED METHODS	
2 Analysing relationships between multiple variables: applications for public administration, policy and management <i>Dana R. Vashdi and Eran Vigoda-Gadot</i>	13
3 Mixed methods in public administration: advantages and challenges <i>Paolo Belardinelli and Valentina Mele</i>	28
4 Agent-based modeling as a tool for public management research <i>Fabian Homberg, Davide Secchi and Dinuka B. Herath</i>	42
5 Hybridizing agent-based with system dynamics models: principles for theory development in public policy and management research <i>Lisa Christen Gajary</i>	63
6 Measurement of public values that do not involve money <i>Jonathan Baron</i>	88
7 Theory building in public administration: utilizing factor analysis in the development of analytical constructs <i>Kalu N. Kalu</i>	107
8 The use of difference-in-differences (DiD) in public administration research <i>Yaniv Reingewertz</i>	127
PART II QUALITATIVE AND COMPARATIVE METHODS	
9 Qualitative research approaches: application in a UK public administration context <i>Ruth Plume, Alan Page and Hemda Garelick</i>	139
10 Comparative methods A: exploring big comparative questions in public administration <i>Evan Berman and Don-Yun Chen</i>	161
11 Comparative methods B: comparative methods in public administration – the value of looking around <i>Sabine Kuhlmann and Markus Seyfried</i>	181

12	Comparative methods C: building a cross-national research project <i>Mary E. Guy and Seung-Bum Yang</i>	197
PART III EXPERIMENTAL METHODS		
13	Experimental methods A: survey experiments in public administration <i>B. Guy Peters and João V. Guedes-Neto</i>	218
14	Experimental methods B: laboratory experiments <i>Robin Bouwman</i>	234
PART IV PROGRAM EVALUATION, POLICY AND NETWORK ANALYSIS		
15	Program evaluation A: program evaluation in action – traditional and innovative approaches <i>Huey T. Chen</i>	254
16	Program evaluation B: evaluation, big data, and artificial intelligence: two sides of one coin <i>Frans L. Leeuw</i>	277
17	Policy analysis: evaluating big stories <i>Shlomo Mizrahi</i>	298
18	Introduction to social network analysis methods <i>Pamela A. Mischen</i>	314
PART V BIG DATA AND ADVANCED METHODS		
19	Advanced methods and big data <i>Donald F. Kettl</i>	337
20	Dealing with open data: measuring the performance of public higher education institutions using open government data <i>Vanessa Hernandes Oliveira de Oliveira and Róberson Macedo de Oliveira</i>	353
PART VI ETHICS, OUTLIERS AND REPORTING		
21	Ethical considerations in public administration research <i>Richard W. Schwester</i>	365
22	Finding gold in the dross: outliers as a resource for policy analysis <i>Anat Gofen and David L. Weimer</i>	377
23	Constructive ending: how to finalize the conclusion and discussion of a research project and a journal article <i>Alexey G. Barabashev</i>	395
