About the Authors xiv

Preface xv

## 1 Matter: Its Properties and Measurement 1

- 1-1 The Scientific Method 2
- 1-2 Properties of Matter 4
- 1-3 Classification of Matter 5
- 1-4 Measurement of Matter: SI (Metric) Units 8
- 1-5 Density and Percent Composition: Their Use in Problem Solving 13
- 1-6 Uncertainties in Scientific Measurements 18
- 1-7 Significant Figures 19
- Summary 23
- Exercises 26
- Feature Problems 31
- Integrative Example 24
- Integrative and Advanced Exercises 29
- Self-Assessment Exercises 32

## 2 Atoms and the Atomic Theory 34

- 2-1 Early Chemical Discoveries and the Atomic Theory 35
- 2-2 Electrons and Other Discoveries in Atomic Physics 38
- 2-3 The Nuclear Atom 42
- 2-4 Chemical Elements 44
- 2-5 Atomic Mass 48
- 2-6 Introduction to the Periodic Table 51
- 2-7 The Concept of the Mole and the Avogadro Constant 54
- 2-8 Using the Mole Concept in Calculations 56
- Summary 59
- Exercises 60
- Feature Problems 65
- Integrative Example 59
- Integrative and Advanced Exercises 64
- Self-Assessment Exercises 66

## 3 Chemical Compounds 68

- 3-1 Types of Chemical Compounds and Their Formulas 69
- 3-2 The Mole Concept and Chemical Compounds 73
- 3-3 Composition of Chemical Compounds 76
- 3-4 Oxidation States: A Useful Tool in Describing Chemical Compounds 84
- 3-5 Naming Compounds: Organic and Inorganic Compounds 86
- 3-6 Names and Formulas of Inorganic Compounds 87
- 3-7 Names and Formulas of Organic Compounds 94
- Summary 100
- Exercises 103
- Feature Problems 108
- Integrative Example 101
- Integrative and Advanced Exercises 107
- Self-Assessment Exercises 110

## 4 Chemical Reactions 111

- 4-1 Chemical Reactions and Chemical Equations 112
- 4-2 Chemical Equations and Stoichiometry 116
- 4-3 Chemical Reactions in Solution 123
- 4-4 Determining the Limiting Reactant 129
- 4-5 Other Practical Matters in Reaction Stoichiometry 132
- Summary 138
- Exercises 140
- Self-Assessment Exercises 149
- Integrative Example 139
- Feature Problems 148

## 5 Introduction to Reactions in Aqueous Solutions 151

- 5-1 The Nature of Aqueous Solutions 152  
 5-2 Precipitation Reactions 156  
 5-3 Acid–Base Reactions 160  
 5-4 Oxidation–Reduction Reactions: Some General Principles 165  
 5-5 Balancing Oxidation–Reduction Equations 170  
 5-6 Oxidizing and Reducing Agents 175  
 5-7 Stoichiometry of Reactions in Aqueous Solutions: Titrations 177  
 Summary 181 Integrative Example 182  
 Exercises 183 Integrative and Advanced Exercises 187  
 Feature Problems 189 Self-Assessment Exercises 191

## 6 Gases 192

- 6-1 Properties of Gases: Gas Pressure 193  
 6-2 The Simple Gas Laws 198  
 6-3 Combining the Gas Laws: The Ideal Gas Equation and the General Gas Equation 204  
 6-4 Applications of the Ideal Gas Equation 207  
 6-5 Gases in Chemical Reactions 210  
 6-6 Mixtures of Gases 212  
 6-7 Kinetic-Molecular Theory of Gases 216  
 6-8 Gas Properties Relating to the Kinetic-Molecular Theory 223  
 6-9 Nonideal (Real) Gases 226  
 Summary 229 Integrative Example 230  
 Exercises 231 Integrative and Advanced Exercises 236  
 Feature Problems 238 Self-Assessment Exercises 240

## 7 Thermochemistry 241

- 7-1 Getting Started: Some Terminology 242  
 7-2 Heat 244  
 7-3 Heats of Reaction and Calorimetry 248  
 7-4 Work 252  
 7-5 The First Law of Thermodynamics 255  
 7-6 Heats of Reaction:  $\Delta U$  and  $\Delta H$  259  
 7-7 Indirect Determination of  $\Delta H$ : Hess's Law 266  
 7-8 Standard Enthalpies of Formation 268  
 7-9 Fuels as Sources of Energy 275  
 Summary 281 Integrative Example 282  
 Exercises 283 Integrative and Advanced Exercises 289  
 Feature Problems 291 Self-Assessment Exercises 292

## 8 Electrons in Atoms 294

- 8-1 Electromagnetic Radiation 295  
 8-2 Atomic Spectra 300  
 8-3 Quantum Theory 302  
 8-4 The Bohr Atom 307  
 8-5 Two Ideas Leading to a New Quantum Mechanics 313  
 8-6 Wave Mechanics 317  
 8-7 Quantum Numbers and Electron Orbitals 324  
 8-8 Interpreting and Representing the Orbitals of the Hydrogen Atom 327  
 8-9 Electron Spin: A Fourth Quantum Number 333  
 8-10 Multielectron Atoms 336

- 8-11 Electron Configurations 339  
 8-12 Electron Configurations and the Periodic Table 344  
     Summary 348                      Integrative Example 349  
     Exercises 351                      Integrative and Advanced Exercises 357  
     Feature Problems 358              Self-Assessment Exercises 359

## 9 The Periodic Table and Some Atomic Properties 360

- 9-1 Classifying the Elements: The Periodic Law and the Periodic Table 361  
 9-2 Metals and Nonmetals and Their Ions 364  
 9-3 Sizes of Atoms and Ions 367  
 9-4 Ionization Energy 374  
 9-5 Electron Affinity 378  
 9-6 Magnetic Properties 379  
 9-7 Periodic Properties of the Elements 381  
     Summary 386                      Integrative Example 386  
     Exercises 389                      Integrative and Advanced Exercises 391  
     Feature Problems 392              Self-Assessment Exercises 393

## 10 Chemical Bonding I: Basic Concepts 395

- 10-1 Lewis Theory: An Overview 396  
 10-2 Covalent Bonding: An Introduction 399  
 10-3 Polar Covalent Bonds and Electrostatic Potential Maps 402  
 10-4 Writing Lewis Structures 408  
 10-5 Resonance 416  
 10-6 Exceptions to the Octet Rule 418  
 10-7 Shapes of Molecules 421  
 10-8 Bond Order and Bond Lengths 433  
 10-9 Bond Energies 434  
     Summary 438                      Integrative Example 439  
     Exercises 440                      Integrative and Advanced Exercises 446  
     Feature Problems 447              Self-Assessment Exercises 448

## 11 Chemical Bonding II: Additional Aspects 449

- 11-1 What a Bonding Theory Should Do 450  
 11-2 Introduction to the Valence-Bond Method 451  
 11-3 Hybridization of Atomic Orbitals 453  
 11-4 Multiple Covalent Bonds 461  
 11-5 Molecular Orbital Theory 465  
 11-6 Delocalized Electrons: Bonding in the Benzene Molecule 474  
 11-7 Bonding in Metals 480  
 11-8 Some Unresolved Issues: Can Electron Charge-Density Plots Help? 484  
     Summary 489                      Integrative Example 489  
     Exercises 491                      Integrative and Advanced Exercises 494  
     Feature Problems 495              Self-Assessment Exercises 497

## 12 Intermolecular Forces: Liquids and Solids 498

- 12-1 Intermolecular Forces 499  
 12-2 Some Properties of Liquids 508  
 12-3 Some Properties of Solids 520  
 12-4 Phase Diagrams 522  
 12-5 Network Covalent Solids and Ionic Solids 526

12-6	Crystal Structures	530		
12-7	Energy Changes in the Formation of Ionic Crystals	542		
	Summary	545	Integrative Example	546
	Exercises	547	Integrative and Advanced Exercises	552
	Feature Problems	554	Self-Assessment Exercises	556

## 13 Solutions and Their Physical Properties 557

13-1	Types of Solutions: Some Terminology	558		
13-2	Solution Concentration	558		
13-3	Intermolecular Forces and the Solution Process	562		
13-4	Solution Formation and Equilibrium	567		
13-5	Solubilities of Gases	570		
13-6	Vapor Pressures of Solutions	573		
13-7	Osmotic Pressure	577		
13-8	Freezing-Point Depression and Boiling-Point Elevation of Nonelectrolyte Solutions	581		
13-9	Solutions of Electrolytes	584		
13-10	Colloidal Mixtures	587		
	Summary	590	Integrative Example	591
	Exercises	592	Integrative and Advanced Exercises	597
	Feature Problems	599	Self-Assessment Exercises	600

## 14 Chemical Kinetics 602

14-1	The Rate of a Chemical Reaction	603		
14-2	Measuring Reaction Rates	605		
14-3	Effect of Concentration on Reaction Rates: The Rate Law	608		
14-4	Zero-Order Reactions	611		
14-5	First-Order Reactions	612		
14-6	Second-Order Reactions	619		
14-7	Reaction Kinetics: A Summary	620		
14-8	Theoretical Models for Chemical Kinetics	622		
14-9	The Effect of Temperature on Reaction Rates	626		
14-10	Reaction Mechanisms	629		
14-11	Catalysis	637		
	Summary	642	Integrative Example	643
	Exercises	645	Integrative and Advanced Exercises	650
	Feature Problems	652	Self-Assessment Exercises	654

## 15 Principles of Chemical Equilibrium 665

15-1	Dynamic Equilibrium	656		
15-2	The Equilibrium Constant Expression	656		
15-3	Relationships Involving Equilibrium Constants	663		
15-4	The Magnitude of an Equilibrium Constant	669		
15-5	The Reaction Quotient, $Q$ : Predicting the Direction of Net Change	670		
15-6	Altering Equilibrium Conditions: Le Châtelier's Principle	673		
15-7	Equilibrium Calculations: Some Illustrative Examples	679		
	Summary	686	Integrative Example	686
	Exercises	688	Integrative and Advanced Exercises	693
	Feature Problems	694	Self-Assessment Exercises	695

<b>16</b>	<b>Acids and Bases</b>	<b>697</b>	
16-1	Arrhenius Theory: A Brief Review	698	
16-2	Brønsted–Lowry Theory of Acids and Bases	698	
16-3	Self-Ionization of Water and the pH Scale	703	
16-4	Strong Acids and Strong Bases	706	
16-5	Weak Acids and Weak Bases	708	
16-6	Polyprotic Acids	717	
16-7	Ions as Acids and Bases	723	
16-8	Molecular Structure and Acid–Base Behavior	727	
16-9	Lewis Acids and Bases	732	
	Summary	736	Integrative Example 736
	Exercises	738	Integrative and Advanced Exercises 742
	Feature Problems	743	Self-Assessment Exercises 744
<b>17</b>	<b>Additional Aspects of Acid–Base Equilibria</b>	<b>745</b>	
17-1	Common-Ion Effect in Acid–Base Equilibria	746	
17-2	Buffer Solutions	750	
17-3	Acid–Base Indicators	759	
17-4	Neutralization Reactions and Titration Curves	762	
17-5	Solutions of Salts of Polyprotic Acids	770	
17-6	Acid–Base Equilibrium Calculations: A Summary	771	
	Summary	773	Integrative Example 773
	Exercises	775	Integrative and Advanced Exercises 779
	Feature Problems	782	Self-Assessment Exercises 783
<b>18</b>	<b>Solubility and Complex-Ion Equilibria</b>	<b>784</b>	
18-1	Solubility Product Constant, $K_{sp}$	785	
18-2	Relationship Between Solubility and $K_{sp}$	786	
18-3	Common-Ion Effect in Solubility Equilibria	788	
18-4	Limitations of the $K_{sp}$ Concept	790	
18-5	Criteria for Precipitation and Its Completeness	792	
18-6	Fractional Precipitation	795	
18-7	Solubility and pH	797	
18-8	Equilibria Involving Complex Ions	799	
18-9	Qualitative Cation Analysis	805	
	Summary	810	Integrative Example 810
	Exercises	812	Integrative and Advanced Exercises 815
	Feature Problems	816	Self-Assessment Exercises 817
<b>19</b>	<b>Spontaneous Change: Entropy and Gibbs Energy</b>	<b>819</b>	
19-1	Spontaneity: The Meaning of Spontaneous Change	820	
19-2	The Concept of Entropy	821	
19-3	Evaluating Entropy and Entropy Changes	827	
19-4	Criteria for Spontaneous Change: The Second Law of Thermodynamics	832	
19-5	Standard Gibbs Energy Change, $\Delta G^\circ$	836	
19-6	Gibbs Energy Change and Equilibrium	837	
19-7	$\Delta G^\circ$ and $K$ as Functions of Temperature	848	
19-8	Coupled Reactions	851	
	Summary	852	Integrative Example 853
	Exercises	854	Integrative and Advanced Exercises 858
	Feature Problems	860	Self-Assessment Exercises 861

<b>20</b>	<b>Electrochemistry</b>	<b>863</b>
20-1	Electrode Potentials and Their Measurement	864
20-2	Standard Electrode Potentials	869
20-3	$E_{\text{cell}}$ , $\Delta G$ , and $K$	874
20-4	$E_{\text{cell}}$ as a Function of Concentrations	880
20-5	Batteries: Producing Electricity Through Chemical Reactions	888
20-6	Corrosion: Unwanted Voltaic Cells	894
20-7	Electrolysis: Causing Nonspontaneous Reactions to Occur	896
20-8	Industrial Electrolysis Processes	900
	Summary	904
	Exercises	907
	Feature Problems	914
	Integrative Example	905
	Integrative and Advanced Exercises	912
	Self-Assessment Exercises	915
<b>21</b>	<b>Chemistry of the Main-Group Elements I: Groups 1, 2, 13, and 14</b>	<b>917</b>
21-1	Periodic Trends and Charge Density	918
21-2	Group 1: The Alkali Metals	920
21-3	Group 2: The Alkaline Earth Metals	933
21-4	Group 13: The Boron Family	941
21-5	Group 14: The Carbon Family	951
	Summary	968
	Exercises	970
	Feature Problems	974
	Integrative Example	969
	Integrative and Advanced Exercises	972
	Self-Assessment Exercises	974
<b>22</b>	<b>Chemistry of the Main-Group Elements II: Groups 18, 17, 16, 15, and Hydrogen</b>	<b>976</b>
22-1	Periodic Trends in Bonding	977
22-2	Group 18: The Noble Gases	979
22-3	Group 17: The Halogens	985
22-4	Group 16: The Oxygen Family	994
22-5	Group 15: The Nitrogen Family	1004
22-6	Hydrogen: A Unique Element	1017
	Summary	1021
	Exercises	1023
	Feature Problems	1028
	Integrative Example	1022
	Integrative and Advanced Exercises	1026
	Self-Assessment Exercises	1029
<b>23</b>	<b>The Transition Elements</b>	<b>1031</b>
23-1	General Properties	1032
23-2	Principles of Extractive Metallurgy	1037
23-3	Metallurgy of Iron and Steel	1044
23-4	First-Row Transition Metal Elements: Scandium to Manganese	1046
23-5	The Iron Triad: Iron, Cobalt, and Nickel	1052
23-6	Group 11: Copper, Silver, and Gold	1054
23-7	Group 12: Zinc, Cadmium, and Mercury	1056
23-8	Lanthanides	1059
23-9	High-Temperature Superconductors	1059
	Summary	1062
	Exercises	1063
	Feature Problems	1067
	Integrative Example	1062
	Integrative and Advanced Exercises	1066
	Self-Assessment Exercises	1068

## 24 Complex Ions and Coordination Compounds 1069

- 24-1 Werner's Theory of Coordination Compounds: An Overview 1070
- 24-2 Ligands 1072
- 24-3 Nomenclature 1075
- 24-4 Isomerism 1076
- 24-5 Bonding in Complex Ions: Crystal Field Theory 1083
- 24-6 Magnetic Properties of Coordination Compounds and Crystal Field Theory 1088
- 24-7 Color and the Colors of Complexes 1090
- 24-8 Aspects of Complex-Ion Equilibria 1093
- 24-9 Acid-Base Reactions of Complex Ions 1095
- 24-10 Some Kinetic Considerations 1096
- 24-11 Applications of Coordination Chemistry 1097
  - Summary 1102                      Integrative Example 1103
  - Exercises 1104                      Integrative and Advanced Exercises 1106
  - Feature Problems 1108              Self-Assessment Exercises 1109

## 25 Nuclear Chemistry 1111

- 25-1 Radioactivity 1112
- 25-2 Naturally Occurring Radioactive Isotopes 1115
- 25-3 Nuclear Reactions and Artificially Induced Radioactivity 1117
- 25-4 Transuranium Elements 1118
- 25-5 Rate of Radioactive Decay 1119
- 25-6 Energetics of Nuclear Reactions 1125
- 25-7 Nuclear Stability 1128
- 25-8 Nuclear Fission 1130
- 25-9 Nuclear Fusion 1133
- 25-10 Effect of Radiation on Matter 1134
- 25-11 Applications of Radioisotopes 1137
  - Summary 1139                      Integrative Example 1140
  - Exercises 1141                      Integrative and Advanced Exercises 1144
  - Feature Problems 1145              Self-Assessment Exercises 1146

## 26 Structures of Organic Compounds 1147

- 26-1 Organic Compounds and Structures: An Overview 1148
- 26-2 Alkanes 1155
- 26-3 Cycloalkanes 1161
- 26-4 Stereoisomerism in Organic Compounds 1168
- 26-5 Alkenes and Alkynes 1175
- 26-6 Aromatic Hydrocarbons 1179
- 26-7 Organic Compounds Containing Functional Groups 1181
- 26-8 From Molecular Formula to Molecular Structure 1192
  - Summary 1195                      Integrative Example 1197
  - Exercises 1198                      Integrative and Advanced Exercises 1204
  - Feature Problem 1205              Self-Assessment Exercises 1207

## 27 Reactions of Organic Compounds 1208

- 27-1 Organic Reactions: An Introduction 1209
- 27-2 Introduction to Nucleophilic Substitution Reactions 1211
- 27-3 Introduction to Elimination Reactions 1225
- 27-4 Reactions of Alcohols 1234
- 27-5 Introduction to Addition Reactions: Reactions of Alkenes 1239
- 27-6 Electrophilic Aromatic Substitution 1244

27-7	Reactions of Alkanes	1248
27-8	Polymers and Polymerization Reactions	1250
27-9	Synthesis of Organic Compounds	1254
	Summary	1256
	Exercises	1259
	Feature Problem	1264
	Integrative Example	1257
	Integrative and Advanced Exercises	1263
	Self-Assessment Exercises	1265

## 28 Chemistry of the Living State 1266

28-1	Chemical Structure of Living Matter: An Overview	1267
28-2	Lipids	1268
28-3	Carbohydrates	1271
28-4	Proteins	1279
28-5	Aspects of Metabolism	1286
28-6	Nucleic Acids	1292
	Summary	1295
	Exercises	1297
	Feature Problems	1301
	Integrative Example	1296
	Integrative and Advanced Exercises	1300
	Self-Assessment Exercises	1302

## APPENDICES

A	Mathematical Operations	A1
B	Some Basic Physical Concepts	A11
C	SI Units	A15
D	Data Tables	A17
E	Concept Maps	A37
F	Glossary	A39
G	Answers to Concept Assessment Questions	A55
