

*Contents:*

**Case study on groundwater flooding: the lower part of the Rye Island**

Michaela Červeňanská, Dana Baroková, Andrej Šoltész .....7

**Impact of variable intensity of hydropeaking on river morphodynamics**

Daniel Buček, Peter Šulek, Peter Dušička, Martin Orfánus..... 12

**Using a combined 1D and 2D hydrodynamic model to simulate the flood of Bratislava**

Martin Orfánus, Jerguš Baďura ..... 18

**Physical Modeling of Energy Dissipation Downstream the Hričov Weir**

Martin Pavůček, Ján Rumann.....25

**Assessment of the dry periods on the small stream in the western part of Slovakia**

Andrej Šoltész, Lea Čubanová, Jakub Mydla .....31

**Selected reasons of the watercourse revitalization (comparison with dams – for example Hulin)**

Miloslav Šlezingr .....37
