MAIN SESSION 4: Foundations in urban areas  
SÉANCE PLÉNIÈRE 4: Fondations en zones urbaines

Utilisation of geothermal energy using earthcoupled structures – theoretical and experimental investigations, case histories <i>Adam D. &amp; Markiewicz R.</i>	3
On the impact of groundwater lowering on existing buildings <i>Achmus M. &amp; Kaiser J.</i>	11
Ground water lowering in loessial collapsible soils <i>Andrei S. &amp; Dumitrescu V.</i>	17
Reinforcement systems in construction of open pit Zagrad in Rijeka, Croatia <i>Arbanas Ž., Jardas B. &amp; Kovačević M.S.</i>	23
Reconstruction of La Fenice theatre in Venice. Foundation problems <i>Balossi Restelli A., Tornaghi R., Pettinaroli A. &amp; Rovetto E.</i>	29
The influence of the technology of construction on the stressed-deformed state of the system “construction-foundation” <i>Bartolomey A.A. &amp; Bartolomey L.A.</i>	35
ULS and SLS design of embedded walls according to Eurocode 7 <i>Bauduin C., De Vos M. &amp; Frank R.</i>	41
Deep basement design for man-made ground water profiles <i>Beadman D. &amp; Stephenson P.</i>	47
Jet grouting – range of the grouting jet <i>Bergschneider B. &amp; Walz B.</i>	53
La réduction des déplacements latéraux du sol au voisinage d'un remblai sur pieux : une étude paramétrique en vraie grandeur <i>Borel S., Reiffsteck Ph. &amp; Bourgeois E.</i>	57
Underpinning and support of a façade wall and former graveyard <i>Boudik Z., Čuda R. &amp; Kubeš J.</i>	65
Specialist foundation construction for deep open excavations in Berlin <i>Brunner W.G. &amp; Gollub P.</i>	71
New quality standards in the construction of jet grouted slabs <i>Buder S. &amp; Schrader D.</i>	77
Observed settlements of footings on São Paulo tertiary soils, Brazil <i>Castello R.R. &amp; Bicalho K.V.</i>	81
Design and control parameters for Jet Grouting <i>Celma J.J. &amp; Carrión M.A.</i>	87
Influence of a deep excavation in Bucharest downtown on the nearby environment behavior <i>Chirica A., Enescu C. &amp; Ungureanu N.</i>	93
Numerical evaluation of deep foundations in a tropical soil of Brazil <i>Cunha R.P., Kuklik P. &amp; Laurin J.</i>	99

Étude des massifs de fondation reposant sur sols traités par colonnes ballastées et soumis à des efforts de renversement <i>Dhouib A., Stoehr B. &amp; Deryckere N.</i>	105
Numerical analysis of a deep basement excavation next to an existing tunnel <i>Dou H.</i>	111
Portance des semelles en bord de talus <i>Droniuc N. &amp; Magnan J.P.</i>	119
Comportement observé d'une paroi moulée en milieu urbain <i>Duca V., Delattre L., Reiffsteck Ph. &amp; Magnan J.P.</i>	127
Mouvements induits par le creusement de tunnel à faible profondeur : interaction avec un ouvrage existant fondé sur pieux <i>Emeriault F.</i>	133
Drilled steel pipe piles in effective bridge construction <i>Eronen S. &amp; Hartikainen J.</i>	139
Justification d'une fondation superficielle sur un sol renforcé d'inclusions <i>Frossard A. &amp; Glandy M.</i>	147
Étude des interactions entre une fondation filante et un écran de soutènement <i>Gaudin C., Garnier J., Gaudicheau P. &amp; Favraud C.</i>	155
The development of skin friction on pipe piles in overconsolidated sand <i>Gavin K.G., Lehane B.M. &amp; Prieto C.</i>	161
Slender bored pile walls for deep excavations <i>Girsch E.</i>	167
Destruction of buildings and structures caused by the cryogenic weathering of footing material <i>Grebenets V.I.</i>	173
Effective steel foundation system for detached and row houses <i>Hartikainen J., Pitkänen J. &amp; Jokiniemi H.</i>	179
Ground displacement screw piles project in Belgium – 72-pile load testing program on two different sites <i>Huybrechts N., Maertens J. &amp; Holeyman A.</i>	185
Buildings with deep foundations and their impact on nearby structures in Moscow <i>Ilyichev V.A., Kononov P.A. &amp; Nikiforova N.S.</i>	191
Analysis of the geotechnical anchor load transfer mechanism <i>Ivandić K. &amp; Verić F.</i>	197
Seismic tomography as a spatial check-up of grouting operations effect <i>Ivanković T. &amp; Muhovec I.</i>	203
Finite difference solutions for buckling of piles in a stratified soil <i>Justo J.L. &amp; Galán J.M.</i>	209
The settlement of a group of raked piles <i>Justo J.L. &amp; Sánchez Langeber J.M.</i>	215
Experimental field tests for optimized ground improvement under railway lines on soft soils <i>Katzenbach R. &amp; Ittershagen M.</i>	221
Experience with friction-micropiled-raft foundation on soft soils <i>Kempfert H.-G. &amp; Böhm F.</i>	229

Terrain movement caused by estate expansion <i>Kovács M. &amp; Czap Z.</i>	235
Interaction between spread foundations and subsoil <i>Kuzma J. &amp; Hruštinec L.</i>	239
Side Grip Piling, a new method for impact driving of micropiles <i>Lehtonen J.</i>	245
Seismic response of large diameter piles in liquefiable soils <i>Liam Finn W.D. &amp; Fujita N.</i>	249
Predicting the behaviour of foundations on structured soils <i>Liyanapathirana D.S., Liu M.D., Carter J.P. &amp; Airey D.W.</i>	255
Infrastructure rehabilitation of some steel tanks in urban areas on difficult foundation soils <i>Lungu I., Raileanu P., Stanciu A., Musat V. &amp; Boti N.</i>	261
Stability of circular and square excavations in cohesive soils with strength increasing with depth <i>Lyamin A.V., Sloan S.W. &amp; Hjtaj M.</i>	265
Stress changes associated with driving pile groups in clayey silt <i>McCabe B.A. &amp; Lehane B.M.</i>	271
Actual trends in deep excavation technology and performance based on an international database <i>Moormann Ch.</i>	277
Interactions between retaining system and foundation piles during excavation <i>Moormann Ch.</i>	285
Impact of groundwater-lowering on combined piled raft foundations in urban area <i>Moormann Ch. &amp; Katzenbach R.</i>	293
Modeling of a pile loading in the Particle Flow Code <i>Mörchen N. &amp; Walz B.</i>	301
Localized deformation and stability of soft foundation under embankment construction via mesh-free method <i>Murakami A., Arimoto S. &amp; Setsuyasu T.</i>	305
Geotechnical works on reconstruction of the Old bridge in Mostar <i>Pequeux G. &amp; Ivanković T.</i>	311
Monitoring of underground water lines in the underground construction area <i>Petrukhin V.P., Isaev O.N. &amp; Nayatov D.V.</i>	317
Effect of geotechnical work on settlement of surrounding buildings at underground construction <i>Petrukhin V.P., Shuljatjev O.A. &amp; Mozgacheva O.A.</i>	323
Teatro Circo: underpinning of a century theatre <i>Pinto A. &amp; Gouveia M.</i>	329
Capacity of driven piles with time – implications for re-use <i>Powell J.J.M., Butcher A.P. &amp; Pellew A.</i>	335
Correlation between density index and relative density for sandy gravel subgrade <i>Pula O.</i>	341
Geotechnical problems related to the design of an underground car park in Rome <i>Rampello S., Callisto L. &amp; Calabresi G.</i>	345
The tilting of the Tower of Pisa with the groundwater level <i>Rétháti L. (†), Imre E., Trang Q.P., Telekes G., Gabos Gy. &amp; Firgi T.</i>	351

Compression and tension capacities of rock socketed drilled piers <i>Saglamer A., Yilmaz E. &amp; Erol O.</i>	359
A diagnosis of the fundamental ground of the Old Bridge in Mostar <i>Selimović M., Ivanković T. &amp; Langof Z.</i>	365
Interactions sismiques à grande échelle en milieu urbain <i>Semblat J-F, Kham M., Guéguen P. &amp; Bard P.-Y.</i>	371
Use of piled rafts in Adapazari soils <i>Sert S. &amp; Önalp A.</i>	377
De-Tilting of buildings and structures <i>Shokarev V.S., Stepura I.V., Tregub A.S., Pavlov A.V., Chaplygin V.I. &amp; Samchenko R.V.</i>	383
Indicator pile driving programs at the Port of Los Angeles Pier 400 container wharf <i>Schneider J.A., Howard R., Jr., Robins P.N. &amp; McNeilan T.W.</i>	387
The interaction coefficient of axially loaded bored piles installed in sandy soil <i>Slížyté D., Stragys V.V. &amp; Medzvieckas J.</i>	393
Application of injection under base of bored piles in cohesive soils <i>Tejchman A. &amp; Gwizdala K.</i>	399
Calculation of complex reconstruction solutions (as may be exemplified by architectural monuments of St. Petersburg) <i>Ulitsky V.M., Shashkin A.G. &amp; Shashkin K.G.</i>	407
Electrical discharge (explosions) in geotechnical engineering <i>Valeri E. &amp; Richter T.</i>	413
Bearing mechanism of pile <i>Wada A. &amp; Nhan N.T.</i>	419
A novel urban foundation system using pressed-in H-piles <i>White D.J., Bolton M.D. &amp; Wako C.</i>	425
<b>MAIN SESSION 5: Geotechnical Engineering in urban areas</b>	
<b>SÉANCE PLÉNIÈRE 5: Géotechnique en milieu urbain</b>	
Sample disturbance of fine grained soils <i>Aksoy H.S. &amp; Ozudogru K.</i>	433
Étude en laboratoire du comportement d'un sol compacté non saturé utilisé dans les remblais <i>Alshihabi O., Shahrour I. &amp; Mieussens C.</i>	437
Study of deep compaction in order to its application to deep foundations <i>Antoine P.-C., Pohl E., van der Cruyssen J.-P. &amp; Verbrugge J.-C.</i>	443
The underground constructions in the soil conditions of Astana <i>Baitassov T.M.</i>	449
Numerical modelling of pipe-soil stresses during pipe jacking in clays. <i>Barla M., Borghi X., Mair R.J. &amp; Soga K.</i>	453
Analysis of consolidation process of dam of St.-Petersburg flood protection barrier <i>Belkova I.N., Glagovsky V.B., Goldin A.L. &amp; Lipovetskaya T.F.</i>	459

Monitoring processes of dangerous geologic in region seaside of Ukraine <i>Bessmertry A.F. &amp; Ryzhiy M.N.</i>	465
A new computer controlled hollow cylinder torsional shear apparatus <i>Bil� Serra J.P. &amp; Hooker P.</i>	471
Construction of a hydro-power plant beneath an existing one <i>Brandl H.</i>	479
Importance of geotechnical and seismic microzonation for urban development planning <i>Cinicioǒlu S.F., Kelesoǒlu M.K. &amp; Oztoprak S.</i>	485
A probability approach using in the plate stability research on watersaturated seismic loaded foundation <i>Cherny H.I., Trofimchuk A.N. &amp; Cherny V.H.</i>	491
Application of waterproofing methods in tunneling through an alluvial deposit <i>Chun B.S., Yeo Y.H. &amp; Shin Y.W.</i>	497
Mod�lisation num�rique de la r�ponse d'un b�timent aux d�placements engendr�s par le creusement d'un tunnel <i>Dias D. &amp; Kastner R.</i>	503
Empirical vs numerical prediction of settlement trough due to shallow tunnelling in soft ground <i>Dole�alov M.</i>	509
Gmax from multichannel analysis of surface waves for Dublin Boulder clay <i>Donohue S., Gavin K., Long M. &amp; Connor P.O.</i>	515
Influence of potential soil deformations on soil pressure at rest upon retaining wall <i>Doubrovsky M.P., Khonelia N.N., Poizner M.B. &amp; Kaluzhny A.V.</i>	521
Coupled consolidation analysis for excavations <i>Drakos I.S., Tsotsos S. &amp; Hatzigogos Th.</i>	527
A building pit supported by a jetgrout wall reinforced with a sheet pile <i>van Duijnen P.G. &amp; Huisman C.</i>	533
Effet d'inclinaison des micropieux dans un groupe. Approche par une m�thode hybride <i>Estphan R., Frank R. &amp; Degny E.</i>	541
Stability of a railway embankment <i>Fagerholm K., Fischer K., Niemi O. &amp; Ravaska O.</i>	547
The riqualfication of an ancient tuff cavity in the centre of Naples <i>Fenelli G.B., Pagano L. &amp; Sica S.</i>	553
Designing multiple shallow tunnel linings constructed with the application of grouting <i>Fotieva N.N., Bulychev N.S. &amp; Antziferov S.V.</i>	559
Earth pressure on anchored walls in dry and saturated sand-fill <i>Fuglsang L.D.</i>	565
Working out a numerous method of calculation of deformation of clay layer surface under its swelling <i>Gabibov F.G.</i>	571
Flexural strength of kaolin clay reinforced with synthetic fibres and stabilised with lime and cement <i>Ghataora G.S., Freer-Hewish R.J. &amp; Dall'Acqua G.P.</i>	577
Failure of shallow foundations under general combined loading <i>Gourvenec S. &amp; Randolph M.</i>	583

Full-scale compensation grouting trial North/South line Amsterdam; Spatial relationships of fracture grouting injection pressures	589
<i>Haasnoot J.K., van der Stoel A.E.C. &amp; Kaalberg F.J.</i>	
Monitoring of a surcharge loading for the construction of a quay wall	595
<i>Haegeman W. &amp; Baertsoen A.</i>	
Towards a risk-based design of underground construction in urban areas	601
<i>Hannink G., Brassinga H.E., van Meerten J.J. &amp; de Wit M.S.</i>	
GIS – a useful tool to map vibrations from transportation	607
<i>Hårvik L. &amp; Heyerdahl H.</i>	
Modèle réduit pour l'interaction sol-ouvrage : influence des raideurs sur les redistributions d'efforts	615
<i>Houy L., Breyse D., Niandou H., Denis A. &amp; Riou C.</i>	
Causes and consequence of the collapse of the tufe layers on the example of the river Pliva	621
<i>Ivanković T., Marjanović P. &amp; Ivanković V.</i>	
Study of soil deformations caused by the discharge of groundwater in case of different geological structure	627
<i>Ivanov I.J. &amp; Mihova L.A.</i>	
Performance of 150 year-old railway slopes in glacial till: case study from southwest Ireland	631
<i>Jennings P.</i>	
Consolidation and drainage of the Franeker-bridge earth embankment, The Netherlands	637
<i>Karim U.F.A., van Meekeren H. &amp; Feenstra R.</i>	
Numeric indexing of soils and fractions of particles in civil engineering purposes	643
<i>Kilvander E.Ya. &amp; Snezhko O.V.</i>	
On calculation of natural oscillation period of landslide slopes	649
<i>Kilvander E.Ya. &amp; Snezhko O.V.</i>	
Physical and numerical modelling of an axially load driven pile in sands	653
<i>Klotz U., Mayer P.-M. &amp; Roddeman D.</i>	
The potential function of soft clay	661
<i>Korhonen O., Korhonen K.-H. &amp; Lojander M.</i>	
Permanent deformations of unbound materials of road pavement in accelerated pavement tests	665
<i>Korkiala-Tanttu L. &amp; Laaksonen R.</i>	
Risk involved in conventional numerical models of lateral pressure on structures	671
<i>Koudelka P. &amp; Koudelka T.</i>	
Loads and impacts on building constructions of urban underground structures	677
<i>Kryvoshejev P.I.</i>	
Contour effects at arrangements for large scale tests of direct shear strength	681
<i>Langof Z., Talic Z. &amp; Ivankovic T.</i>	
Numerical analysis of the interaction between a calcarenite rockfill embankment and a stiff caly deposit	687
<i>Lollino P., Cotecchia F., Zdravkovic L. &amp; Potts D.M.</i>	
Tide influenced water and earth pressure distribution on quay walls	693
<i>Mardfeldt B. &amp; Grabe J.</i>	
Kriging variance as an indicator of geotechnical hazard	699
<i>Marijanović P., Ivanković T. &amp; Kovač I.</i>	

Finite element analysis of a shallow tunnel <i>Martins F.F.</i>	705
Reinforced soil systems with non-planar lateral soil-wall boundaries <i>McGown A. &amp; Kupec J.</i>	711
Evaluation of numerical analyses used to model the influence of heave reducing piles on excavation induced ground movements <i>McNamara A.M., Stallebrass S.E. &amp; Taylor R.N.</i>	717
Instrumentation and interpretation of precast segmental tunnel linings in the Line 8 Madrid Metro extension 1999–2003, Spain. <i>Melis M.J., González A., Oteo C.S., Pugh R.C. &amp; Romo P.</i>	723
Technical control for the construction of the extension of the Madrid Metro. Control Monitoring Unit (USAC). <i>Melis M.J., Matias I., Romo P.J. &amp; Sanz J.</i>	729
Monitoring and analysis of diaphragm walls in the Madrid underground extension 1999–2003. <i>Melis Maynar M.J., Rodríguez Ortiz J.M<sup>a</sup>, Talavera Manso R. &amp; Sola Casado P.</i>	735
Well-founded risk management for the Betuweroute freight railway by the observational method <i>Molendijk W.O. &amp; van den Berg F.P.W.</i>	741
Settlement prediction for staged construction of a cut-and-cover tunnel for a high-speed railway line <i>Monaco P., Calabrese M., Marchetti S. &amp; Totani G.</i>	747
Improved design approach and use of performance monitoring programme for railway tunnelling under urban areas in Norway <i>Myrvoll F. &amp; Mykland J.</i>	753
Centrifuge modelling of multiple tunnel interaction in shallow ground <i>Ng C.W.W., Zhou X.W. &amp; Chung J.K.H.</i>	759
Concept for a reference pile testing site for the development and improvement of NDT-CE <i>Niederleithinger E. &amp; Taffe A.</i>	763
Deformation patterns in sand beneath shallow foundations subjected to vertical loading <i>O'Loughlin C.D., Lehane B.M. &amp; White D.J.</i>	767
The Oddernestunnel - a "cover and cut" tunnel in urban area <i>Olsson R., Bjonnstu T., Mortensten M. &amp; Grosås I.</i>	773
Piles subject to excavation-induced soil movement in clay <i>Ong D.E.L., Leung C.F. &amp; Chow Y.K.</i>	777
Towards an on-time method of interpretation of field instrumentation data <i>Oztoprak S. &amp; Cincicoglu S.F.</i>	783
Time dependent movements induced by tunnelling in stiff cohesive soils: a parametric study <i>Pane V., Ceccoli M. &amp; Tamagnini C.</i>	791
Antivibration isolation of foundations against mobile sources of vibration <i>Pantea P.</i>	797
A slice method for embankment and excavation stability analyses <i>Passalacqua R., Baretto A. &amp; Dalerci G.</i>	803
Sustainable development of underground space in urban areas <i>Paul T., Chow F.C., Kjekstad O., Vähäaho I.T., Sellberg B. &amp; Lemos L.J.L.</i>	809

Estimation of the tense-deformed state of the landslide slope of Moldova Republic using finite element method	815
<i>Polcanov V.N., Grama V.G., Macovei I.A. &amp; Nigrey E.</i>	
Comparison of geotechnic softwares - Geo FEM, Plaxis, Z-Soil	819
<i>Pruška J.</i>	
La plastification du milieu granulaire sous fortes contraintes	825
<i>Rahma A.</i>	
Influence of earth pressure on the inner forces in the tunnel lining	831
<i>Rymsza B.</i>	
Integrated geotechnical – geophysical investigation and testing of hazardous man-made objects	837
<i>Salát P. &amp; Nagy L.</i>	
Stability analyses of retaining walls by different numerical approaches	843
<i>Schanz T. &amp; Gollub P.</i>	
Compressed air tunnelling – Tunnel advance simulation to determine air losses	849
<i>Scheid Y. &amp; Semprich S.</i>	
Construction of a six storey car park underneath the Lake Geneva - Open excavation with diaphragm walls and internal bracing	855
<i>Scheller P.O.</i>	
Seismic stability of rock islands for bridge protection in coastal South Carolina	859
<i>Siegel T.C., Chang C.C. &amp; Loizias M.</i>	
Azuga testing platform	865
<i>Sima N. &amp; Furnigel L.</i>	
Ground treatment for tunnel construction on the Madrid Metro	869
<i>Sola P.R., Martín L., Ángel Blanco M. &amp; San Juan R.</i>	
Measuring underground pipeline infrastructure using fibre optics	875
<i>Spruit R., van de Walie N.J., Bouman J.H., van der Hoek M.J. &amp; van de Belt L.Z.</i>	
Model tests of bearing capacity of homogeneous soil limited by rigid layer	881
<i>Srokosz P.E., Bartoszewicz A. &amp; Dembicki E.</i>	
Assessment of deformations of a reinforced soil structure	887
<i>Stanić B., Kovačević M.S. &amp; Szavits-Nossan V.</i>	
Slope stability problems in Denmark - a joke or dire reality?	893
<i>Steenfelt J.S. &amp; Sørensen C.S.</i>	
Jet grouting model tests and simulation	899
<i>Stein J. &amp; Grabe J.</i>	
Design method for dike uplift stabilisation by underground doweling	903
<i>Van M.A., van Eekelen S.J.M. &amp; Barends F.B.J.</i>	
Numerical analysis on Haarajoki test embankment	909
<i>Vepsäläinen P., Lojander M., Koskinen M. &amp; Smura M.</i>	
Stability of boreholes in case of directional drilling	913
<i>Viehöfer T.C., Bezuijen A. &amp; Hergarden H.J.A.M.</i>	
Movement of gravity caisson wharf	917
<i>Zhang X.Y., Leung C.F. &amp; Lee F.H.</i>	
Correlation between inter-granular void ratio and cone tip resistance of loose silty sand	923
<i>Ziaie_Moayed R. &amp; Naeini S.A.</i>	

Response of pavement granular base material on repetitional traffic loads <i>Žlender B. &amp; Macuh B.</i>	929
Back analyses of high retaining structures within the framework of the observational method <i>Žvanut P., Majes B. &amp; Logar J.</i>	933

MAIN SESSION 6: European Geotechnical Networking  
SÉANCE PLÉNIÈRE 6: Travail en réseau des géotechniciens de l'Europe

A GIS model application supporting the analysis of the seismic hazard for the urban area of Catania (Italy) <i>Grasso S. &amp; Maugeri M.</i>	941
PRIMA technology programme <i>Mäkelä H.</i>	947
TREE et INTRANSNET : deux projets européens et un réseau commun de recherche au service de la géotechnique, du génie civil et des transports <i>Maldonado A., Garnier J., Kovarik K. &amp; Bujnak J.</i>	951
A new digital format for exchange of borehole and piezometer data <i>Nohl W.A., Engering F.P.H., Bosch J.H.A. &amp; Jonker A.</i>	957
Databank Ondergrond Vlaanderen (DOV): a regional information system for geotechnical, geological and hydrogeological data of the subsoil in Flanders, Belgium. <i>Vergauwen I., De Schrijver P. &amp; van Alboom G.</i>	961

Fondations en zones urbaines
