Meningioma: A Pathology Perspective

Angus Toland, Kristin Huntoon, Sonika M. Dahiya

On the Cover

This month's cover features art from "A Neurosurgeon's Guide to Cognitive Dysfunction in Adult Glioma." Decades of functional imaging, lesion symptom mapping, and cortical mapping have aided our ability to

localize cognitive operations in the human brain. Brain tumor location influences outcome. Within the intraoperative setting, site specific testing and monitoring remains the cornerstone of maximal resection while minimizing surgical morbidity. Read more on p. 1.
