

## CONTENTS

<b>Series Editor's Introduction</b>	<b>v</b>
<b>1. Typologies and Taxonomies in Social Science</b>	<b>1</b>
The History of Classification in Social Science	10
Advantages and Disadvantages of Classification	11
<b>2. Classical Typology Construction (Precomputer)</b>	<b>17</b>
Substruction	24
Reduction	26
Advantages and Disadvantages of Conceptual Typologies	33
<b>3. Numerical Taxonomy and Cluster Analysis</b>	<b>34</b>
Criteria for Evaluating Clustering Methods	40
A Typology of Clustering Techniques	48
Examples of Clustering	50
Divisive Methods	57
Evaluation of Clusters	60
The Interpretation of Clusters	61
Advantages and Disadvantages of Clustering	63
<b>4. Relations Among Techniques</b>	<b>66</b>
Cluster Analysis and Factor Analysis	68
Cluster Analysis and Multidimensional Scaling	71
Cluster Analysis and Multiple Discriminant Analysis	73
Classification and Systems Analysis	75
<b>5. Summary and Conclusions</b>	<b>76</b>
Classification Resources	77
Classification Applications	78
Concluding Remarks	83
<b>References</b>	<b>84</b>
<b>About the Author</b>	<b>90</b>
