

# Contents

Preface	vii
Introduction	xv
About This Book	xvii
CHAPTER I Polish Spaces	
1. Topological and Metric Spaces	1
1.A Topological Spaces	1
1.B Metric Spaces	2
2. Trees	5
2.A Basic Concepts	5
2.B Trees and Closed Sets	7
2.C Trees on Products	9
2.D Leftmost Branches	9
2.E Well-founded Trees and Ranks	10
2.F The Well-founded Part of a Tree	11
2.G The Kleene-Brouwer Ordering	11
3. Polish Spaces	13
3.A Definitions and Examples	13
3.B Extensions of Continuous Functions and Homeomorphisms	15
3.C Polish Subspaces of Polish Spaces	17
4. Compact Metrizable Spaces	18
4.A Basic Facts	18
4.B Examples	19
CHAPTER II General Topology	
1. General Topological Properties of Metric Spaces	21
1.A Metrics	21
1.B Metrics and Topologies	22
1.C Topological Properties of Metric Spaces	23
1.D Separation Properties of Metric Spaces	24
1.E Compactness Properties of Metric Spaces	25
1.F Connectedness Properties of Metric Spaces	26
1.G Continuity	27
1.H Uniformity	28
1.I Function Spaces	29
1.J Product Topology	30
1.K Quotient Topology	31
1.L Compactifications	32
1.M Connectedness Properties of Metric Spaces	33
1.N Compact Metric Spaces	34
1.O Homeomorphism	35
1.P Uniform Homeomorphism	36
1.Q Uniform Continuity	37
1.R Uniform Compactness	38
1.S Uniform Baire Category	39
1.T Uniform Convergence	40
1.U Uniform Equicontinuity	41
1.V Uniform Compactness Principle	42
1.W Uniform Compactness Theorem	43
1.X Uniform Continuity Principle	44
1.Y Uniform Compactness Principle	45
1.Z Uniform Compactness Theorem	46
2. Topological Properties of Metric Spaces	47
2.A Metrics	47
2.B Metrics and Topologies	48
2.C Topological Properties of Metric Spaces	49
2.D Separation Properties of Metric Spaces	50
2.E Compactness Properties of Metric Spaces	51
2.F Connectedness Properties of Metric Spaces	52
2.G Continuity	53
2.H Uniformity	54
2.I Function Spaces	55
2.J Product Topology	56
2.K Quotient Topology	57
2.L Compactifications	58
2.M Connectedness Properties of Metric Spaces	59
2.N Compact Metric Spaces	60
2.O Homeomorphism	61
2.P Uniform Homeomorphism	62
2.Q Uniform Continuity	63
2.R Uniform Compactness	64
2.S Uniform Equicontinuity	65
2.T Uniform Compactness Principle	66
2.U Uniform Compactness Theorem	67
2.V Uniform Continuity Principle	68
2.W Uniform Compactness Principle	69
2.X Uniform Compactness Theorem	70
3. Topological Properties of General Topological Spaces	71
3.A Metrics	71
3.B Metrics and Topologies	72
3.C Topological Properties of General Topological Spaces	73
3.D Separation Properties of General Topological Spaces	74
3.E Compactness Properties of General Topological Spaces	75
3.F Connectedness Properties of General Topological Spaces	76
3.G Continuity	77
3.H Uniformity	78
3.I Function Spaces	79
3.J Product Topology	80
3.K Quotient Topology	81
3.L Compactifications	82
3.M Connectedness Properties of General Topological Spaces	83
3.N Compact General Topological Spaces	84
3.O Homeomorphism	85
3.P Uniform Homeomorphism	86
3.Q Uniform Continuity	87
3.R Uniform Compactness	88
3.S Uniform Equicontinuity	89
3.T Uniform Compactness Principle	90
3.U Uniform Compactness Theorem	91
3.V Uniform Continuity Principle	92
3.W Uniform Compactness Principle	93
3.X Uniform Compactness Theorem	94
4. Topological Properties of General Topological Spaces	95
4.A Metrics	95
4.B Metrics and Topologies	96
4.C Topological Properties of General Topological Spaces	97
4.D Separation Properties of General Topological Spaces	98
4.E Compactness Properties of General Topological Spaces	99
4.F Connectedness Properties of General Topological Spaces	100
4.G Continuity	101
4.H Uniformity	102
4.I Function Spaces	103
4.J Product Topology	104
4.K Quotient Topology	105
4.L Compactifications	106
4.M Connectedness Properties of General Topological Spaces	107
4.N Compact General Topological Spaces	108
4.O Homeomorphism	109
4.P Uniform Homeomorphism	110
4.Q Uniform Continuity	111
4.R Uniform Compactness	112
4.S Uniform Equicontinuity	113
4.T Uniform Compactness Principle	114
4.U Uniform Compactness Theorem	115
4.V Uniform Continuity Principle	116
4.W Uniform Compactness Principle	117
4.X Uniform Compactness Theorem	118
5. Topological Properties of General Topological Spaces	119
5.A Metrics	119
5.B Metrics and Topologies	120
5.C Topological Properties of General Topological Spaces	121
5.D Separation Properties of General Topological Spaces	122
5.E Compactness Properties of General Topological Spaces	123
5.F Connectedness Properties of General Topological Spaces	124
5.G Continuity	125
5.H Uniformity	126
5.I Function Spaces	127
5.J Product Topology	128
5.K Quotient Topology	129
5.L Compactifications	130
5.M Connectedness Properties of General Topological Spaces	131
5.N Compact General Topological Spaces	132
5.O Homeomorphism	133
5.P Uniform Homeomorphism	134
5.Q Uniform Continuity	135
5.R Uniform Compactness	136
5.S Uniform Equicontinuity	137
5.T Uniform Compactness Principle	138
5.U Uniform Compactness Theorem	139
5.V Uniform Continuity Principle	140
5.W Uniform Compactness Principle	141
5.X Uniform Compactness Theorem	142
6. Topological Properties of General Topological Spaces	143
6.A Metrics	143
6.B Metrics and Topologies	144
6.C Topological Properties of General Topological Spaces	145
6.D Separation Properties of General Topological Spaces	146
6.E Compactness Properties of General Topological Spaces	147
6.F Connectedness Properties of General Topological Spaces	148
6.G Continuity	149
6.H Uniformity	150
6.I Function Spaces	151
6.J Product Topology	152
6.K Quotient Topology	153
6.L Compactifications	154
6.M Connectedness Properties of General Topological Spaces	155
6.N Compact General Topological Spaces	156
6.O Homeomorphism	157
6.P Uniform Homeomorphism	158
6.Q Uniform Continuity	159
6.R Uniform Compactness	160
6.S Uniform Equicontinuity	161
6.T Uniform Compactness Principle	162
6.U Uniform Compactness Theorem	163
6.V Uniform Continuity Principle	164
6.W Uniform Compactness Principle	165
6.X Uniform Compactness Theorem	166
7. Topological Properties of General Topological Spaces	167
7.A Metrics	167
7.B Metrics and Topologies	168
7.C Topological Properties of General Topological Spaces	169
7.D Separation Properties of General Topological Spaces	170
7.E Compactness Properties of General Topological Spaces	171
7.F Connectedness Properties of General Topological Spaces	172
7.G Continuity	173
7.H Uniformity	174
7.I Function Spaces	175
7.J Product Topology	176
7.K Quotient Topology	177
7.L Compactifications	178
7.M Connectedness Properties of General Topological Spaces	179
7.N Compact General Topological Spaces	180
7.O Homeomorphism	181
7.P Uniform Homeomorphism	182
7.Q Uniform Continuity	183
7.R Uniform Compactness	184
7.S Uniform Equicontinuity	185
7.T Uniform Compactness Principle	186
7.U Uniform Compactness Theorem	187
7.V Uniform Continuity Principle	188
7.W Uniform Compactness Principle	189
7.X Uniform Compactness Theorem	190
8. Topological Properties of General Topological Spaces	191
8.A Metrics	191
8.B Metrics and Topologies	192
8.C Topological Properties of General Topological Spaces	193
8.D Separation Properties of General Topological Spaces	194
8.E Compactness Properties of General Topological Spaces	195
8.F Connectedness Properties of General Topological Spaces	196
8.G Continuity	197
8.H Uniformity	198
8.I Function Spaces	199
8.J Product Topology	200
8.K Quotient Topology	201
8.L Compactifications	202
8.M Connectedness Properties of General Topological Spaces	203
8.N Compact General Topological Spaces	204
8.O Homeomorphism	205
8.P Uniform Homeomorphism	206
8.Q Uniform Continuity	207
8.R Uniform Compactness	208
8.S Uniform Equicontinuity	209
8.T Uniform Compactness Principle	210
8.U Uniform Compactness Theorem	211
8.V Uniform Continuity Principle	212
8.W Uniform Compactness Principle	213
8.X Uniform Compactness Theorem	214
9. Topological Properties of General Topological Spaces	215
9.A Metrics	215
9.B Metrics and Topologies	216
9.C Topological Properties of General Topological Spaces	217
9.D Separation Properties of General Topological Spaces	218
9.E Compactness Properties of General Topological Spaces	219
9.F Connectedness Properties of General Topological Spaces	220
9.G Continuity	221
9.H Uniformity	222
9.I Function Spaces	223
9.J Product Topology	224
9.K Quotient Topology	225
9.L Compactifications	226
9.M Connectedness Properties of General Topological Spaces	227
9.N Compact General Topological Spaces	228
9.O Homeomorphism	229
9.P Uniform Homeomorphism	230
9.Q Uniform Continuity	231
9.R Uniform Compactness	232
9.S Uniform Equicontinuity	233
9.T Uniform Compactness Principle	234
9.U Uniform Compactness Theorem	235
9.V Uniform Continuity Principle	236
9.W Uniform Compactness Principle	237
9.X Uniform Compactness Theorem	238
10. Topological Properties of General Topological Spaces	239
10.A Metrics	239
10.B Metrics and Topologies	240
10.C Topological Properties of General Topological Spaces	241
10.D Separation Properties of General Topological Spaces	242
10.E Compactness Properties of General Topological Spaces	243
10.F Connectedness Properties of General Topological Spaces	244
10.G Continuity	245
10.H Uniformity	246
10.I Function Spaces	247
10.J Product Topology	248
10.K Quotient Topology	249
10.L Compactifications	250
10.M Connectedness Properties of General Topological Spaces	251
10.N Compact General Topological Spaces	252
10.O Homeomorphism	253
10.P Uniform Homeomorphism	254
10.Q Uniform Continuity	255
10.R Uniform Compactness	256
10.S Uniform Equicontinuity	257
10.T Uniform Compactness Principle	258
10.U Uniform Compactness Theorem	259
10.V Uniform Continuity Principle	260
10.W Uniform Compactness Principle	261
10.X Uniform Compactness Theorem	262
11. Topological Properties of General Topological Spaces	263
11.A Metrics	263
11.B Metrics and Topologies	264
11.C Topological Properties of General Topological Spaces	265
11.D Separation Properties of General Topological Spaces	266
11.E Compactness Properties of General Topological Spaces	267
11.F Connectedness Properties of General Topological Spaces	268
11.G Continuity	269
11.H Uniformity	270
11.I Function Spaces	271
11.J Product Topology	272
11.K Quotient Topology	273
11.L Compactifications	274
11.M Connectedness Properties of General Topological Spaces	275
11.N Compact General Topological Spaces	276
11.O Homeomorphism	277
11.P Uniform Homeomorphism	278
11.Q Uniform Continuity	279
11.R Uniform Compactness	280
11.S Uniform Equicontinuity	281
11.T Uniform Compactness Principle	282
11.U Uniform Compactness Theorem	283
11.V Uniform Continuity Principle	284
11.W Uniform Compactness Principle	285
11.X Uniform Compactness Theorem	286
12. Topological Properties of General Topological Spaces	287
12.A Metrics	287
12.B Metrics and Topologies	288
12.C Topological Properties of General Topological Spaces	289
12.D Separation Properties of General Topological Spaces	290
12.E Compactness Properties of General Topological Spaces	291
12.F Connectedness Properties of General Topological Spaces	292
12.G Continuity	293
12.H Uniformity	294
12.I Function Spaces	295
12.J Product Topology	296
12.K Quotient Topology	297
12.L Compactifications	298
12.M Connectedness Properties of General Topological Spaces	299
12.N Compact General Topological Spaces	300
12.O Homeomorphism	301
12.P Uniform Homeomorphism	302
12.Q Uniform Continuity	303
12.R Uniform Compactness	304
12.S Uniform Equicontinuity	305
12.T Uniform Compactness Principle	306
12.U Uniform Compactness Theorem	307
12.V Uniform Continuity Principle	308
12.W Uniform Compactness Principle	309
12.X Uniform Compactness Theorem	310
13. Topological Properties of General Topological Spaces	311
13.A Metrics	311
13.B Metrics and Topologies	312
13.C Topological Properties of General Topological Spaces	313
13.D Separation Properties of General Topological Spaces	314
13.E Compactness Properties of General Topological Spaces	315
13.F Connectedness Properties of General Topological Spaces	316
13.G Continuity	317
13.H Uniformity	318
13.I Function Spaces	319
13.J Product Topology	320
13.K Quotient Topology	321
13.L Compactifications	322
13.M Connectedness Properties of General Topological Spaces	323
13.N Compact General Topological Spaces	324
13.O Homeomorphism	325
13.P Uniform Homeomorphism	326
13.Q Uniform Continuity	327
13.R Uniform Compactness	328
13.S Uniform Equicontinuity	329
13.T Uniform Compactness Principle	330
13.U Uniform Compactness Theorem	331
13.V Uniform Continuity Principle	332
13.W Uniform Compactness Principle	333
13.X Uniform Compactness Theorem	334
14. Topological Properties of General Topological Spaces	335
14.A Metrics	335
14.B Metrics and Topologies	336
14.C Topological Properties of General Topological Spaces	337
14.D Separation Properties of General Topological Spaces	338
14.E Compactness Properties of General Topological Spaces	339
14.F Connectedness Properties of General Topological Spaces	340
14.G Continuity	341
14.H Uniformity	342
14.I Function Spaces	343
14.J Product Topology	344
14.K Quotient Topology	345
14.L Compactifications	346
14.M Connectedness Properties of General Topological Spaces	347
14.N Compact General Topological Spaces	348
14.O Homeomorphism	349
14.P Uniform Homeomorphism	350
14.Q Uniform Continuity	351
14.R Uniform Compactness	352
14.S Uniform Equicontinuity	353
14.T Uniform Compactness Principle	354
14.U Uniform Compactness Theorem	355
14.V Uniform Continuity Principle	356
14.W Uniform Compactness Principle	357
14.X Uniform Compactness Theorem	358
15. Topological Properties of General Topological Spaces	359
15.A Metrics	359
15.B Metrics and Topologies	360
15.C Topological Properties of General Topological Spaces	361
15.D Separation Properties of General Topological Spaces	362
15.E Compactness Properties of General Topological Spaces	363
15.F Connectedness Properties of General Topological Spaces	364
15.G Continuity	365
15.H Uniformity	366
15.I Function Spaces	367
15.J Product Topology	368
15.K Quotient Topology	369
15.L Compactifications	370
15.M Connectedness Properties of General Topological Spaces	371
15.N Compact General Topological Spaces	372
15.O Homeomorphism	373
15.P Uniform Homeomorphism	374
15.Q Uniform Continuity	375
15.R Uniform Compactness	376
15.S Uniform Equicontinuity	377
15.T Uniform Compactness Principle	378
15.U Uniform Compactness Theorem	379
15.V Uniform Continuity Principle	380
15.W Uniform Compactness Principle	381
15.X Uniform Compactness Theorem	382
16. Topological Properties of General Topological Spaces	383
16.A Metrics	383
16.B Metrics and Topologies	384
16.C Topological Properties of General Topological Spaces	385
16.D Separation Properties of General Topological Spaces	386
16.E Compactness Properties of General Topological Spaces	387
16.F Connectedness Properties of General Topological Spaces	388
16.G Continuity	389
16.H Uniformity	390
16.I Function Spaces	391
16.J Product Topology	392
16.K Quotient Topology	393
16.L Compactifications	394
16.M Connectedness Properties of General Topological Spaces	395
16.N Compact General Topological Spaces	396
16.O Homeomorphism	397
16.P Uniform Homeomorphism	398
16.Q Uniform Continuity	399
16.R Uniform Compactness	400
16.S Uniform Equicontinuity	401
16.T Uniform Compactness Principle	402
16.U Uniform Compactness Theorem	403
16.V Uniform Continuity Principle	404
16.W Uniform Compactness Principle	405
16.X Uniform Compactness Theorem	406
17. Topological Properties of General Topological Spaces	407
17.A Metrics	407
17.B Metrics and Topologies	408
17.C Topological Properties of General Topological Spaces	409
17.D Separation Properties of General Topological Spaces	410
17.E Compactness Properties of General Topological Spaces	411
17.F Connectedness Properties of General Topological Spaces	412
17.G Continuity	413
17.H Uniformity	414
17.I Function Spaces	415
17.J Product Topology	416
17.K Quotient Topology	417
17.L Compactifications	418
17.M Connectedness Properties of General Topological Spaces	419
17.N Compact General Topological Spaces	420
17.O Homeomorphism	421
17.P Uniform Homeomorphism	422
17.Q Uniform Continuity	423
17.R Uniform Compactness	424
17.S Uniform Equicontinuity	425
17.T Uniform Compactness Principle	426
17.U Uniform Compactness Theorem	427
17.V Uniform Continuity Principle	428
17.W Uniform Compactness Principle	429
17.X Uniform Compactness Theorem	430
18. Topological Properties of General Topological Spaces	431
18.A Metrics	431
18.B Metrics and Topologies	432
18.C Topological Properties of General Topological Spaces	433
18.D Separation Properties of General Topological Spaces	434
18.E Compactness Properties of General Topological Spaces	435
18.F Connectedness Properties of General Topological Spaces	436
18.G Continuity	437
18.H Uniformity	438
18.I Function Spaces	439
18.J Product Topology	440
18.K Quotient Topology	441
18.L Compactifications	442
18.M Connectedness Properties of General Topological Spaces	443
18.N Compact General Topological Spaces	444
18.O Homeomorphism	445
18.P Uniform Homeomorphism	446
18.Q Uniform Continuity	447
18.R Uniform Compactness	448
18.S Uniform Equicontinuity	449
18.T Uniform Compactness Principle	450
18.U Uniform Compactness Theorem	451
18.V Uniform Continuity Principle	452
18.W Uniform Compactness Principle	453
18.X Uniform Compactness Theorem	454
19. Topological Properties of General Topological Spaces</	

4.C A Universality Property of the Hilbert Cube	22
4.D Continuous Images of the Cantor Space	23
4.E The Space of Continuous Functions on a Compact Space	24
4.F The Hyperspace of Compact Sets	24
<b>5. Locally Compact Spaces</b>	<b>29</b>
<b>6. Perfect Polish Spaces</b>	<b>31</b>
6.A Embedding the Cantor Space in Perfect Polish Spaces	31
6.B The Cantor-Bendixson Theorem	32
6.C Cantor-Bendixson Derivatives and Ranks	33
<b>7. Zero-dimensional Spaces</b>	<b>35</b>
7.A Basic Facts	35
7.B A Topological Characterization of the Cantor Space	35
7.C A Topological Characterization of the Baire Space	36
7.D Zero-dimensional Spaces as Subspaces of the Baire Space	38
7.E Polish Spaces as Continuous Images of the Baire Space	38
7.F Closed Subsets Homeomorphic to the Baire Space	39
<b>8. Baire Category</b>	<b>41</b>
8.A Meager Sets	41
8.B Baire Spaces	41
8.C Choquet Games and Spaces	43
8.D Strong Choquet Games and Spaces	44
8.E A Characterization of Polish Spaces	45
8.F Sets with the Baire Property	47
8.G Localization	48
8.H The Banach-Mazur Game	51
8.I Baire Measurable Functions	52
8.J Category Quantifiers	53
8.K The Kuratowski-Ulam Theorem	53
8.L Some Applications	55
8.M Separate and Joint Continuity	56
<b>9. Polish Groups</b>	<b>58</b>
9.A Metrizable and Polish Groups	58
9.B Examples of Polish Groups	58
9.C Basic Facts about Baire Groups and Their Actions	60
9.D Universal Polish Groups	63
<b>CHAPTER II</b>	
<b>Borel Sets</b>	<b>65</b>
<b>10. Measurable Spaces and Functions</b>	<b>65</b>
10.A Sigma-Algebras and Their Generators	65
10.B Measurable Spaces and Functions	66
<b>11. Borel Sets and Functions</b>	<b>68</b>
11.A Borel Sets in Topological Spaces	68
11.B The Borel Hierarchy	68
11.C Borel Functions	70
<b>12. Standard Borel Spaces</b>	<b>73</b>
12.A Borel Sets and Functions in Separable Metrizable Spaces	73
12.B Standard Borel Spaces	74

12.C The Effros Borel Space	75
12.D An Application to Selectors	77
12.E Further Examples	78
12.F Standard Borel Groups	80
<b>13. Borel Sets as Clopen Sets</b>	<b>82</b>
13.A Turning Borel into Clopen Sets	82
13.B Other Representations of Borel Sets	83
13.C Turning Borel into Continuous Functions	84
<b>14. Analytic Sets and the Separation Theorem</b>	<b>85</b>
14.A Basic Facts about Analytic Sets	85
14.B The Lusin Separation Theorem	87
14.C Souslin's Theorem	87
<b>15. Borel Injections and Isomorphisms</b>	<b>89</b>
15.A Borel Injective Images of Borel Sets	89
15.B The Isomorphism Theorem	90
15.C Homomorphisms of Sigma-Algebras Induced by Point Maps	91
15.D Some Applications to Group Actions	92
<b>16. Borel Sets and Baire Category</b>	<b>94</b>
16.A Borel Definability of Category Notions	94
16.B The Vaught Transforms	95
16.C Connections with Model Theory	96
16.D Connections with Cohen's Forcing Method	99
<b>17. Borel Sets and Measures</b>	<b>103</b>
17.A General Facts on Measures	103
17.B Borel Measures	105
17.C Regularity and Tightness of Measures	107
17.D Lusin's Theorem on Measurable Functions	108
17.E The Space of Probability Borel Measures	109
17.F The Isomorphism Theorem for Measures	116
<b>18. Uniformization Theorems</b>	<b>120</b>
18.A The Jankov, von Neumann Uniformization Theorem	120
18.B "Large Section" Uniformization Results	122
18.C "Small Section" Uniformization Results	123
18.D Selectors and Transversals	128
<b>19. Partition Theorems</b>	<b>129</b>
19.A Partitions with a Comeager or Non-meager Piece	129
19.B A Ramsey Theorem for Polish Spaces	130
19.C The Galvin-Prikry Theorem	132
19.D Ramsey Sets and the Ellentuck Topology	132
19.E An Application to Banach Space Theory	134
<b>20. Borel Determinacy</b>	<b>137</b>
20.A Infinite Games	137
20.B Determinacy of Closed Games	138
20.C Borel Determinacy	140
20.D Game Quantifiers	147
<b>21. Games People Play</b>	<b>149</b>
21.A The *-Games	149
21.B Unfolding	150
21.C The Banach-Mazur or **-Games	151

21.D	The General Unfolded Banach-Mazur Games	153
21.E	Wadge Games	156
21.F	Separation Games and Hurewicz's Theorem	160
21.G	Turing Degrees	164
<b>22.</b>	<b>The Borel Hierarchy</b>	<b>167</b>
22.A	Universal Sets	167
22.B	The Borel versus the Wadge Hierarchy	169
22.C	Structural Properties	170
22.D	Additional Results	173
22.E	The Difference Hierarchy	175
<b>23.</b>	<b>Some Examples</b>	<b>179</b>
23.A	Combinatorial Examples	179
23.B	Classes of Compact Sets	181
23.C	Sequence Spaces	182
23.D	Classes of Continuous Functions	182
23.E	Uniformly Convergent Sequences	185
23.F	Some Universal Sets	185
23.G	Further Examples	188
<b>24.</b>	<b>The Baire Hierarchy</b>	<b>190</b>
24.A	The Baire Classes of Functions	190
24.B	Functions of Baire Class 1	192
 CHAPTER III		
	Analytic Sets	196
<b>25.</b>	<b>Representations of Analytic Sets</b>	<b>196</b>
25.A	Review	196
25.B	Analytic Sets in the Baire Space	197
25.C	The Souslin Operation	198
25.D	Wellordered Unions and Intersections of Borel Sets	201
25.E	Analytic Sets as Open Sets in Strong Choquet Spaces	202
<b>26.</b>	<b>Universal and Complete Sets</b>	<b>205</b>
26.A	Universal Analytic Sets	205
26.B	Analytic Determinacy	205
26.C	Complete Analytic Sets	206
26.D	Classification up to Borel Isomorphism	207
<b>27.</b>	<b>Examples</b>	<b>209</b>
27.A	The Class of Ill-founded Trees	209
27.B	Classes of Closed Sets	209
27.C	Classes of Structures in Model Theory	212
27.D	Isomorphism	213
27.E	Some Universal Sets	214
27.F	Miscellanea	215
<b>28.</b>	<b>Separation Theorems</b>	<b>217</b>
28.A	The Lusin Separation Theorem Revisited	217
28.B	The Novikov Separation Theorem	219
28.C	Borel Sets with Open or Closed Sections	220
28.D	Some Special Separation Theorems	221
28.E	"Hurewicz-Type" Separation Theorems	224

<b>29. Regularity Properties</b>	<b>226</b>
29.A The Perfect Set Property	226
29.B Measure, Category, and Ramsey	226
29.C A Closure Property for the Souslin Operation	227
29.D The Class of $C$ -Sets	230
29.E Analyticity of “Largeness” Conditions on Analytic Sets	230
<b>30. Capacities</b>	<b>234</b>
30.A The Basic Concept	234
30.B Examples	234
30.C The Choquet Capacitability Theorem	237
<b>31. Analytic Well-founded Relations</b>	<b>239</b>
31.A Bounds on Ranks of Analytic Well-founded Relations	239
31.B The Kunen-Martin Theorem	241
 CHAPTER IV	
Co-Analytic Sets	242
<b>32. Review</b>	<b>242</b>
32.A Basic Facts	242
32.B Representations of Co-Analytic Sets	243
32.C Regularity Properties	244
<b>33. Examples</b>	<b>245</b>
33.A Well-founded Trees and Wellorderings	245
33.B Classes of Closed Sets	245
33.C Sigma-Ideals of Compact Sets	246
33.D Differentiable Functions	248
33.E Everywhere Convergence	251
33.F Parametrizing Baire Class 1 Functions	252
33.G A Method for Proving Completeness	253
33.H Singular Functions	254
33.I Topological Examples	255
33.J Homeomorphisms of Compact Spaces	257
33.K Classes of Separable Banach Spaces	262
33.L Other Examples	266
<b>34. Co-Analytic Ranks</b>	<b>267</b>
34.A Ranks and Prewellorderings	267
34.B Ranked Classes	267
34.C Co-Analytic Ranks	268
34.D Derivatives	270
34.E Co-Analytic Ranks Associated with Borel Derivatives	272
34.F Examples	275
<b>35. Rank Theory</b>	<b>281</b>
35.A Basic Properties of Ranked Classes	281
35.B Parametrizing Bi-Analytic and Borel Sets	283
35.C Reflection Theorems	285
35.D Boundedness Properties of Ranks	288
35.E The Rank Method	290
35.F The Strategic Uniformization Theorem	291
35.G Co-Analytic Families of Closed Sets and Their Sigma-Ideals	292

35.H Borel Sets with $F_\sigma$ and $K_\sigma$ Sections	296
<b>36. Scales and Uniformization</b>	<b>299</b>
36.A Kappa-Souslin Sets	299
36.B Scales	299
36.C Scaled Classes and Uniformization	302
36.D The Novikov-Kondô Uniformization Theorem	304
36.E Regularity Properties of Uniformizing Functions	307
36.F Uniformizing Co-Analytic Sets with Large Sections	309
36.G Examples of Co-Analytic Scales	310
<b>CHAPTER V</b>	
Projective Sets	313
<b>37. The Projective Hierarchy</b>	<b>313</b>
37.A Basic Facts	313
37.B Examples	316
<b>38. Projective Determinacy</b>	<b>322</b>
38.A The Second Level of the Projective Hierarchy	322
38.B Projective Determinacy	325
38.C Regularity Properties	326
<b>39. The Periodicity Theorems</b>	<b>327</b>
39.A Periodicity in the Projective Hierarchy	327
39.B The First Periodicity Theorem	327
39.C The Second Periodicity Theorem	336
39.D The Third Periodicity Theorem	342
<b>40. Epilogue</b>	<b>346</b>
40.A Extensions of the Projective Hierarchy	346
40.B Effective Descriptive Set Theory	346
40.C Large Cardinals	346
40.D Connections to Other Areas of Mathematics	347
<b>Appendix A. Ordinals and Cardinals</b>	<b>349</b>
<b>Appendix B. Well-founded Relations</b>	<b>351</b>
<b>Appendix C. On Logical Notation</b>	<b>353</b>
Notes and Hints	357
