

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Examples of Optimization Problems in Machine Learning	1
1.2	First-Order Algorithm	3
1.3	Sketch of Representative Works on Accelerated Algorithms	3
1.4	About the Book	6
	References	6
<b>2</b>	<b>Accelerated Algorithms for Unconstrained Convex Optimization</b>	<b>11</b>
2.1	Accelerated Gradient Method for Smooth Optimization	11
2.2	Extension to Composite Optimization	17
2.2.1	Nesterov's First Scheme	17
2.2.2	Nesterov's Second Scheme	21
2.2.3	Nesterov's Third Scheme	25
2.3	Inexact Proximal and Gradient Computing	27
2.3.1	Inexact Accelerated Gradient Descent	36
2.3.2	Inexact Accelerated Proximal Point Method	37
2.4	Restart	38
2.5	Smoothing for Nonsmooth Optimization	39
2.6	Higher Order Accelerated Method	44
2.7	Explanation: A Variational Perspective	49
2.7.1	Discretization	50
	References	54
<b>3</b>	<b>Accelerated Algorithms for Constrained Convex Optimization</b>	<b>57</b>
3.1	Some Facts for the Case of Linear Equality Constraint	57
3.2	Accelerated Penalty Method	61
3.2.1	Generally Convex Objectives	66
3.2.2	Strongly Convex Objectives	67
3.3	Accelerated Lagrange Multiplier Method	67
3.3.1	Recovering the Primal Solution	69
3.3.2	Accelerated Augmented Lagrange Multiplier Method	71

<b>3.4 Alternating Direction Method of Multiplier and Its Non-ergodic Accelerated Variant .....</b>	72
3.4.1 Generally Convex and Nonsmooth Case .....	78
3.4.2 Strongly Convex and Nonsmooth Case .....	79
3.4.3 Generally Convex and Smooth Case .....	81
3.4.4 Strongly Convex and Smooth Case .....	83
3.4.5 Non-ergodic Convergence Rate .....	85
<b>3.5 Primal-Dual Method .....</b>	<b>95</b>
3.5.1 Case 1: $\mu_g = \mu_h = 0$ .....	97
3.5.2 Case 2: $\mu_g > 0, \mu_h = 0$ .....	99
3.5.3 Case 3: $\mu_g = 0, \mu_h > 0$ .....	101
3.5.4 Case 4: $\mu_g > 0, \mu_h > 0$ .....	101
<b>3.6 Faster Frank-Wolfe Algorithm .....</b>	<b>103</b>
References .....	107
<b>4 Accelerated Algorithms for Nonconvex Optimization .....</b>	<b>109</b>
<b>4.1 Proximal Gradient with Momentum .....</b>	<b>109</b>
4.1.1 Convergence Theorem .....	110
4.1.2 Another Method: Monotone APG .....	117
<b>4.2 AGD Achieves Critical Points Quickly .....</b>	<b>118</b>
4.2.1 AGD as a Convexity Monitor .....	118
4.2.2 Negative Curvature Descent .....	121
4.2.3 Accelerating Nonconvex Optimization .....	122
<b>4.3 AGD Escapes Saddle Points Quickly .....</b>	<b>125</b>
4.3.1 Almost Convex Case .....	126
4.3.2 Very Nonconvex Case .....	127
4.3.3 AGD for Nonconvex Problems .....	129
References .....	133
<b>5 Accelerated Stochastic Algorithms .....</b>	<b>137</b>
<b>5.1 The Individually Convex Case .....</b>	<b>139</b>
5.1.1 Accelerated Stochastic Coordinate Descent .....	139
5.1.2 Background for Variance Reduction Methods .....	147
5.1.3 Accelerated Stochastic Variance Reduction Method .....	152
5.1.4 Black-Box Acceleration .....	160
<b>5.2 The Individually Nonconvex Case .....</b>	<b>161</b>
<b>5.3 The Nonconvex Case .....</b>	<b>168</b>
5.3.1 SPIDER .....	168
5.3.2 Momentum Acceleration .....	175
<b>5.4 Constrained Problem .....</b>	<b>177</b>
<b>5.5 The Infinite Case .....</b>	<b>202</b>
References .....	206
<b>6 Accelerated Parallel Algorithms .....</b>	<b>209</b>
<b>6.1 Accelerated Asynchronous Algorithms .....</b>	<b>209</b>
6.1.1 Asynchronous Accelerated Gradient Descent .....	210

6.1.2 Asynchronous Accelerated Stochastic Coordinate Descent .....	223
6.2 Accelerated Distributed Algorithms .....	236
6.2.1 Centralized Topology .....	236
6.2.2 Decentralized Topology .....	241
References .....	254
<b>7 Conclusions .....</b>	<b>257</b>
References .....	258
<b>A Mathematical Preliminaries .....</b>	<b>261</b>
A.1 Notations .....	261
A.2 Algebra and Probability .....	263
A.3 Convex Analysis .....	264
A.4 Nonconvex Analysis .....	270
References .....	272
<b>Index .....</b>	<b>273</b>

on *Convex Analysis and Machine Intelligence*, and the International Journal of Computer Vision. He is a Fellow of IAPR and IEEE.

Shaojun Zhou received his Ph.D. degree in machine learning from Peking University in 2019. He is currently an Assistant Professor at the College of Computer Science and Technology, Nanjing University of Aeronautics and Astronautics. His current research interests include optimization and machine learning.

Qinghua Guo received his Ph.D. degree from Peking University in 2012. She is currently a Postdoctoral Researcher at Princeton University. Her research interests include machine learning and optimization.
