<i>Preface and Acknowledgements</i>	vii
1 Forms of Understanding	1
1 A subjective feature of explanation	2
2 The unification view	4
3 The causal-mechanical view	12
4 The visualization view	15
2 Understanding as Organized Beliefs	24
1 The content view	26
2 Skills and intelligibility	34
3 The organization view	37
4 Embodied and embedded understanding	41
5 Levels of understanding	48
6 Norms of understanding?	51
7 Cognitive schemata	56
3 On Interpretation	60
1 Two notions of interpretation	60
2 Interpretations in the natural sciences	64
3 Roads to interpretation	68
4 Interpretation and the discovery of scientific hypothesis	75
5 Interpretation and the construction of scientific concepts	79
4 Representations	85
1 What is a representation?	87
2 Representing and understanding	91
3 What do laws represent?	99
4 The linguistic approach to theories	103
5 Models as focal points of scientific explanation	108
5 Scientific Explanation	114
1 Nomic explanations	117
2 The Hempelian view	122
3 The received criticism	125
6 Causal Explanations	136
1 From embodiment to modal reflections	137
2 Causal explanation as reflective understanding	142

3	Causation in physics	147
4	Causation in biology	149
5	Causal beliefs about causal facts	154
6	Context-dependent relations and context-dependent descriptions	157
7	Other Types of Explanations	162
1	Types of explanations	163
2	Structural explanations	168
3	Functional explanations or evolutionary explanations?	171
8	The Pragmatics of Explanation	183
1	Why is explanation a matter of pragmatics?	186
2	The contrastive dimension of why-questions	193
3	van Fraassen on explanation	195
4	Critiques of van Fraassen	203
9	Not Just Why-questions	210
1	Why-questions in science	213
2	The paradigm argument	216
3	The relation argument	220
4	The reason argument	225
5	The translation argument	231
6	The contrast-class argument	234
7	The relevance argument	237
10	A Rhetorical Approach to Explanation	241
1	The problem context	241
2	Individual cognitive interests	245
3	Explanation as speech act	248
4	Explanation as a rhetorical means of communication	251
5	The rhetorical situation	255
6	Explanatory relevance	259
7	Explanatory force	262
11	Pluralism and the Unity of Science	270
1	The epistemological issue	272
2	The methodological issue	276
3	The ontological issue	279
4	Conclusion	284
	<i>Notes</i>	289
	<i>Literature</i>	316
	<i>Index</i>	327
