

Table of contents

Opening address by the Bavarian State Minister for Food, Agriculture and Forestry Michaela Kaniber	vii
Preface	viii

Johannes Isselstein and Martin Komainda:

Reconciling the goals – grass breeding for an improved grassland husbandry . . .	1
--	---

Session 1:

Natural diversity – a valuable source for breeding

Caroline Brophy, Guylain Grange, Carsten Malisch and John Finn: Making the most of multi-species mixtures: the role of species and functional diversity in intensively managed grasslands	8
Stephan Weise: Data management for preserving genetic diversity: Experiences and challenges	12
Marie Pégard, Philippe Barre and Bernadette Julier: New insights on the genetic structure of lucerne with GBS markers	17
Silvia Bachmann-Pfabe, Stephan Hartmann, Peter Westermeier and Eveline Willner: Phenotyping Drought Tolerance and Root Morphology in Perennial Ryegrass . . .	21
José Luis Blanco-Pastor, Thomas Keep, Philippe Barre, Abraham Escobar-Gutiérrez, Evelin Willner, Klaus J. Dehmer, Matthew Hegarty, Hilde Muylle, Tom Ruttink, Isabel Roldán-Ruiz, Stéphanie Manel, Florence Volaire and Jean-Paul Sampoux: Genomic and phenotypic diversity for adaption to future climate in natural populations of perennial ryegrass.	25
Vincent Colas, Philippe Barre, Frederik van Parijs, Lukas Wolters, Yannik Quitté, Isabel Roldán-Ruiz and Hilde Muylle: Variability for organic matter digestibility at heading date in a collection of perennial ryegrass genotypes	29
Stefano Zanotto, Helga Amdahl and Åshild Ergon: Red clover adaptation to a Nordic climate	33

Yue Hu, Klaus J. Dehmer, Evelin Willner, Silvia Bachmann-Pfabe and Bettina Eichler-Löbermann:	
Phosphorus utilisation capacity of forage legumes from recycling products	37
Beat Boller and David Kopecky:	
A single genotype of the triploid hybrid <i>Festuca apennina</i> × <i>Festuca pratensis</i> expands over two hectares	41

Session 2: Characterizing genetic diversity – the basis for selection

Bruno Studer, Marius Rohner, Chloé Manzanares and the International <i>Lolium-Festuca</i> Pangenome Consortium:	
Understanding forage grass genomes beyond single nucleotide variation – an example on self-incompatibility	46
Kristina Jaškūnė and Gražina Statkevičiūtė:	
Climate change adaptation in forage grasses: from phenotype to genotype	50
Johannes Wittmann, Peter Westermeier, Evelin Willner, Stephan Hartmann and Roland Geyer:	
Development of a metabolic profiling method for ryegrass phenotyping and breeding on drought tolerance	55
Florian Goettelmann, Dario Copetti, Steven Yates, Bruno Studer and Roland Kölliker:	
Pooled sequencing reveals genome regions involved in resistance to bacterial wilt in Italian ryegrass.	59
Johann Huber, Peter Westermeier, Volker Mohler, Evelin Willner and Stephan Hartmann:	
Genetic analysis of drought stress tolerance in perennial ryegrass (<i>Lolium perenne</i> L.)	63
Jie Kang, Ken Dodds, Stephen Byrne, Marty Faville, Michael Black, Andrew Hess, Melanie Hess, Alan McCulloch, Jeanne Jacobs, Dan Milbourne, Phillip Wilcox and Rudiger Brauning:	
snpGBS: A Simple and Flexible Bioinformatics Workflow to Identify SNPs from Genotyping-by-Sequencing Data	67
Bernadette Julier, Sébastien Blugeon, Sabrina Delaunay, Gaëtan Mappa, Tom Ruttink, Marie Pégard and Philippe Barre:	
Optimisation of GBS protocols for efficient genotyping of forage species	71
Lea A. Frey, Franz X. Schubiger, Tom Ruttink, Leif Skøt, Bruno Studer and Roland Kölliker:	
Elucidating the genetic control of southern anthracnose resistance in red clover	75

Katie Hetherington, Leif Skot, Dan Milbourne and Stephen Byrne: Genotyping-by-sequencing (GBS) of white clover (<i>Trifolium repens</i>) F ₁ families as pools.	79
An Ghesquiere, Hilde Muylle and Joost Baert: Using marker assisted parental analysis to move to full sib selection in breeding perennial ryegrass	83
Michael Richards, David Dalton and Rossana Henriques: Assessing photoperiod regulation of early development in perennial ryegrass varieties grown <i>in vitro</i>	86

Session 3: Strategies to optimally exploit genetic diversity

Åshild Ergon: Can we define a persistent red clover ideotype for mixtures with grasses?	92
Susanne Barth and Sergei Kushnir: Enhancing Genetic Diversity through new Breeding Techniques	96
Tim Vleugels, Isabel Roldán-Ruiz and Gerda Cnops: Inheritance of self-fertility in tetraploid red clover	101
Marie Pégard, Julien Leuenberger, Bernadette Julier and Philippe Barre: Genomic prediction of lucerne forage yield and quality	105
Mallikarjuna Rao Kovi, Akhil Reddy Pashapu, Helga Amdahl, Muath Alsheikh, Peter Marum and Odd Arne Rognli: Impact of genetic relatedness on the genomic prediction accuracies in timothy (<i>Phleum pratense</i> L.)	109
Agnieszka Konkolewska, Patrick Conaghan, Dan Milbourne, Michael Dineen, Susanne Barth, Rachel Keirse and Stephen Byrne: Feature selection for genomic prediction of perennial ryegrass forage quality	113
Jenny Peter, Roland Kölliker, Bruno Studer and Cristoph Grieder: Italian Ryegrass – Higher Seed Yield through Targeted Selection for Low Seed Shattering	117
Yuhong Shi, Jörg-Michael Greef and Katrin Kuka: Better utilization of <i>Lolium perenne</i> in biorefineries based on its chemical composition	121

Session 4:
“Minor” and “new” species – solution for future challenges

Fred Eickmeyer:

Shall we add some flowers or even add some weeds – will this be the solution for business of seeds? 126

Åshild Ergon, Yuan Gao, Tina Schmaucks and Åsa Frostegård:

Potential for developing improved rhizobium inoculants and lucerne varieties for efficient symbiosis in sustainable agriculture 133

Tomas Vymyslicky, Danilia Knotova, Jiri Skladanka, Pavel Knot and Martin Brtnicky:

New approaches to the establishment of mixed cultures of alfalfa with grasses. 137

Festulolium Workshop

Sabrina Delaunay, Philippe Barre, Sebastian Blugeon, Camille Gréard, David Kopecky and Marc Ghesquière:

Development of KASPar markers in *Festulolium* hybrids 142

Elza Neau, Philippe Barre, Sebastian Blugeon, David Kopecký and Marc Ghesquière:

Detection of genome-specific SNP polymorphism in the *Festuca/Lolium* complex 146

Dawid Perlikowski, Izabela Pawłowicz, Katarzyna Lechowicz, Adam Augustyniak, Aleksandra Skiryicz and Arkadiusz Kosmala:

Alterations in leaf lipidome under water deficit and re-watering in *Lolium multiflorum*/*Festuca arundinacea* introgression forms distinct in drought tolerance 150

David Kopecky, Marek Glombik, Joanna Majka and Katerina Pernickova:

High-throughput identification of F1 *Lolium* x *Festuca* hybrids using flow cytometry. 153
