

Contents

- G. V. R. BORN Introduction: some current problems 1
- E. F. LÜSCHER and P. MASSINI Common pathways of membrane reactivity after stimulation of platelets by different agents 5
Discussion 16
- R. L. NACHMAN Binding of adenosine diphosphate by human platelet membrane 23
Discussion 37
- J. F. MUSTARD, M. A. PACKHAM, D. W. PERRY, M. A. GUCCIONE and R. L. KINLOUGH-RATHBONE Enzyme activities on the platelet surface in relation to the action of adenosine diphosphate 47
Discussion 70
- T. C. DETWILER, B. M. MARTIN and R. D. FEINMAN Stimulus-response coupling in the thrombin-platelet interaction 77
Discussion 92
- R. S. ADELSTEIN, M. A. CONTI, J. L. DANIEL and W. ANDERSON, JR The interaction of platelet actin, myosin and myosin light chain kinase 101
Discussion 112
- R. J. HASLAM Roles of cyclic nucleotides in platelet function 121
Discussion 144
- D. C. B. MILLS Initial biochemical responses of platelets to stimulation 145
Discussion 168
- H. HOLMSEN Biochemistry of the platelet release reaction 175
Discussion 197

J. B. SMITH, C. M. INGERMAN and M. J. SILVER	Prostaglandins and precursors in platelet function	207
	<i>Discussion</i>	218
W. SCHNEIDER and A. R. L. GEAR	Significance of glucose and glycogen meta- bolism for platelet function	225
	<i>Discussion</i>	234
R. J. SKAER	Elemental composition of platelet dense bodies	239
	<i>Discussion</i>	252
A. PLETSCHER and M. DA PRADA	The organelles storing 5-hydroxytryptamine in blood platelets	261
	<i>Discussion</i>	279
G. V. R. BORN and F. MICHAL	5-Hydroxytryptamine receptors of platelets	287
	<i>Discussion</i>	298
A. J. MARCUS, L. B. SAFIER and H. L. ULLMAN	Interactions between 5-hydroxy- tryptamine and platelet lipid fractions	309
	<i>Discussion</i>	321
<i>General Discussion</i>		
	Nomenclature of the release reaction	327
	Activation of platelets	328
	Oxidative phosphorylation	335
	Primary aggregation by 5HT, vasopressin and thrombin	339
