Preface vii

Acknowledgments ix

A Brief Introduction to Isokinetics 1

Assessment of Human Muscle Performance 1

PART I THEORY OF ISOKINETICS 11

Chapter 1 Terminology and the Isokinetic Torque Curve 13

Average, Peak, and Angle-Specific Torque 13

Work and Power 14

Concentric and Eccentric Contraction 15

Normal and Abnormal Torque Curves 15

Interpretation of the Torque Curve 20

Chapter 2 Isokinetic Instrumentation 25

Passive and Active Dynamometry 25

Comparison of Isokinetic Equipment 27

Description of Isokinetic Instrumentation 31

Chapter 3 Principles of Isokinetic Testing and Exercise 35

Patient Education, Familiarization, and Warm-Up 35

Body Position, Stabilization, and Joint Alignment 36

Gravity Correction 39
The "Overshoot" Phenomenon 42
Factors Confounding Accurate Isokinetic Assessment 45
Test Protocols 48
Selection of Test Protocol 50
Effects of Isokinetic Exercise 52
Velocity Spectrum Exercise 52
Strength Overflow 53
Selection of Exercise Protocol 54

Chapter 4 Interpreting an Isokinetic Evaluation 59

Measuring Peak Torque, Work, and Power 59
Measuring Endurance 60
Force-Velocity Relationships 61
Peak Torque Relative to Body Weight 65
Bilateral Muscle Group Comparisons 66
Reciprocal Muscle Group Comparisons 68
Return to Activity 69

PART II CLINICAL APPLICATION OF ISOKINETICS 73

Chapter 5 Isokinetic Assessment and Exercise of the Upper Extremity 75

The Shoulder Joint 75
The Elbow Joint 87
The Wrist Joint 91
Functional Movement Patterns 94
Reliability of Upper Extremity Assessment 94
Tables for Normative Values 96

Chapter 6 Isokinetic Assessment and Exercise of the Lower Extremity 115

The Hip Joint 115
The Knee Joint 120
The Ankle Joint 129
Reliability of Lower Extremity Assessment 133
Tables for Normative Values 135

Chapter 7 Isokinetic Assessment and Exercise of the Trunk 175

The Trunk 175
Reliability of Trunk Assessment 181
Tables for Normative Values 183
