How to Use this Book	xii
How to Use the Online Resources	xiii
1 Introduction: Economics for the Environment	1
1.1 Welcome	1
1.2 The Economy and the Environment	2
1.3 Ten Key Insights from Economics	7
1.4 Using This Book for Teaching and Learning	9
2 Markets and the Environment	10
2.1 Introduction	10
2.2 The Power of Markets	12
2.3 Market Failure	14
2.4 Market Incentives for Environment Protection	23
2.5 Summary	38
3 Incentives for Conservation	42
3.1 Introduction	42
3.2 Zoning/Planning	43
3.3 Impact Fees	46
3.4 Subsidies	49
3.5 Transferable Development Rights (TDR) with Zoning	54
3.6 Conservation Banking	56
3.7 Conservation Easements	60
3.8 Summary	62
4 Valuing the Environment: Concepts and Methods	66
4.1 What Does Economic Value Mean?	66
4.2 In What Sense Does the Environment have Economic Value?	71
4.3 Methods for Valuing the Environment	75
4.4 Benefits Transfer	98
4.5 Summary	99
5 Cost-Benefit Analysis and Environmental Policy	103
5.1 Introduction	103
5.2 Why Undertake Cost-Benefit Analysis?	103
5.3 Stages of a CBA	105
5.4 Discounting and the Discount Rate	111
5.5 Using CBA in Environmental Management and Policy Analysis	116
5.6 Conclusions	118

6	Environmental Risk and Behaviour	121
6.1	Introduction	121
6.2	Behaviour under Risk	125
6.3	Behavioural Economics and Risk	130
6.4	Valuing Risks to Life and Limb	136
6.5	Regulating Risk	142
6.6	Concluding Remarks	149
7	Economic Growth, the Environment, and Sustainable Development	152
7.1	Introduction	152
7.2	Economic Growth and Development	152
7.3	Predictions from the Past	157
7.4	Growth and the Environment: The Environmental Kuznets Curve	159
7.5	The Economics of Sustainable Development	162
7.6	Summary	174
8	Conflicts and Cooperation: Strategic Interactions	178
8.1	Introduction	178
8.2	Game Theory	180
8.3	Co-operative Games	188
8.4	Game Theory and Transboundary Pollution Control	192
8.5	Summary	196
9	The Economics of Non-renewable Natural Resources	198
9.1	Introduction	198
9.2	The Extraction of a Non-renewable Resource	199
9.3	Testing the Hotelling Rule	202
9.4	Measuring Resource Scarcity	203
9.5	Hotelling and the Oil Market	209
9.6	Summary	210
10	The Economics of Renewable Resources: Fisheries and Forestry	213
10.1	Introduction	213
10.2	Fisheries Economics	214
10.3	Forestry	226
10.4	Summary	239
11	Trade and the Environment	243
11.1	Introduction	243
11.2	Why do Countries Gain from Trade?	245
11.3	Empirical Evidence on the Trade Effects of Environmental Regulation	253
11.4	International Trade Agreements and the Environment	258
11.5	Summary	261

12	The Economics of Climate Change	265
12.1	Introduction	265
12.2	Background	266
12.3	A Global Environmental Risk	267
12.4	The Challenge of International Coordination	268
12.5	Incentives Matter for Cost-effective Climate Policy	274
12.6	The Benefits and Costs of International Co-operation	277
12.7	Economic Issues Underlying Benefit and Cost Estimates	284
12.8	A Flexibility–Stringency Trade-off	286
12.9	Summary	287
13	The Economics of Water Quality Improvement	290
13.1	Introduction	290
13.2	Trends Over Time	292
13.3	The Costs of Improving Water Quality	294
13.4	Non-point Source Water Pollution: A Difficult Problem to Solve	298
13.5	Measuring Water Quality Benefits	303
13.6	Problems for Cost-Benefit Analysis of Water Quality Improvements	310
13.7	Conclusions	311
14	The Economics of Household Waste and Recycling	316
14.1	Introduction	316
14.2	Quantifying the External Costs of Waste Disposal	317
14.3	Policy Options for Waste Management	318
14.4	How Best to Increase Recycling?	323
14.5	Conclusions	328
15	Energy and the Environment	331
15.1	Introduction	331
15.2	Historical Patterns of Energy Consumption	334
15.3	The Role of Energy Policy	337
15.4	Renewable Electricity Policy	342
15.5	Summary	348
16	Biodiversity	351
16.1	Introduction	351
16.2	What to Conserve?	354
16.3	The Economic Value of Biodiversity	357
16.4	Biodiversity and the Design of Conservation Policy	363
16.5	Summary	374
	Glossary	380
	Index	384
