4 Diatomic molecules 172

Molecules in space 173

4.1	Features of diatomic molecules	174
	Box 4.1 How can we measure bond lengths?	176
4.2	The Lewis model	177
	Box 4.2 Magnetic behaviour	180
4.3	Electronegativity	181
4.4	Valence bond theory and molecular orbital theory	182
4.5	Valence bond theory	183
	Box 4.3 Molecular wavefunctions for H ₂	184
	Box 4.4 Making an unreactive molecule react	186
4.6	Molecular orbital theory	188
4.7	Molecular orbitals in hydrogen (H ₂)	188
	Box 4.5 Linear combinations of atomic orbitals	192
4.8	Molecular orbital energy level diagrams	192
	Box 4.6 The formation of hydrogen molecules in space	194
4.9	Linear combinations of p orbitals	197
4.10	Bonding in fluorine (F ₂) and oxygen (O ₂)	200
	Box 4.7 Oxygen in the atmosphere	202
4.11	s-p mixing	204
	Box 4.8 Measuring the energies of molecular orbitals	204
	Box 4.9 The colours of the polar lights	207
4.12	Heteronuclear diatomics	209
	Box 4.10 Linear combinations of atomic orbitals in LiH	211
	Box 4.11 Using nitrogen monoxide to send biological signals	216
	Concept review	217
	Key equations	217
	Questions	217
	Online resources	219

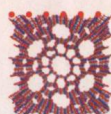

5 Polyatomic molecules 220

Xenon compounds 221

5.1	The Lewis model	223
	Box 5.2 N ₂ O: from laughing gas to dragsters	225
5.2	Valence shell electron pair repulsion theory	227

	Box 5.3 The fluorinating ability of ClF ₃ and BrF ₃	233
	Box 5.4 Nitrates in water	236
5.3	Bond polarity and polar molecules	239
5.4	Valence bond theory for polyatomic molecules	240
	Box 5.5 Ethene and the ripening of fruit	244
5.5	Resonance	247
5.6	A molecular orbital approach to the bonding in polyatomic molecules	250
5.7	Partial molecular orbital schemes	253
	Box 5.6 Boron hydrides	256
	Concept review	256
	Questions	257
	Online resources	257

6 Solids 258

Zeolites 259

6.1	Covalent network structures	261
	Box 6.1 Graphene, nanotubes, and nanotechnology	262
	Box 6.2 Superconductors	265
6.2	Structures based on the packing of spheres	266
6.3	Metallic bonding	277
6.4	Structures of compounds	280
	Box 6.3 X-ray crystallography	281
	Box 6.4 Self-cleaning windows	286
	Box 6.5 Conflict minerals	288
6.5	The ionic model	289
6.6	Calculating lattice energy	296
	Box 6.6 Determining the Madelung constant	297
	Box 6.7 Defects	301
6.7	Predicting bond types	302
	Concept review	304
	Key equations	304
	Questions	304
	Online resources	305

7 Acids and bases 306

Acids and bases in the garden 307

7.1	Brønsted-Lowry acids and bases	308
	Box 7.1 Solvation	309
	Box 7.2 Acids, alkalis, and human tissue	311
7.2	The strengths of acids and bases	312
	Box 7.3 Acidic water in disused mines	316
	Box 7.4 Controlling pH in a swimming pool	321
7.3	Buffer solutions	323
	Box 7.5 Buffering in the blood	325
7.4	pH changes in acid-base titrations	326
7.5	Indicators	331
7.6	Oxoacids	334
7.7	Acidic and basic oxides	338
	Box 7.6 Cooking with acids and bases	338

7.8	Lewis acids and bases	340
	Box 7.7 Superacids	341
	Concept review	342
	Key equations	343
	Questions	343
	Online resources	345

8 Gases 346

	Breathing under water	347
8.1	The gas laws: an empirical approach	349
8.2	Using the ideal gas equation	353
	Box 8.1 Car air bags	357
8.3	Mixtures of gases	359
8.4	Kinetic molecular theory and the gas laws	362
	Box 8.2 Calculating the pressure of a gas from the kinetic theory	364
8.5	The speeds of molecules in a gas	366
	Box 8.3 Measuring the distribution of speeds in a gas	368
	Box 8.4 Enriching uranium: a practical application of effusion	371
8.6	Real gases	376
	Concept review	382
	Key equations	382
	Questions	382
	Online resources	385

9 Reaction kinetics 386

	Methane in the troposphere	387
9.1	Why study reaction kinetics?	388
9.2	Defining the rate of a reaction	388
9.3	Monitoring the progress of a reaction	391
9.4	Elementary reactions	393
	Box 9.1 Deriving the integrated rate equation for a first order reaction	397
	Box 9.2 Deriving the integrated rate equation for a second order reaction	398
	Box 9.3 Atmospheric lifetime of methane	404
	Box 9.4 Using flash photolysis to monitor ClO [•] radicals	407
9.5	Complex reactions: experimental methods	409
	Box 9.5 The stopped-flow technique	410
	Box 9.6 Deriving the integrated rate equation for a zero order reaction	414
	Box 9.7 Pharmacokinetics	415
9.6	Complex reactions: reaction mechanisms	419
9.7	Effect of temperature on the rate of a reaction	428
9.8	Theories of reactions	434
9.9	Catalysis	438
	Box 9.8 The Michaelis-Menten mechanism	440
	Concept review	442
	Key equations	442
	Questions	443
	Online resources	447

10 Molecular spectroscopy 448

	Searching for life on Mars	449
10.1	Introduction to molecular spectroscopy	450
10.2	Molecular energies and spectroscopy	453
	Box 10.1 Particle in a one-dimensional box	454
10.3	General principles of spectroscopy	458
	Box 10.2 Lasers	464
10.4	Rotational spectroscopy	466
	Box 10.3 Using rotational spectroscopy to monitor ClO [•] radicals in the atmosphere	474
10.5	Vibrational spectroscopy	476
	Box 10.4 The simple harmonic oscillator model for a diatomic molecule	479
	Box 10.5 Atmospheric concentrations of carbon dioxide	485
	Box 10.6 Degrees of freedom and normal modes of vibration	486
10.6	Electronic spectroscopy	491
	Box 10.7 Electronic spectroscopy and colour	491
10.7	Spin resonance spectroscopy	496
	Box 10.8 Spin-spin coupling in NMR spectra	503
	Box 10.9 Magnetic resonance imaging (MRI)	507
	Concept review	509
	Key equations	510
	Questions	510
	Online resources	511

11 Analytical chemistry 512

	Drugs, sport, and analytical chemistry	513
11.1	Carrying out an analysis	515
	Box 11.1 Analysing a food contaminant	522
11.2	Electrochemical methods of analysis	523
	Box 11.2 Rapid blood analysis using electrochemical methods	526
11.3	Chromatography	528
	Box 11.3 Monitoring PCBs in the environment	537
	Box 11.4 Gas chromatography-mass spectrometry (GC-MS)	538
	Box 11.5 Chiral HPLC	541
11.4	Spectroscopic methods of analysis	542
	Box 11.6 Alcohol analysis and drink-driving	542
	Box 11.7 A pulse oximeter	546
11.5	Atomic spectrometry	547
	Box 11.8 Why is the temperature so important in atomic emission spectrometry?	547
	Concept review	552
	Key equations	553
	Questions	553
	Online resources	555

12 Molecular characterization 556

	Using isotope ratios to analyse orange juice	557
12.1	Mass spectrometry	558
	Box 12.1 Ionization methods	560

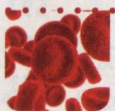

Box 12.2	Using tandem mass spectrometry in newborn screening	568
12.2	Infrared spectroscopy	570
12.3	Nuclear magnetic resonance spectroscopy	578
Box 12.3	Running an NMR spectrum	580
Box 12.4	Magnetic field strength and resolution	580
Box 12.5	Drawing a ^1H NMR spectrum	595
12.4	Structure determination using a combination of techniques	600
Box 12.6	Determining degrees of unsaturation	601
	Concept review	606
	Questions	607
	Online resources	610

13 Energy and thermochemistry 612

Launching the Ariane 5 rocket 613

13.1	Energy changes in chemistry: heat and work	614
Box 13.1	James Joule and the equivalence of heat and work	615
13.2	Enthalpy and enthalpy changes	620
13.3	Enthalpy changes in chemical reactions	623
Box 13.2	Comparing fuels	629
Box 13.3	Thermochemistry for fast food	630
13.4	Variation of enthalpy with temperature	634
Box 13.4	Deriving the Kirchhoff equation	636
13.5	Internal energy and the First Law of thermodynamics	637
Box 13.5	Isothermal expansion of an ideal gas	639
Box 13.6	Nitroglycerine: the chemistry of an explosive	644
13.6	Measuring energy changes	645
Box 13.7	Calorimetry, food, and metabolism	648
	Concept review	650
	Key equations	650
	Questions	651
	Online resources	653

14 Entropy and Gibbs energy 654

Protein folding 655

14.1	What are spontaneous processes?	656
14.2	Entropy and the Second Law of thermodynamics	660
Box 14.1	Variation of the molar entropy of a substance with temperature	663
14.3	The Third Law and absolute entropies	664
Box 14.2	Determination of standard entropy, S_{298}^\ominus	665
Box 14.3	What is the lowest temperature that can be reached?	668
14.4	Entropy changes in chemical reactions	669
Box 14.4	What happens when proteins don't fold correctly?	673
14.5	Gibbs energy	675
Box 14.5	Gibbs energy: the balance between enthalpy change and entropy change	677
Box 14.6	Thermodynamics of addition polymerization	679

Box 14.7	Obtaining silicon for use in silicon chips	682
Box 14.8	Energetics of biochemical reactions	683
Box 14.9	How much work can you get from glucose?	685
14.6	Variation of Gibbs energy with conditions	686
Box 14.10	Obtaining metals from ores	689
	Concept review	691
	Key equations	691
	Questions	692
	Online resources	693

15 Chemical equilibrium 694

Equilibria in the oceans 695

15.1	Gibbs energy and equilibrium	697
Box 15.1	Solubility equilibria	701
15.2	The direction of a reaction: the reaction quotient	702
Box 15.2	Equilibrium in fizzy water	704
15.3	Gibbs energy and equilibrium constants	705
Box 15.3	Deriving the relationship between $\Delta_r G^\ominus$ and K	706
Box 15.4	Contrails from jet aircraft	707
15.4	Calculating the composition of a reaction at equilibrium	710
Box 15.5	Chalk, lime, and mineral water: an example of heterogeneous equilibrium	713
15.5	Effect of conditions on reaction yields and K	713
15.6	Thermodynamics—putting it all together	719
Box 15.6	A case study in reaction thermodynamics: the Haber process	720
	Concept review	721
	Key equations	721
	Questions	721
	Online resources	725

16 Electrochemistry 726

Electrical energy on the move 727

16.1	What is electrochemistry?	728
16.2	Ions in solution	730
Box 16.1	Ultrapure water and conductivity	733
16.3	Electrochemical cells	735
Box 16.2	Electrochemical cells as portable energy sources	737
Box 16.3	Practical measurement of E^\ominus values	745
16.4	Thermodynamics of electrochemical cells	746
Box 16.4	Corrosion as an electrochemical process	751
Box 16.5	Bioelectrochemistry: nerve cells and ion channels	754
16.5	Electrolysis	755
Box 16.6	Electrolysis and rechargeable batteries	758
	Concept review	761
	Key equations	761
	Questions	761
	Online resources	763

17 Phase equilibrium and solutions 764

Supercritical fluids	765
17.1 Phase behaviour of single components	766
Box 17.1 Liquid crystals	773
17.2 Quantitative treatment of phase transitions	775
Box 17.2 Deriving the Clapeyron equation	777
Box 17.3 Deriving the Clausius-Clapeyron equation	780
17.3 Intermolecular interactions	783
17.4 Phase behaviour in two-component systems	789
Box 17.4 Perfluorocarbons and blood substitutes	800
Box 17.5 Reverse osmosis and water purification	804
Concept review	809
Key equations	809
Questions	810
Online resources	813

18 Isomerism and stereochemistry 814

Bitter isomers in beer	815
18.1 Isomerism	816
18.2 Conformational isomers	819
Box 18.1 Shaping up for maximum activity	822
Box 18.2 Drawing cyclohexane rings	828
Box 18.3 The shape of cholesterol and its role in the body	830
18.3 Configurational isomers: <i>E</i> - and <i>Z</i> -isomers	833
Box 18.4 A natural selection: biosynthesis of fatty acids	836
18.4 Configurational isomers: isomers with chiral centres	838
Box 18.5 Some landmarks in chirality	839
Box 18.6 The D/L nomenclature	842
Box 18.7 Thalidomide—from villain to hero?	848
Box 18.8 Using diastereomers to separate enantiomers: resolution	850
Concept review	858
Questions	858
Online resources	859

19 Organic reaction mechanisms 860

Antidotes for nerve agents	861
Box 19.1 The birth of organic reaction mechanisms	863
19.1 Fundamental concepts of organic reaction mechanisms	864
Box 19.2 Natural cascades	864
Box 19.3 Superacids and carbocations	868
Box 19.4 Anti-cancer agents	883
19.2 Classification of organic reaction mechanisms	888
Box 19.5 Natural acids and bases	894
Box 19.6 Natural acid-base catalysis	897
Box 19.7 Aspirin	900
Box 19.8 Superglue and fingerprints	904
19.3 Reaction selectivity	909

Concept review	913
Questions	914
Online resources	917

20 Halogenoalkanes: Substitution and elimination reactions 918

Alternative pesticides to bromomethane	919
Box 20.1 Natural organohalogens	920
20.1 Structure and reactivity of halogenoalkanes	921
20.2 Preparation of halogenoalkanes	923
Box 20.2 Teflon and radical polymerization	925
20.3 The mechanisms of nucleophilic substitution reactions	932
Box 20.3 Designer solvents	934
Box 20.4 Epoxy resins	942
20.4 The mechanisms of elimination reactions	945
Box 20.5 Muscle relaxants	949
20.5 Substitution versus elimination reactions	955
Concept review	959
Questions	959
Online resources	961

21 Alkenes and alkynes: Electrophilic addition and pericyclic reactions 962

The citric acid cycle	963
21.1 Structure and reactivity of alkenes and alkynes	964
Box 21.1 Ethene production in plants	967
21.2 Preparation of alkenes and alkynes	969
21.3 Electrophilic addition reactions of alkenes	972
Box 21.2 Adding HBr to alkenes in the presence of peroxides	975
Box 21.3 Making ethanol on a large scale	982
Box 21.4 Why is benzene carcinogenic?	990
21.4 Pericyclic reactions of alkenes	991
21.5 Electrophilic addition reactions of alkynes	996
Concept review	1000
Questions	1001
Online resources	1003

22 Benzene and other aromatic compounds: Electrophilic substitution reactions 1004

Azo dyes: the start of the rainbow	1005
22.1 The structure of benzene and other aromatic compounds	1006
Box 22.1 A short history of benzene	1008
Box 22.2 Making phenol from benzene	1009
Box 22.3 From coal tar dyes to pharmaceuticals	1013
22.2 Electrophilic substitution reactions of benzene	1015
Box 22.4 Substituted benzenes in sport	1023

	Box 22.5 Cleaning up the Friedel-Crafts acylation	1028
22.3	Reactivity of substituted benzenes in electrophilic substitutions	1029
22.4	The synthesis of substituted benzenes	1038
	Box 22.6 The biological action and synthesis of Viagra	1041
	Box 22.7 Retrosynthesis—working backwards to go forwards	1048
	Box 22.8 The synthesis and biological action of salbutamol	1051
	Concept review	1053
	Questions	1054
	Online resources	1055

23 Aldehydes and ketones: Nucleophilic addition and α -substitution reactions **1056**

Rhodopsin and vision 1057

23.1	The structure and reactions of aldehydes and ketones	1058
	Box 23.1 Cortisone and cortisol	1062
23.2	Nucleophilic addition reactions of aldehydes and ketones	1063
	Box 23.2 Oxidizing alcohols to carbonyls	1066
	Box 23.3 Hydride transfer in nature	1068
	Box 23.4 A short history of organometallics	1071
	Box 23.5 The structure of glucose	1075
	Box 23.6 Imines and hydrazones in organic synthesis	1081
23.3	α -Substitution reactions of aldehydes and ketones	1084
23.4	Carbonyl-carbonyl condensation reactions	1091
	Concept review	1097
	Questions	1097
	Online resources	1099

24 Carboxylic acids and derivatives: Nucleophilic acyl substitution and α -substitution reactions **1100**

PET plastics 1101

24.1	Structure and reactions of carboxylic acids and derivatives	1102
	Box 24.1 Oxytocin, the hormone of love	1102
	Box 24.2 Relative reactivity of carboxylic acid derivatives	1105
24.2	Nucleophilic acyl substitution reactions	1109
	Box 24.3 Fragrant esters	1111
	Box 24.4 Halogenation of carboxylic acids	1112
	Box 24.5 Combinatorial chemistry	1117
	Box 24.6 Making soap	1122
	Box 24.7 Hydrolysis of nitriles to form carboxylic acids	1127
24.3	α -Substitution and carbonyl-carbonyl condensation reactions	1128
	Concept review	1136
	Questions	1136
	Online resources	1139

25 Hydrogen **1140**

The planet Jupiter 1141

25.1	Elemental hydrogen	1142
	Box 25.1 The hydrogen economy	1143
25.2	Compounds of hydrogen	1145
	Box 25.2 Periodicity	1147
	Box 25.3 Hydrogen storage	1149
	Box 25.4 Hydrofluoric acid	1156
25.3	Hydrogen bonding	1158
	Box 25.5 Hydrogen bonding and life	1160
	Box 25.6 Burning ice	1163
25.4	Isotope effects	1164
	Box 25.7 Tritium	1164
	Concept review	1167
	Key equation	1167
	Questions	1167
	Online resources	1168

26 s-Block chemistry **1170**

Biomaterials 1171

26.1	The Group 1 elements	1172
26.2	Group 1 compounds	1174
	Box 26.1 Why is sodium peroxide more stable to heating than lithium peroxide?	1176
	Box 26.2 Is salt bad for you?	1179
26.3	Group 1 ions in solution	1182
26.4	Group 1 coordination chemistry	1183
26.5	Reaction of Group 1 metals with liquid ammonia	1184
26.6	The Group 2 elements	1185
	Box 26.3 Building materials	1187
26.7	Group 2 compounds	1188
	Box 26.4 Hard water	1193
26.8	Group 2 coordination chemistry	1194
	Box 26.5 Chlorophylls	1194
26.9	Lithium and beryllium as exceptional elements	1196
26.10	Organometallic compounds	1197
26.11	Diagonal relationships	1198
	Concept review	1199
	Questions	1200
	Online resources	1201

27 p-Block chemistry **1202**

Photochemical smog 1203

27.1	General aspects and trends in the p block	1205
27.2	Group 13: boron, aluminium, gallium, indium, thallium, and nihonium	1211
	Box 27.1 Recycling aluminium	1213

27.3	Group 14: carbon, silicon, germanium, tin, lead, and flerovium	1218	28.6	Colour in coordination compounds	1291
	Box 27.2 The greenhouse effect and global warming	1220	28.7	Magnetic properties	1294
	Box 27.3 Silicones—shiny hair and cosmetic surgery	1222		Box 28.5 Ferromagnetism and recording information	1295
27.4	Group 15: nitrogen, phosphorus, arsenic, antimony, bismuth, and moscovium	1225	28.8	Aqueous chemistry of the first row d-block ions	1297
	Box 27.4 Fluxional molecules	1232		Box 28.6 Trapping metal ions using the chelate effect	1298
	Box 27.5 Firearms and forensic science	1233		Box 28.7 Haemoglobin and the transport of oxygen	1300
27.5	Group 16: oxygen, sulfur, selenium, tellurium, polonium, and livermorium	1234		Concept review	1302
	Box 27.6 The ozone layer	1235		Key equations	1303
	Box 27.7 Sulfur on lo	1237		Questions	1303
27.6	Group 17: fluorine, chlorine, bromine, iodine, astatine, and tennessine	1242		Online resources	1304
	Box 27.8 Chlorofluorocarbons and the ozone hole	1243		Maths toolkit	1305
27.7	Group 18: helium, neon, argon, krypton, xenon, radon, and oganesson	1250		Appendices	
	Box 27.9 Using argon to date rocks	1251	Appendix 1	Abbreviations and symbols for quantities and units	1333
27.8	p-Block organometallic chemistry	1253	Appendix 2	Representing reactions	1337
	Concept review	1254	Appendix 3	Preparation and reactions of alcohols and amines	1339
	Questions	1254	Appendix 4	Organic oxidation and reduction reactions	1342
	Online resources	1255	Appendix 5	Properties of the elements	1344
			Appendix 6	Electronic configurations of the elements and some important ions	1352
			Appendix 7	Thermodynamic data for organic and inorganic compounds	1356
			Appendix 8	Ionic, atomic, and van der Waals radii for selected elements	1366
			Appendix 9	Acidity constants	1369
			Appendix 10	Bond lengths and bond enthalpies	1371
			Appendix 11	Electromagnetic spectrum	1374
			Answers		1375
			Index		1392
			The Greek alphabet		1405
			SI multiplication prefixes		1405
			Physical constants		1405
			Unit relationships		1406
			List of useful data		1406

28 d-Block chemistry

1256

Colouring with metal pigments

1257

Box 28.1 Technetium and imaging the brain

1259

28.1 The d-block elements

1260

28.2 Chemistry of the first row d-block elements

1265

28.3 Coordination chemistry

1267

Box 28.2 The extraction of gold

1270

Box 28.3 Platinum anti-cancer drugs

1277

Box 28.4 Coordination network structures

1280

28.4 Crystal field theory

1281

28.5 Filling the d orbitals

1284
