

CONTENTS

<u>Preface</u>	V
<u>1. Invited papers</u>	
- Kashchiev D.: Nonstationary nucleation and its effect on mass crystallization	3
- van Rosmalen G.M., Witkamp G.J., de Vreugd C.H.: Additive and impurity effects in crystallization processes	15
- Mersmann A.: Design of crystallizers	21
- Nývlt J.: Economic aspects of industrial crystallization	33
- Davey R.J.: Industrial crystallization - new horizons	41
- Kubota N.: Explanation of the metastability of supersaturated solutions by the stochastic model	49
- Jančić S.J.: Fractional crystallization	57
- Söhnel O.: Precipitation - the theory and practice	71
<u>2. Thermodynamics and Phase Equilibria</u>	
- Balarew Ch., Spassov D., Velkov S.: The system K_2CO_3 - $MgCO_3$ - H_2O at 25°C	83
- Balarew Ch.: A model for the kinetics of crystallization of the magnesium salts	87
- Pekárek V., Vacek V., Wolf G.: Enthalpy of crystallization of selected nitrates in water at 25°C	93
<u>3. Nucleation</u>	
- Kind M., Mersmann A.: On the width of the metastable zone of solutions	101
- Hiquily N., Laguerie C.: On the interpretation of the metastable zone width in relation with crystallization kinetics	107

XIV

- Rusli I.T., Larson M.A.: Nucleation by cluster coalescence 111
- Buczkowski R.: The influence of the suspension density on the secondary nucleation process 115
- Offermann H.: The influence of physical properties on the mechanical attrition of crystals 121
- Pohlisch J., Sangl R., Mersmann A.: Some aspects on the influence of stress and attrition on particle size distribution 125
- Hovsepian S.T., Nalbandyan H.G.: Nucleation in melts due to acoustic interaction between clusters 131
- Daudey J.P., van Rosmalen G.M., de Jong E.J.: Nucleation and growth kinetics of ammonium sulphate 135
- Watanabe Y., Saito T., Nakai T.: Studies on acceleration effect of nucleation agents for crystallization of salt hydrate as heat storage material 141
- Price Ch.J., Garside J.: Induction times for the salting out of 7-hydroxynaphtalene-1,3-disulphonic acid (G-acid) dipotassium salt monohydrate 147

4. Growth Rate of Crystals

- Bennema P.: Complementary models for the interface crystal-mother phase; theory and experiment 153
- Rak M.: The study of theoretical aspects of crystal growth from solution - spiral growth of LFM and DLFM crystals 163
- Szurgot M., Sangwal K.: Study of dislocations in potassium bichromate crystals by chemical etching 167
- Matuchová M., Jetten L., Bennema P.: In situ measurements of step kinetics on (010) face of KH-phtalate 171
- Offermann H., Lambardt K.F.: On crystal growth measurement: a comparison of different methods 177

- Karel M., Nývlt J.: An improved apparatus for crystal growth rate measurements in a fluidized bed 181
- Kabátek J., Ditl P.: Experimental apparatus for crystal growth measurement in a fluidized bed 187
- Webster G., Garside J.: Measurement of the growth kinetics of sucrose using a rotating disc system 191
- Heffels S.K., Verlaan C.J.J., de Jong E.J.: Determination of crystal growth rates in batch crystallizers 195
- Tavare N.S., Garside J.: Crystallization kinetics of ammonium sulphate in a seeded cooling batch crystallizer 199
- Fasoli U., Prati Gaglia M.P., Bodino M., Chianese A., Mazzarotta B.: Effect of crystal dimension on growth rate 203
- Brown D.J., Weatherby E.J.: Size-dependent growth and growth dispersion of sucrose crystal populations 207
- Zumstein R.C., Rousseau R.W.: Experimental and theoretical analyses of growth rate dispersion 211
- Toyokura K., Sakai H., Uchida R.: Effect of suspended fines on the crystal growth 215
- Matsuoka M., Kanekuni N.: Correlation of growth rates of solid solution crystals 219

5. Crystal - Solution Interface

- Bednarz G., Krasiński M.J., Karniewicz J.: Investigation of the water-ice interface 225
- Myerson A.S., Lo P.Y., Chang Y.C.: Diffusion in supersaturated solutions 229
- Krasiński M.J., Wojciechowski B.: Investigation of the concentration distribution near the KDP crystals in solution 233

6. Admixtures and Impurities

- Lacmann R., Mittmann M., Walter M., Schaper A., Bozkurt H.: Influence of impurities on the crystallization of KCl 239

- Nalbandyan A.G., Nalbandyan H.G.: The effect of additives on the nucleation in aqueous solutions 245
- Kubota N., Uchiyama I., Shimizu K., Mullin J.W.: Anomalous effects on the solubility of potassium sulphate caused by chromium(III) 249
- Ulrich J., Stepanski M.: The effect of additives on the growth behaviour of reaction and diffusion controlled growing crystals 253
- Hirota S., Fukui K., Nakajima M.: The effect of the additive on KDP crystal growth 257
- Chianese A., Condo A., di Berardino F., Mazzarotta B.: Effect of a surfactant on the crystallization of sodium perborate from aqueous solutions 261
- Witkamp G.J., van Rosmalen G.M.: Incorporation of cadmium and aluminium fluoride in calcium sulphate 265
- Stoilova D., Aslanian S.: Influence of the Jahn-Teller effect on the cocrystallization of metal(II) formates and $\text{Cu}(\text{HCOO})_2 \cdot 2\text{H}_2\text{O}$ 271
- Yamazaki Y., Kashima K., Toyokura K.: Behaviour of ice crystal layer and trapped impurities in small pores 275
- König An., Emons H.-H.: The influence of tensides on crystallization kinetics and crystal habit of $\text{MgSO}_4 \cdot 7\text{H}_2\text{O}$ 281
- König Ax., Emons H.-H., Nývlt J.: The effect of electrolyte admixtures in high concentration on the crystal growth of highly soluble salts 285

7. Size and Shape of Crystals

- Belyshev M.A., Baranov G.P.: Investigation of crystal rounding-off in salt mass crystallization 291
- Kirkova E., Pencheva D.: On the mechanism of incorporation of Cu(II) in $\text{ZnC}_2\text{O}_4 \cdot 2\text{H}_2\text{O}$ 299
- Tavare N.S.: CSD transients with growth rate dispersion 303

- Schmok K.: Modelling of the mechanism of agglomeration of KCl crystallization 307

8. Design of Crystallizers

- Budz J., Jones A.G., Chianese A., Mazzarotta B.: Effect of scale on crystallization kinetics of potassium sulphate in batch and continuous crystallizers 315
- Kratz E., Hoyer F.: Scale up from pilot plant test data - a simplified numerical approach 319
- Lakatos B., Nagy G.: Probability density function based micromixing model of crystallizers 325
- Qiu Y., Rasmuson A.C.: Evaluation of kinetic data from batch experiments 329
- Mohamed A.K., Tavare N.S., Garside J.: The development of a microcomputer software package: batch cooling crystallization 333
- Aoyama Y., Miki H., Toyokura K.: Correlation between productivity and size of crystals in continuous industrial crystallizer 337
- Luo S., Kanauchi M., Yamamoto T., Yamazaki Y., Toyokura K.: Characteristic linear correlation between the size of product crystals and the productivity of continuous crystallizers 343
- Gramlich K., Karwoth R.: Modelling of crystallizer cascades 349
- Rojkowski Z., Malinowski C.: The effect of the MSMR crystallizer slender model construction and operation on the classification function 353
- Teodossiev N., Dobрева A., Teodossieva S.: Agglomeration of sodium acetate trihydrate in an MSMR crystallizer 357
- Synowiec J., Synowiec P.: Advances in cooling crystallization 361

- Leverash V.I.: Principal aspects of the design of evaporation crystallizers 365
 - Leverash V.I., Gonionsky V.Ts., Ronkin V.M., Makarov V.V.: Modern evaporation crystallizers in the industry of salt extraction by boiling 373
 - Baranov G.P., Postnikov V.A., Trufanov V.A., Ryabkov V.A. Smolin A.N.: Industrial operating experience of a two-loop vacuum crystallizer 379
 - Korytkowski J., Borysowski J., Młodziński B.: An investigation for determination of conditions and kinetic relations at crystallization in counter-current three-phase fluidized bed crystallizer 391
 - Halász S., Farkas B., Molnár I.: Experience with scaling-up the "slug" crystallizer 393
9. Apparatus and Methods of Measurement
- Liszi I., Halász S., Bodor B.: Method for determination of supersaturation using conductivity for salting-out crystallization 399
 - Yamamoto H., Sudo S., Yano M., Harano Y.: Automatic measurement of crystallization in batch crystallizer 403
 - Myerson A.S., Rusk S., Shork F.J., Johnson J.L.: Control of crystallization processes. 407
 - Brown D.J., Weatherby E.J.: Practical problems of on-line monitoring of crystal growth using laser diffraction 411
 - Jager J., de Wolf S., Klapwijk, W., de Jong E.J.: A new design for on-line CSD measurements in product slurries 415
 - de Jong E.J.: Computer control of industrial crystallizers 419
 - Wang Jing-Kang, Zhou Ai-Yue, Zhang Yuan-Mou: Exergy analysis and optimization of multistage crystallization process 425

10. Technology, Individual Substances

- Zhang Yuan-Mou, Tan Qiu, Wang Jing-Kang, Xue Lu-Zhang: Investigation of system engineering of KCl industrial crystallization process 433
- Misztal S.: Crystallization of magnesium sulphate monohydrate from aqueous solutions 439
- Matynia A., Wierzbowska B., Bechtold Z.: Glauber salt obtaining in vacuum crystallizers with liquid jet-pump 443
- Leverash V.I., Gonionsky V.Ts., Ronkin V.M., Makarov V.V.: The crystallization equipment complex for salt extraction in caustic soda production 447
- Hostomský J.: Dissolution of sodium chloride and anhydrous calcium sulphate in the production of sodium chloride brine 453
- Miki H., Aoyama Y., Nakai T., Tamano K.: Crystallization of manganese carbonate as a raw material for manganese dioxide 457
- Toyokura K., Ohki K., Akaishi S., Hayashi Y., Morooka O.: Crystallization of gypsum and urea needle crystals in stirred vessel 463
- Zipp G.L., Randolph A.D.: Selective fines destruction in batch crystallization 469
- Harano Y., Okamoto Y., Asahina M., Ooshima H.: Nucleation of protein (enzyme thermolysin) from its aqueous solution 475
- Beckmann W.: Growth mechanisms of the B and C modification of stearic acid from pure and impure solutions 481
- Moritoki M., Ito M., Sawada T., Ishiyama M., Yamazaki Y., Fukutomi T., Toyokura K.: Crystallization of benzene by compression of the liquid phase benzene-cyclohexane 485

- Silventoinen I., Niemi H., Palosaari S.: Experience with high pressure crystallization in Finland 489
- Stávek J., Šípek M.: Formation of silver bromide crystals in controlled double-jet precipitation 493
- Sugimoto T., Miyake K.: Partial halide conversion of AgCl microcrystals by Br⁻ ions 497
- Bátor E., Halász S.: Method to control the particle size of pharmaceuticals by applying complex cooling, salting-out and seeding crystallization 503
- Rousseau R.W., Zumstein R.C., Turchi C: Effects of surface-active agents on the batch crystallization of L-isoleucine 507
- Kishimoto S., Nagashima N., Naruse M., Toyokura K.: The "bundle-like" crystals in aspartame crystallization 511
- Kishimoto S., Ohura H., Naruse M., Toyokura K.: Crystallizers development for the bundle aspartame crystals 515
- Širola I., Gomerčič K., Gosak D.: Precipitation of calcium gluconate from fermentation liquid by salting-out with ethanol 519
- Duverneuil P., Hiquily N., Laguerie C., Ousset R.: A comparison of the effects of some solvents on the growth of HMX (octogene) crystals from solutions 525
- Poilov V.Z., Rylov V.L.: Oscillating growth of potassium chloride crystals during mass crystallization 529
- Sokolowski T., Wiktorowska B., Kibalczyk W.: Growth of spherulites of octacalcium phosphate in gel 533
- Saska M.: Optimization of sucrose crystallization from impure solutions 537
- Rieger F., Ditl P., Weiserová H., Beránek L., Brandejský M.: Circulation effects on sugar crystallization in vacuum boiling pans 543

- Brown D.J., Boysan F.: Modelling of fluid flow in a batch crystallizer 547
 - Brečević L., Horvat Š.: The influence of temperature and precipitating components on the crystallization of sorbitol from concentrated aqueous solution 551
 - Bubník Z., Kadlec P.: Continuous crystallizer for sucrose 555
11. Purity of Crystals, Melts
- Yamazaki Y., Enomoto Y., Nakano T., Toyokura K.: Design method of purification process in a stirred vessel crystallizer 561
 - Mayrhofer B., Nývlt J.: Mathematical modelling of salt purification by recrystallization 567
 - Hložný L., Broul M.: Influence of different modes of saturation of solution on the distribution of isomorphous impurities 571
 - Brendler L.: A simple model for describing the separation in column crystallizers 577
 - Matsuoka M., Sumitani A.: Mechanism of composition changes of organic solid solution crystals 581
 - Ulrich J.: Purification by crystallization of organic compounds 585
 - Sakuma K., Shiotani K., Yamamoto A.: Purification of organic compounds by dispersion crystallization 589
 - Myasnikov S.K., Kuzmenko Yu.L., Muravyev Yu.N.: On fractional crystallization process in the film and countercurrent columns 593
 - Devyatykh G.G., Vorotyntsev V.M., Malyshev V.M.: High purification of substances from submicron-size suspended particles by directional crystallization method 597

12. Precipitation

- Åslund B., Rasmuson Å.C.: An applied study of batch reaction crystallization 603
- Nowakowski J., Bartczak W.M.: Diffusion controlled precipitation from ionic solutions. Approximate analytical models versus numerical approach 607
- Tsuge H., Kotaki Y., Hibino S.: Reactive crystallization of calcium carbonate by liquid-liquid and gas-liquid reactions 611
- Toyokura K., Shoji F., Oka H., Ishizaki F., Fujii T.: Decreasing of concentration of lead by reaction of lead nitrate and sulphuric acid 615
- Handlířová M., Söhnel O.: Kinetics of crystal growth of magnesium hydroxide from supersaturated aqueous solutions 619
- Markovič M., Komunjer L., Füredi-Milhofer H., Škrtič D., Sarig S.: The influence of glutamic acid on the precipitation of calcium oxalate 623
- Škrtič D., Füredi-Milhofer H., Markovič M.: The effect of some amino acids on the crystallization of calcium oxalate trihydrate 627
- Tanahashi H., Nishino H., Tohjoh K., Nakai T.: Nucleation and crystal growth of potassium bitartrate in model solution. White wines and red wine. 631

13. Hydrodynamics

- Halász S., Molnár I., Blickle T., Kincses K., Novák B.: Effects of hydrodynamics on mass transfer 637
- Bechtold Z., Matynia A.: Liquid velocity profiles in crystallizers with a jet-pump 641
- Rojkowski Z., Malinowski C.: Power consumption and circulation rate in the MSMR crystallizer model 645

XXIII

- Brečević L., Kralj D., Garside J.: The influence of stirring on the formation of calcium oxalate hydrate precipitates 649
- Varsányi B., Halász S., Blickle T.: Testing of agitation in laboratory scale foam column crystallizer 653
- Author index 659
- Subject index 663
