<i>Preface</i>	page	xiii
<i>Acknowledgements</i>		xiv
<i>List of Abbreviations</i>		xv
<hr/>		
I	Structural Organisation of the Nervous System	1
1.1	Nervous Systems	1
1.2	The Anatomy of a Neuron	2
1.3	Unmyelinated Nerve Fibres	2
1.4	Myelinated Nerve Fibres	4
1.5	Nerve Fibre Responses to Injury	8
<hr/>		
2	Resting and Action Potentials	10
2.1	Electrophysiological Recording Methods	10
2.2	Intracellular Recording of the Membrane Potential	13
2.3	Extracellular Recording of the Nervous Impulse	14
2.4	Excitation	17
<hr/>		
3	Background Ionic Homeostasis of Excitable Cells	22
3.1	Structure of the Cell Membrane	22
3.2	Ion Distributions in Nerve and Muscle	25
3.3	The Genesis of Resting Potentials	26
3.4	The Donnan Equilibrium System in Muscle	28
3.5	Direct Tests of the Donnan Hypothesis	31
3.6	The Active Transport of Ions	32
3.7	Quantitative Reconstruction of Resting Cellular Ionic Homeostasis	38
<hr/>		
4	Membrane Permeability Changes During Excitation	41
4.1	Impedance Changes During the Spike	41
4.2	The Sodium Hypothesis	41
4.3	Predictions of the Sodium Hypothesis	43
4.4	Voltage Clamp Experiments	46
4.5	Equivalent Electrical Circuit Description of the Nerve Membrane	47
4.6	Separation of Ionic Current Components in Response to Voltage Change	49
4.7	Mathematical Reconstruction of Ionic Current Properties	52
<hr/>		
5	Voltage-Gated Ion Channels	55
5.1	cDNA Sequencing Studies	55
5.2	The Structure of Voltage-Gated Ion Channels	55

5.3	Biophysical Measurements of Channel Protein Conformational Changes	60
5.4	Charge Movements in Excitable Cell Membranes	62
5.5	The Sodium Channel Gating Mechanism	66
5.6	The Ionic Selectivity of Voltage-Gated Channels	68
5.7	Effect of Ion Occupancy on Channel Permeation: The Independence Principle	69
<hr/>		
6	Cable Theory and Saltatory Conduction	73
6.1	The Spread of Voltage Changes in a Cable System	73
6.2	Passive Spread of Voltage Changes Along an Unmyelinated Nerve	75
6.3	Spread of Excitation in an Unmyelinated Nerve	76
6.4	Action Potential Conduction Velocity and Direction	78
6.5	Saltatory Conduction in Myelinated Nerves	79
6.6	Factors Affecting Conduction Velocity	84
6.7	Factors Affecting the Threshold for Excitation	85
6.8	After-potentials	87
<hr/>		
7	Neuromuscular Transmission	88
7.1	The Motor Unit	88
7.2	Presynaptic Transmitter Release	89
7.3	Graded and Regenerative Components of the Postsynaptic Response	91
7.4	The Quantal Nature of Presynaptic Events	94
7.5	Ionic Current Flows Underlying the End-Plate Potential	97
7.6	Patch Clamp Studies	99
7.7	The Nicotinic Acetylcholine Receptor	101
7.8	Specific Pharmacological Properties of the Neuromuscular Junction	103
<hr/>		
8	Synaptic Transmission in the Nervous System	106
8.1	Synaptic Excitation in Motor Neurons	106
8.2	Excitatory Postsynaptic Potentials	107
8.3	Inhibition in Motor Neurons	109
8.4	Interaction of IPSPs with EPSPs	110
8.5	Presynaptic Inhibition	111
8.6	Slow Synaptic Potentials	111
8.7	G-Protein-Linked Receptors	114
8.8	Electrical Synapses	116
8.9	Long-Term Potentiation and Depression	117
8.10	Glial Buffering of the Interstitial Space Following Neuronal Activity	118

9	The Mechanism of Contraction in Skeletal Muscle	121
9.1	Anatomy	121
9.2	The Structure of the Myofibril	123
9.3	The Sliding-Filament Theory	124
9.4	The Lengths of the Filaments	125
9.5	The Relation Between Sarcomere Length and Isometric Tension	125
9.6	The Molecular Basis of Contraction	127
9.7	Myosin	127
9.8	Actin	129
9.9	Interactions Between Actin, Myosin and ATP	130
9.10	The Molecular Basis of Activation	131
9.11	Maintenance of Structural Integrity in Contracting Sarcomeres	132
10	The Activation of Skeletal Muscle	135
10.1	Background Conductances in Skeletal Muscle Membranes	135
10.2	Ionic Currents Mediating Skeletal Muscle Membrane Activation	137
10.3	The Surface and Transverse Tubular Membrane Systems in Skeletal Muscle	141
10.4	Surface and Transverse Tubular Components of the Muscle Action Potential	143
10.5	Partial Separation of Surface and Transverse Tubular Electrophysiological Activity	145
10.6	Electrophysiological Relationships Between Surface and Transverse Tubular Propagation of Excitation	147
10.7	Physiological Modulation of Surface and Transverse Tubular Membrane Function	150
10.8	Reconstruction of Transverse Tubular Functional Changes During Exercise	152
10.9	Functional and Clinical Implications of Altered Transverse Tubular Membrane Properties	153
11	Excitation–Contraction Coupling in Skeletal Muscle	154
11.1	Dependence of Excitation–Contraction Coupling on Membrane Potential	154
11.2	Involvement of Intracellular Ca^{2+} in Excitation–Contraction Coupling	155
11.3	The Measurement of Intracellular Ca^{2+}	156
11.4	Voltage-Dependent Release of Intracellularly Stored Ca^{2+} in Excitation–Contraction Coupling	158
11.5	Triad Complexes Between the Transverse Tubular and Sarcoplasmic Reticular Membranes	160

11.6	Triggering Molecules for the Release of Sarcoplasmic Reticular Ca^{2+}	162
11.7	Tubular Voltage Detection Mechanisms Triggering Excitation–Contraction Coupling	164
11.8	Sarcoplasmic Reticular Ca^{2+} Release Through the Ryanodine Receptor	167
11.9	Structural Evidence for DHPR-RyR Coupling	169
11.10	Physiological Evidence for DHPR-RyR Configurational Coupling	170
11.11	Cooperative DHPR-RyR Interactions	173
11.12	Malignant Hyperthermia as an Inherited RyR1 Defect	174
11.13	Restoration of Sarcoplasmic Reticular Ca^{2+} Following Repolarisation	175
11.14	Ryanodine Receptor- Na^+ Channel Feedback Interactions Related to Excitation–Contraction Coupling	176
<hr/>		
12	Contractile Function in Skeletal Muscle	180
12.1	Isometric and Isotonic Contractions	180
12.2	Isometric Twitch and Tetanus	181
12.3	Isotonic Contractions	183
12.4	Energetics of Contraction	185
12.5	Work and Power Output by Muscle	186
12.6	Heat Production During Muscle Activity	187
12.7	Muscle Efficiency	187
12.8	The Energy Source for Muscle Contraction	188
12.9	Energy Balances During Muscular Exercise	190
12.10	Muscle Fatigue	192
12.11	Generation of Osmotically Active Metabolites During Muscular Exercise	192
12.12	Osmotic Stabilisation by Cellular H^+ Buffering Mechanisms	193
12.13	Intrinsic Osmotic Consequences of Altered Ion Balances During Exercise	195
12.14	Cellular Ionic Regulatory Mechanisms Ensuring Ion and Osmotic Balances During Exercise	197
12.15	Trophic Changes in Skeletal Muscle	197
12.16	Age-Related Sarcopaenia	198
<hr/>		
13	Cardiac Muscle	200
13.1	Structure and Organisation of Cardiac Muscle Cells	200
13.2	Electrical Initiation of the Heartbeat	201
13.3	The Cardiac Action Potential	202
13.4	Extracellular Measurement of Cardiac Electrophysiological Activity	203
13.5	Physiological Interpretation of the Electrocardiogram	205

13.6	Ionic Currents in Cardiac Muscle	206
13.7	Pacemaker Activity in Specialised Cardiac Regions	207
13.8	Phase 0 Depolarisation and Early Phase 1 Repolarisation: Na ⁺ and Transient Outward K ⁺ Currents	208
13.9	The Phase 2 Plateau: Inward Ca ²⁺ Current	209
13.10	Phase 3 Repolarisation: Voltage-Dependent Outward K ⁺ Currents	210
13.11	Phase 4 Electrical Diastole: Inward Rectifying K ⁺ Currents	210
13.12	The Prolonged Refractory Period in Cardiac Muscle	211
13.13	Varying Ionic Current Contributions in Different Cardiomyocyte Types	211
13.14	Cardiac Excitation–Contraction Coupling	212
13.15	Forms of Ca ²⁺ -Induced Ca ²⁺ Release in Cardiac Myocyte Subtypes	214
13.16	Cardiomyocyte Recovery from Excitation	215
13.17	Cardiac and Skeletal Myocyte Activation Characteristics Compared	216
13.18	Nervous Control of the Heart: Feedforward Modulation	218
13.19	Feedback Actions on Excitation–Contraction Coupling Related to Ca ²⁺ Homeostasis	221
13.20	Feedback Actions on Excitation–Contraction Coupling Related to Cellular Energetics	222
13.21	Recapitulation	224
<hr/>		
14	Ion Channel Function and Cardiac Arrhythmogenesis	225
14.1	Experimental Studies of Cardiac Arrhythmogenesis	226
14.2	Arrhythmic Substrate Arising from Spatial Heterogeneities in Action Potential Generation and Propagation at the Tissue Level	228
14.3	Arrhythmic Substrate Arising from Spatial Heterogeneities in Action Potential Recovery at the Tissue Level	230
14.4	Arrhythmic Substrate Arising from Temporal Electrophysiological Heterogeneities at the Tissue Level	231
14.5	Arrhythmic Triggers at the Cellular Level	233
14.6	Action Potential Activation and Conduction Abnormalities: Impaired Na ⁺ Channel Function and Atrial Arrhythmia	235
14.7	Action Potential Activation and Conduction Abnormalities: Impaired Na ⁺ Channel Function and Ventricular Arrhythmia	236
14.8	Action Potential Repolarisation Abnormalities: Long QT Syndromes and Ventricular Arrhythmia	238
14.9	Gain of Na ⁺ Channel Function: LQTS3	239
14.10	Gain of Ca ²⁺ Channel Function: LQTS8 (Timothy Syndrome)	242

14.11	Loss of K ⁺ Channel Function: Hypokalaemic Murine Models for Acquired LQTS	242
14.12	Congenital LQTS Related to Loss of K ⁺ Channel Function	243
14.13	Pro-Arrhythmic Perturbations in Intracellular Ca ²⁺ Homeostasis	244
14.14	Altered Intracellular Ca ²⁺ Homeostasis: Catecholaminergic Polymorphic Ventricular Tachycardia	245
14.15	Mechanistic Schemes for Ca ²⁺ -Mediated Arrhythmias	247
14.16	Pro-Arrhythmic Consequences of Compromised Cellular Energetics	248
14.17	Pro-Arrhythmic Structural Remodelling Resulting from Upstream Pathophysiological Changes	249
14.18	Translation of Mechanistic Insights into Therapeutic Strategy	249
15	Smooth Muscle	252
15.1	Structure of Smooth Muscle Cells	252
15.2	Functional Features of Smooth Muscle	253
15.3	Interstitial Cell of Cajal Networks	254
15.4	Pacing Properties of Interstitial Cells of Cajal	255
15.5	Propagation of Interstitial Cell of Cajal Pacing Events	258
15.6	Electrical Coupling Between Interstitial Cells of Cajal and Smooth Muscle Cells	258
15.7	Membrane Excitation in Smooth Muscle Cells	259
15.8	Excitation–Contraction Coupling in Smooth Muscle Cells	260
15.9	Pharmacomechanical Coupling in Smooth Muscle Cells	262
15.10	Store-Operated and Mechanosensitive Ion Channels in Smooth Muscle Cells	265
15.11	Ca ²⁺ -Mediated Contractile Activation	265
15.12	Effects of Myosin Light Chain Phosphorylation Levels	267
15.13	Mechanical Properties of Smooth Muscle	268
15.14	Propagation of Excitation and Contraction in Smooth Muscle	269
	<i>Further Reading</i>	271
	<i>References</i>	274
	<i>Index</i>	292

Colour plates can be found between pages 140 and 141.
