

# Contents

<b>Preface</b>	<b>7</b>
<b>1 Getting started</b>	<b>11</b>
1.1 What can be forecast? .....	12
1.2 Forecasting, goals and planning .....	14
1.3 Determining what to forecast .....	15
1.4 Forecasting data and methods .....	16
1.5 Some case studies .....	20
1.6 The basic steps in a forecasting task .....	22
1.7 The statistical forecasting perspective .....	23
1.8 Exercises .....	25
1.9 Further reading .....	26
<b>2 Time series graphics</b>	<b>27</b>
2.1 tsibble objects .....	27
2.2 Time plots .....	35
2.3 Time series patterns .....	37
2.4 Seasonal plots .....	39
2.5 Seasonal subseries plots .....	42
2.6 Scatterplots .....	45
2.7 Lag plots .....	51
2.8 Autocorrelation .....	52
2.9 White noise .....	54
2.10 Exercises .....	55
2.11 Further reading .....	57
<b>3 Time series decomposition</b>	<b>59</b>
3.1 Transformations and adjustments .....	59
3.2 Time series components .....	64
3.3 Moving averages .....	69
3.4 Classical decomposition .....	76

3.5	Methods used by official statistics agencies .....	78
3.6	STL decomposition .....	82
3.7	Exercises .....	84
3.8	Further reading .....	87
<b>4</b>	<b>Time series features</b> .....	<b>89</b>
4.1	Some simple statistics .....	89
4.2	ACF features .....	91
4.3	STL Features .....	92
4.4	Other features .....	95
4.5	Exploring Australian tourism data .....	97
4.6	Exercises .....	103
4.7	Further reading .....	103
<b>5</b>	<b>The forecaster's toolbox</b> .....	<b>105</b>
5.1	A tidy forecasting workflow .....	105
5.2	Some simple forecasting methods .....	110
5.3	Fitted values and residuals .....	115
5.4	Residual diagnostics .....	117
5.5	Distributional forecasts and prediction intervals .....	122
5.6	Forecasting using transformations .....	129
5.7	Forecasting with decomposition .....	132
5.8	Evaluating point forecast accuracy .....	135
5.9	Evaluating distributional forecast accuracy .....	141
5.10	Time series cross-validation .....	146
5.11	Exercises .....	149
5.12	Further reading .....	153
<b>6</b>	<b>Judgmental forecasts</b> .....	<b>155</b>
6.1	Beware of limitations .....	156
6.2	Key principles .....	157
6.3	The Delphi method .....	162
6.4	Forecasting by analogy .....	165
6.5	Scenario forecasting .....	167
6.6	New product forecasting .....	167
6.7	Judgmental adjustments .....	169
6.8	Further reading .....	172
<b>7</b>	<b>Time series regression models</b> .....	<b>175</b>
7.1	The linear model .....	175
7.2	Least squares estimation .....	181
7.3	Evaluating the regression model .....	186

7.4	Some useful predictors .....	193
7.5	Selecting predictors .....	200
7.6	Forecasting with regression .....	206
7.7	Nonlinear regression .....	212
7.8	Correlation, causation and forecasting .....	216
7.9	Matrix formulation .....	219
7.10	Exercises .....	221
7.11	Further reading .....	225
<b>8</b>	<b>Exponential smoothing</b> .....	<b>227</b>
8.1	Simple exponential smoothing .....	228
8.2	Methods with trend .....	234
8.3	Methods with seasonality .....	241
8.4	A taxonomy of exponential smoothing methods .....	248
8.5	Innovations state space models for exponential smoothing .....	249
8.6	Estimation and model selection .....	253
8.7	Forecasting with ETS models .....	257
8.8	Exercises .....	259
8.9	Further reading .....	263
<b>9</b>	<b>ARIMA models</b> .....	<b>265</b>
9.1	Stationarity and differencing .....	265
9.2	Backshift notation .....	274
9.3	Autoregressive models .....	275
9.4	Moving average models .....	276
9.5	Non-seasonal ARIMA models .....	278
9.6	Estimation and order selection .....	284
9.7	ARIMA modelling in fable .....	285
9.8	Forecasting .....	294
9.9	Seasonal ARIMA models .....	297
9.10	ARIMA vs ETS .....	306
9.11	Exercises .....	312
9.12	Further reading .....	317
<b>10</b>	<b>Dynamic regression models</b> .....	<b>319</b>
10.1	Estimation .....	320
10.2	Regression with ARIMA errors using fable .....	321
10.3	Forecasting .....	324
10.4	Stochastic and deterministic trends .....	329
10.5	Dynamic harmonic regression .....	332
10.6	Lagged predictors .....	335
10.7	Exercises .....	338

10.8	Further reading .....	341
<b>11</b>	<b>Forecasting hierarchical and grouped time series</b>	<b>343</b>
11.1	Hierarchical and grouped time series .....	344
11.2	Single level approaches .....	354
11.3	Forecast reconciliation .....	360
11.4	Forecasting Australian domestic tourism .....	366
11.5	Reconciled distributional forecasts .....	369
11.6	Forecasting Australian prison population .....	370
11.7	Exercises .....	375
11.8	Further reading .....	375
<b>12</b>	<b>Advanced forecasting methods</b>	<b>377</b>
12.1	Complex seasonality .....	377
12.2	Prophet model .....	385
12.3	Vector autoregressions .....	389
12.4	Neural network models .....	394
12.5	Bootstrapping and bagging .....	399
12.6	Exercises .....	403
12.7	Further reading .....	404
<b>13</b>	<b>Some practical forecasting issues</b>	<b>405</b>
13.1	Weekly, daily and sub-daily data .....	405
13.2	Time series of counts .....	408
13.3	Ensuring forecasts stay within limits .....	411
13.4	Forecast combinations .....	413
13.5	Prediction intervals for aggregates .....	417
13.6	Backcasting .....	418
13.7	Very long and very short time series .....	419
13.8	Forecasting on training and test sets .....	421
13.9	Dealing with outliers and missing values .....	424
13.10	Further reading .....	428
	<b>Appendix: Using R</b>	<b>429</b>
	<b>Bibliography</b>	<b>431</b>
	<b>Index</b>	<b>437</b>
