How to use this book	xv

INTRODUCTION

1 Taking on a research investigation – how to approach the challenges of project work	3
--	---

PLANNING YOUR RESEARCH PROJECT

2 Choosing a research topic – how to decide on a theme for your investigation	13
3 Framing a research question – how to set targets and formulate hypotheses to test	21
4 Writing a project proposal – how to structure a formal research plan	31
5 Planning and managing time – how to organise your investigation and submit on time	38
6 Working successfully with a supervisor – how to make the most of your relationship	50

RESEARCHING THE LITERATURE

7 Finding relevant source material – how to develop your information literacy skills	61
8 Assessing content in the literature – how to evaluate published information in your field	69
9 Interpreting published data – how to understand graphs, tables and basic statistics	82
10 Note-making from research sources – how to record information for use in your investigation	94
11 Organising your research materials – how to collect and file information and details of references	108

RESEARCH APPROACHES

- 12 Using quantitative research methods** – how to obtain and analyse numerical information 119
- 13 Using qualitative research methods** – how to obtain and analyse descriptive information 127
- 14 Conducting experiments and field studies** – how to design and perform lab and field investigations 136
- 15 Designing and carrying out surveys and interviews** – how to obtain relevant information from research participants 151
- 16 Thinking in research contexts** – how to apply method to produce valid, original ideas for your investigation 166
- 17 Arriving at a position and supporting it** – how to sift fact and opinion and express your conclusions 182
- 18 Following guidelines on ethics and safety** – how to observe good research practice in your investigation 192

DATA ANALYSIS AND PRESENTATION

- 19 Analysing data** – how to manipulate and interpret your results with simple, effective techniques 203
- 20 Presenting data** – how to display information, graphs and tables to academic standard 213

THE WRITING PROCESS

- 21 Planning the writing phase** – how to organise your work effectively to produce the best-quality product on time 225
- 22 Writing up in the approved format** – how to report on your research using standard structure and content 235
- 23 Writing up in the appropriate style** – how to use academic language and well-organised discourse to express your ideas and findings 247
- 24 Citing, referencing and avoiding plagiarism** – how to refer appropriately to the work and ideas of others 264
- 25 Reviewing, editing and proofreading** – how to enhance the quality of your write-up 283
- 26 Acting on feedback** – how to interpret and learn from what your supervisor writes on your drafts 290
- 27 Presenting your project for assessment** – how to submit your work appropriately 296

- List of references** 307
