## **PART 1 PLANNING YOUR RESEARCH PROJECT 1**

### **1 SO YOU'RE GOING TO DO A RESEARCH PROJECT 3**

The dominance of research findings in our lives	3
Becoming a researcher	5
The basic rules	7
Qualitative and quantitative research methods	8
Are you ready to be a good project manager?	11
Are you on message?	13
The nature of research	15

### **2 LET'S MAKE A START 17**

Choosing a topic and turning it into a question	17
Practicalities	20
Selecting your methodology	23
Fourteen ways of 'doing research'	26
Conclusion	33

### **3 PREPARING FOR A SUCCESSFUL RESEARCH PROJECT 35**

Clarify your own ideas	35
Make time for an exploratory stage	36
Find out how people will react to your method	37
Do a literature review	37
Consider issues of ethics and access	42
Prepare a final draft of your research instrument	48
Carry out a pilot study	48
Put it all together in a timed road map	49

<b>PART 2</b>	<b>QUANTITATIVE RESEARCH</b>	<b>53</b>
<b>4</b>	<b>THE PRINCIPLES OF SAMPLING</b>	<b>55</b>
	Types of sample	57
	Probability samples	63
	Non-probability samples	64
	Representativeness and bias	65
	When you come to write your report ...	69
<b>5</b>	<b>CARRYING OUT YOUR SURVEY</b>	<b>71</b>
	Twenty quality questions for carrying out a successful survey	72
	An exercise	77
<b>6</b>	<b>QUESTIONNAIRES</b>	<b>82</b>
	Questionnaires are driven by the researcher's own agenda	82
	The researcher has a professional obligation to maintain high standards	83
	A note on surveying online	93
<b>7</b>	<b>THE ART AND SCIENCE OF SURVEY INTERVIEWING</b>	<b>99</b>
	The initial encounter	100
	Interviews should give respondents freedom to use their own words	100
	The principles of good practice	101
	The design of interview schedules	103
	Examples drawn from six classes of interview data	104
	Preparing your interview schedule	106
	Some useful terms explained	108
<b>8</b>	<b>ANALYSING YOUR SURVEY DATA</b>	<b>111</b>
	Step 1: Think design, think analysis	114
	Step 2: Living with your data	115
	Step 3: Data entry using SPSS	116
	Step 4: Don't despise your frequency distributions	118
	Step 5: Consider your options for further analysis	119
	Step 6: Cross-tabulations	120
	Step 7: Third variable analysis	122
	Step 8: Comparing numerical values: measures of central tendency	123

Step 9: Comparing numerical values: correlations and rank order	125
Step 10: Probability	127
Step 11: Dealing with open-ended questions	128
Step 12: Drawing your analysis to a close	129
<b>9 TESTING FOR STATISTICAL SIGNIFICANCE: INTO MORE COMPLEX TERRITORY</b>	<b>130</b>
Eight useful ways of testing for statistical significance	133
Testing for significance in cross-tabs	135
Comparing differences between means	139
Comparing pairs of scores in matched samples	142
Testing for significance in correlations	145
<b>10 A QUANTITATIVE RESEARCHER'S BRIEFING SHEET</b>	<b>149</b>
A concise glossary for quantitative researchers	151
<b>PART 3 QUALITATIVE RESEARCH</b>	<b>163</b>
<b>11 STUDYING A SMALL SAMPLE</b>	<b>167</b>
Why study a small sample?	167
Identifying your research question	168
Qualitative research is dynamic and interactive	170
Strategic sampling	171
Gathering your core sample	173
Factors to take into account in gathering your sample	175
The strategic approach to research planning	177
<b>12 QUALITATIVE RESEARCH INTERVIEWING</b>	<b>179</b>
How will you present yourself?	180
Having a base	182
Unstructured or semi-structured interviewing with a small sample	183
The impact of the research interviewer	184
What kinds of questions are suitable for use with a small sample?	187
Recording your interview	189
Interviewing online	191
Some of the ideas on offer	193

<b>13</b>	<b>THERE IS MORE TO QUALITATIVE RESEARCH THAN INTERVIEWING</b>	<b>197</b>
	Ethnography and the anthropological tradition	197
	Participant observation	199
	Insider research	201
	Non-participant observation	203
	Focus groups	206
	Content analysis	209
	Case studies	212
	N = 1 explorations	214
<b>14</b>	<b>ANALYSING QUALITATIVE DATA</b>	<b>216</b>
	Content analysis of the answers to open-ended questions	217
	Interpretive content analysis of complete interviews	218
	Observation	225
	Focus groups	229
	Case studies	231
	Triangulation and multiple (or mixed) methods	232
	NUD*IST, NVivo and computer analyses	233
<b>15</b>	<b>A QUALITATIVE RESEARCHER'S BRIEFING SHEET</b>	<b>235</b>
	The language of qualitative research	236
	A concise glossary for qualitative researchers	237
	A cautionary view	246
<b>PART 4</b>	<b>THE LAST LAP</b>	<b>249</b>
<b>16</b>	<b>WRITING YOUR REPORT</b>	<b>251</b>
	How to produce a successful report	251
	Presenting your findings in a quantitative research study	258
	Presenting your findings in a qualitative research study	264
	Postscript: Over to you	268
	<i>Bibliography</i>	269
	<i>Name index</i>	273
	<i>Subject index</i>	275
