1 Taking the Leap into the Research World	1
The challenge of tackling a research project	3
So what is this thing called research and why do it?	3
Delving into the 'construct' of research	5
Getting help along the way	12
Chapter summary	15
Further reading	15
2 Setting Up and Getting Started	21
Getting started	22
Navigating the process	23
Staying on course	31
Chapter summary	35
Further reading	35
3 Developing Your Research Question	39
The importance of good questions	41
The preliminaries: defining your topic	42
From interesting topics to researchable questions	45
Characteristics of good questions	52
Chapter summary	55
Further reading	55
4 Undertaking Credible and Ethical Research	59
Research integrity	61
Credibility: integrity in the production of knowledge	61
Ethics: integrity and the 'researched'	75
Chapter summary	82
Further reading	82

5	Crafting a Research Proposal	85
	Role of the proposal	87
	Elements of the proposal	89
	Writing a winning proposal	91
	Obstacles and challenges	94
	Chapter summary	96
	Further reading	97
6	Reviewing Literature	99
	The importance of literature	101
	Sourcing relevant literature	104
	Managing the literature	110
	Writing the formal 'literature review'	113
	Chapter summary	118
	Further reading	118
7	Designing a Research Plan	121
	Moving from questions to answers	123
	Getting it right for the researcher	128
	Pragmatics: making it doable	130
	It's all in the details	131
	Chapter summary	135
	Further reading	136
8	Understanding Methodologies: Quantitative and Qualitative Approaches	139
	Understanding quantitative and qualitative approaches to research	141
	The quantitative tradition	142
	The qualitative tradition	150
	Chapter summary	165
	Further reading	165
9	Understanding Methodologies: Mixed Approaches	171
	Arguments for mixed methodology	173
	Challenges and possibilities	173
	Perspectives and strategies	175
	Managing and analysing mixed data	179
	Chapter summary	182
	Further reading	182
10	Understanding Methodologies: Evaluative, Action-Oriented and Emancipatory Strategies	185
	Research that attempts to drive change	187
	Evaluative research	187

Action research
Emancipatory research
Chapter summary
Further reading

11 Identifying and Selecting Samples, Informants and Cases

Where does the answer lie?
Samples: selecting elements of a population
Key informants: working with experts and insiders
Cases: delving into detail
Chapter summary
Further reading

12 Primary Data: Surveys, Interviews and Observation

The opportunities and challenges of collecting primary data
Surveying
Interviewing
Observation
Chapter summary
Further reading

13 Secondary Data

What Is secondary data?
Working with existing data
Analysing previous studies
Chapter summary
Further reading

14 Online Generated Data

Data stored online vs online generated data
Finding and assessing online generated data
Working with online generated data
Chapter summary
Further reading

15 Analysing Quantitative Data

Moving from raw data to significant findings
Managing data and defining variables
Descriptive statistics
Inferential statistics
Presenting quantitative data
Chapter summary
Further reading

16 Analysing Qualitative Data

- The promise of qualitative data
- The logic of QDA
- The methods of QDA
- Specific QDA strategies
- Presenting qualitative data
- A thought
- Chapter summary
- Further reading

17 The Challenge of Writing Up

- The writing challenge
- The writing process
- Chapter summary
- Further reading

18 Final Hurdles

- Disseminating your research
- The secret to presenting with impact
- Transitioning from student to professional
- The final word
- Chapter summary
- Further reading
