List of contributors	xi
<b>1. Metal-organic frameworks and their composites</b>	<b>1</b>
<i>M. Ramesh and C. Deepa</i>	
1.1 Introduction	1
1.2 Metal-organic framework composites	1
1.3 Characterization of metal-organic framework composites	9
1.4 Conclusion	14
References	14
<b>2. Metal-organic framework for batteries and supercapacitors</b>	<b>19</b>
<i>M. Ramesh, N. Kuppuswamy and S. Praveen</i>	
2.1 Introduction	19
2.2 Metal-organic frameworks	20
2.3 Metal-organic frameworks for batteries	21
2.4 Metal-organic frameworks for supercapacitors	25
2.5 Conclusion	30
References	31
<b>3. Titanium-based metal-organic frameworks for photocatalytic applications</b>	<b>37</b>
<i>A. Ratnamala, G. Deepthi Reddy, M. Noorjahaan, H. Manjunatha, S. Janardan, N. Suresh Kumar, K. Chandra Babu Naidu, Anish Khan and Abdullah M. Asiri</i>	
3.1 Introduction	37
3.2 Preparation of titanium-based metal-organic frameworks and the selection of precursors	38
3.3 The structure of titanium-based metal-organic frameworks	47
3.4 Photocatalytic oxidation reaction	50
3.5 Conclusion	56
References	57

<b>4. Electrochemical aspects of metal-organic frameworks</b>	<b>65</b>
<i>H. Manjunatha, S. Janardan, A. Ratnamala, K. Venkata Ratnam, L. Vaikunta Rao, S. Ramesh, K. Chandra Babu Naidu, N. Suresh Kumar, Anish Khan and Abdullah M. Asiri</i>	
4.1 Introduction	65
4.2 Electrochemical synthesis of metal-organic frameworks	67
4.3 Electrochemical applications of metal-organic frameworks	75
4.4 Conclusion	96
Acknowledgment	97
References	97
<b>5. Permeable metal-organic frameworks for fuel (gas) storage applications</b>	<b>111</b>
<i>S. Janardan, P C.V.V. Eswara Rao, H. Manjunatha, K. Venkata Ratnam, A. Ratnamala, K. Chandra Babu Naidu, A. Sivarmakrishna, Anish Khan and Abdullah M. Asiri</i>	
5.1 Introduction	111
5.2 Concept of porosity in fuel storage	112
5.3 Permeable metal-organic frameworks for H <sub>2</sub> storage application	113
5.4 Permeable metal-organic frameworks for CH <sub>4</sub> storage applications	114
5.5 Permeable metal-organic frameworks for C <sub>2</sub> H <sub>2</sub> storage applications	118
5.6 Permeable metal-organic frameworks for CO <sub>2</sub> storage applications	120
5.7 Conclusion	120
Acknowledgment	122
References	122
<b>6. Excessively paramagnetic metal organic framework nanocomposites</b>	<b>127</b>
<i>B. Venkata Shiva Reddy, N. Suresh Kumar, K. Chandra Babu Naidu, K. Srinivas, H. Manjunatha, A. Ratnamala, Anish Khan and Abdullah M. Asiri</i>	
6.1 Introduction	127
6.2 Discussion and applications	130
6.3 Conclusion	136
References	137

<b>7. Expanding energy prospects of metal-organic frameworks</b>	139
<i>K. Rama Krishna Reddy, D. Prakash Babu, N. Suresh Kumar, G. Ranjith Kumar, K. Chandra Babu Naidu and Anish Khan</i>	
7.1 Introduction	139
7.2 Metal-organic frameworks in Li-ion batteries	140
7.3 Applications of metal-organic frameworks as electrode material for lithium-ion batteries	142
7.4 Applications of high conductive metal-organic frameworks	143
7.5 Utilization of metal-organic frameworks as electric double-layer capacitors (supercapacitors)	144
7.6 Utilization of lithium–oxygen as separators	145
7.7 Utilization of solid-state electrolytes	145
7.8 Applications of electrode–electrolyte alliances	146
7.9 Fuel cell applications	146
7.10 Electrocatalytic applications	147
7.11 Conclusion	148
References	148
<b>8. Metal-organic framework–based materials and renewable energy</b>	153
<i>Prasun Banerjee, Adolfo Franco Jr, K. Chandra Babu Naidu, Anish Khan, Abdullah M. Asiri and Srinivasan Natarajan</i>	
8.1 Introduction	153
8.2 0D-metal-organic framework–based materials-nanoparticles	154
8.3 1D-metal-organic framework–based materials-nanoparticles	155
8.4 2D-metal-organic framework–based materials-nanoparticles	158
8.5 3D-metal-organic framework–based materials-nanoparticles	160
8.6 Conclusion	163
Acknowledgments	164
References	164
<b>9. Applications of metal-organic frameworks in analytical chemistry</b>	167
<i>Ruth Rodríguez-Ramos, Álvaro Santana-Mayor, Bárbara Socas Rodríguez, Antonio V. Herrera-Herrera and Miguel Ángel Rodríguez Delgado</i>	
9.1 Introduction	167
9.2 Desirable characteristics of MOFs for analytical chemistry applications	171
9.3 Recent applications	174
9.4 Conclusion and future remarks	223
Acknowledgement	224
References	224

<b>10. Modified metal-organic frameworks as photocatalysts</b>	231
<i>Wei Ni and Anish Khan</i>	
10.1 Introduction	231
10.2 Structure, merits, and strategies	232
10.3 Metal-organic framework modification	233
10.4 Applications	236
10.5 Conclusion and outlook	255
Acknowledgments	256
Abbreviations	256
References	257
<b>11. The sensing applications of metal-organic frameworks and their basic features affecting the fate of detection</b>	271
<i>Tolga Zorlu, Luca Guerrini and Ramon A. Alvarez-Puebla</i>	
11.1 Introduction	271
11.2 Type of metal-organic frameworks	272
11.3 Pore diameter	280
11.4 Pore morphology	280
11.5 Combination with different nanoparticles	281
11.6 The sensing applications carried out with metal-organic frameworks	283
11.7 Conclusion	287
References	287
<b>12. Thermomechanical and anticorrosion characteristics of metal-organic frameworks</b>	295
<i>Mohammad Ramezanzadeh and Bahram Ramezanzadeh</i>	
12.1 Introduction	295
12.2 Design of metal-organic frameworks	296
12.3 Stability of metal-organic frameworks	306
12.4 Application	311
12.5 Conclusion	320
References	321
<b>13. Metal-organic frameworks: preparation and application in electrocatalytic CO<sub>2</sub> reduction reaction</b>	331
<i>Rajasekaran Elakkiya and Govindhan Maduraiveeran</i>	
13.1 Introduction	331
13.2 Synthesis and properties of metal-organic frameworks	334
13.3 Electrocatalytic CO <sub>2</sub> reduction reaction	339
13.4 Conclusion	341
Acknowledgment	343
References	343

<b>14. Metal-organic frameworks as diverse chemical applications</b>	349
<i>Shahid Pervez Ansari, Ahmad Husain, Mohd Urooj Shariq and Anish Khan</i>	
14.1 Introduction	349
14.2 Electrochemical applications	350
14.3 Metal-organic frameworks in supercapacitor applications	351
14.4 Wastewater treatment	355
14.5 Drug delivery	357
14.6 Conclusion	358
References	358
<b>15. Metal-organic frameworks as chemical reaction flask</b>	365
<i>Rakesh Kumar Ameta and Parth Malik</i>	
15.1 Introduction to metal-organic frameworks	365
15.2 Versatility of metal-organic frameworks	367
15.3 Metal-organic frameworks as chemical reaction flask	367
15.4 Utility of metal-organic framework as chemical reaction flask	368
15.5 Conclusion	378
Acknowledgment	381
References	381
<b>16. Unique attributes of metal-organic frameworks in drug delivery</b>	389
<i>Parth Malik, Rachna Gupta and Rakesh Kumar Ameta</i>	
16.1 Introduction	389
16.2 Synthesis of metal-organic frameworks	391
16.3 Aspiring features for metal-organic frameworks' application in drug delivery: toxicological compatibility, stability, and biodegradation	394
16.4 Surface modification of metal-organic frameworks	396
16.5 Synthesis of nanoscale metal-organic frameworks	397
16.6 Therapeutic efficacy of metal-organic frameworks	399
16.7 How metal-organic frameworks can advance the present success of drug delivery?	400
16.8 Drug release mechanisms of metal-organic frameworks	402
16.9 Conclusion and future directions	410
References	410

<b>17. Metal-organic frameworks and permeable natural polymers for reasonable carbon dioxide fixation</b>	417
<i>M. Ramesh, M. Muthukrishnan and Anish Khan</i>	
17.1 Introduction	417
17.2 Carbon capture technologies and storage	418
17.3 Postcombustion capture	418
17.4 Metal-organic frameworks	422
17.5 Strategies of CO <sub>2</sub> fixation	426
17.6 Evaluation of CO <sub>2</sub> adsorbent materials	431
17.7 Conclusion	434
References	437
<b>18. Nanomaterials derived from metal-organic frameworks for energy storage supercapacitor application</b>	441
<i>Lakshmanan Gurusamy, Sambandam Anandan and Jerry J. Wu</i>	
18.1 Introduction	441
18.2 Metal-organic framework–derived metal oxide and composites	445
18.3 Metal-organic framework-derived bimetal oxide nanostructures	453
18.4 Metal-organic framework–derived metal sulfide nanostructures	455
18.5 Metal-organic framework–derived carbon nanostructures	461
18.6 NiCo-MOF@PNTs	464
18.7 Conclusion and future perspective	466
Acknowledgment	467
References	467
Index	471
