Series Preface	XIII
Volume Preface	XV
<b>PART 1: ASSEMBLY AND TRAFFICKING OF SIMPLE Fe-S CLUSTERS</b>	<b>1</b>
<b>Nif System for Simple [Fe-S] Cluster Assembly in Nitrogen-Fixing Bacteria</b>	<b>3</b>
<i>Patricia C. Dos Santos and Dennis R. Dean</i>	
<b>Iron-Sulfur Cluster Assembly in Bacteria and Eukarya using the ISC Biosynthesis Machinery</b>	<b>17</b>
<i>Sandrine Ollagnier de Choudens and H�el�ene Puccio</i>	
<b>The Suf System in Archaea, Bacteria, and Eukaryotic Organelles</b>	<b>37</b>
<i>Guangchao Dong, Savannah Witcher, F. Wayne Outten and Marinus Pilon</i>	
<b>Roles of Class II Glutaredoxins in the Maturation of Fe-S Proteins</b>	<b>53</b>
<i>Jonathan Przybyla-Toscano, Thomas Roret, J�er�emy Couturier and Nicolas Rouhier</i>	
<b>PART 2: ASSEMBLY OF COMPLEX AND HETEROMETALLIC Fe-S CLUSTER ACTIVE SITES</b>	<b>73</b>
<b>Nitrogenase Metallocluster Assembly</b>	<b>75</b>
<i>Nathaniel S. Sickerman, Lee A. Rettberg, Yilin Hu and Markus W. Ribbe</i>	
<b>Metallocluster Assembly: Maturation of [FeFe]-Hydrogenases</b>	<b>93</b>
<i>Giorgio Caserta, Ludovic Pecqueur, Cecilia Papini and Marc Fontecave</i>	
<b>CO Dehydrogenase and Acetyl-CoA Synthase</b>	<b>111</b>
<i>Holger Dobbek</i>	
<b>PART 3: ASSEMBLY OF HOMOMETALLIC AND HETEROMETALLIC Cu CLUSTER ACTIVE SITES</b>	<b>123</b>
<b>Assembly of Dinuclear Copper Center in Tyrosinases and Hemocyanins</b>	<b>125</b>
<i>Nobutaka Fujieda and Shinobu Itoh</i>	
<b>Multicopper Oxidases</b>	<b>139</b>
<i>Daniel J. Kosman</i>	
<b>Assembly of the Redox-Active Metal Centers of Cytochrome <i>c</i> Oxidase</b>	<b>157</b>
<i>Eva Nyyltova, Antoni Barrientos and Jonathan Hosler</i>	

<b>CuA and CuZ Center Assembly in Nitrous Oxide Reductase</b> <i>Sofia R. Pauleta and Isabel Moura</i>	185
<b>MoCu CO Dehydrogenase and its Active-Site Assembly</b> <i>Frank Mickoleit</i>	197
<b>PART 4: ASSEMBLY OF HOMOMETALLIC AND HETEROMETALLIC Mn CLUSTERS</b>	213
<b>Homo- and Heterometallic Dinuclear Manganese Proteins: Active Site Assembly</b> <i>Gustav Berggren, Daniel Lundin and Britt-Marie Sjöberg</i>	215
<b>Biogenesis and Assembly of the CaMn<sub>4</sub>O<sub>5</sub> Core of Photosynthetic Water Oxidases and Inorganic Mutants</b> <i>Colin Gates, Gennady Ananyev and G. Charles Dismukes</i>	233
<b>PART 5: ASSEMBLY OF HOMOMETALLIC AND HETEROMETALLIC Ni CLUSTERS</b>	249
<b>Urease Activation</b> <i>Robert P. Hausinger</i>	251
<b>Insights into [NiFe]-Hydrogenase Active Site Metallocluster Assembly</b> <i>Robert Gary Sawers and Constanze Pinske</i>	261
<b>PART 6: ASSEMBLY OF COFACTORS FOR BINDING ACTIVE-SITE METAL CENTERS</b>	273
<b>Moco in Mo/W Enzymes</b> <i>Silke Leimkühler</i>	275
<b>Heme Biosynthesis</b> <i>Amy E. Medlock and Harry A. Dailey</i>	299
<b>Siroheme Assembly and Insertion to Nitrite and Sulfite Reductase</b> <i>M. Elizabeth Stroupe and Martin J. Warren</i>	315
<b>Biosynthesis of Coenzyme F430 and the Posttranslational Modification of the Active Site Region of Methyl-Coenzyme M Reductase</b> <i>Steven O. Mansoorabadi, Kaiyuan Zheng and Phong D. Ngo</i>	323
<b>Coenzyme B<sub>12</sub> Biosynthesis in Bacteria and Archaea</b> <i>Theodoric A. Mattes, Jorge C. Escalante-Semerena, Evelyne Deery and Martin J. Warren</i>	335
<b>Crosslinked Cys–Tyr Free Radical Redox Cofactor</b> <i>James W. Whittaker</i>	361
<b>Topaquinone Biogenesis and Lysyl Tyrosine Quinone Biogenesis in Cu Amine Oxidases</b> <i>David M. Dooley, Doreen E. Brown and Eric M. Shepard</i>	375
<b>Index</b>	389
