

CONTENTS

CHAPTER 1

INTRODUCTION TO RISK ASSESSMENT	1
1.1. Introduction	1
1.2. Definitions and Terminology	1
1.2.1. What Is Risk?	2
1.2.2. What Is Risk Assessment?	3
1.3. A Model of Risk Assessment	5
1.4. Three Brief Examples of Risk Assessment	7
1.4.1. Example 1: Nuclear Power Plant Risk Assessment	8
1.4.2. Example 2: Poultry Products Risk Assessment	10
1.4.3. Example 3: Risk Assessment of an Air Bag Passive-Restraint Standard	13
1.5. A More Detailed Example of Risk Assessment: Risks of Exposures to Air Pollution under Alternative Emissions Standards	15
1.5.1. Problems Involved in Setting Air Quality Standards	16
1.5.2. Developing a Model for Estimating Health Consequences	16
1.5.2.1. Release Assessment: Modeling the Sources of Air Pollutants	16
1.5.2.2. Exposure Assessment: Modeling Exposures to Air Pollutants	18
1.5.2.3. Consequence Assessment: Health-Effects Models	21
1.5.3. Risk Estimation: Applying the Risk Model to Quantify and Describe Risk	26
1.6. Other Models of Risk Assessment	27

1.7.	A Taxonomic Classification of Risk Assessment Methods	30
1.8.	The Risk Assessment Process	33
CHAPTER 2		
	RELEASE ASSESSMENT	35
2.1.	Risk Sources and Risk Agents	35
2.1.1.	Toxic Metals	36
2.1.2.	Solvents	43
2.1.3.	Pesticides	44
2.1.4.	Genetically Engineered Microorganisms	45
2.1.5.	Electromagnetic Radiation	46
2.1.6.	Radioactivity	47
2.2.	Monitoring	49
2.2.1.	Strengths	52
2.2.2.	Limitations	53
2.3.	Performance Testing and Accident Investigation	54
2.3.1.	Strengths	56
2.3.2.	Limitations	57
2.4.	Statistical Methods	57
2.4.1.	Statistical Models	58
2.4.2.	Estimating the Parameters of Statistical Models	61
2.4.3.	Component-Failure and Initiating-Event Models	62
2.4.4.	Models for Events of Varying Magnitude	65
2.4.5.	Hypothesis Testing	67
2.4.6.	Selection and Interpretation of Statistical Models	68
2.4.7.	Strengths	71
2.4.8.	Limitations	72
2.5.	Modeling Methods for Release Assessment	74
2.5.1.	Failure-Mode and Effects Analysis (FMEA) and Related Methods	75
2.5.2.	Fault-Tree Analysis, Event-Tree Analysis, and Related Methods	79
2.5.3.	Discharge Models	83
2.5.4.	Strengths	87

2.5.5. Limitations	87
CHAPTER 3	
EXPOSURE ASSESSMENT	91
3.1. Monitoring Methods for Exposure Assessment	93
3.1.1. Strengths	97
3.1.2. Limitations	98
3.2. Testing Methods for Exposure Assessment	100
3.2.1. Strengths	101
3.2.2. Limitations	101
3.3. Models for Exposure Assessment	102
3.3.1. Atmospheric Models	103
3.3.2. Surface-Water Models	107
3.3.3. Groundwater Models	110
3.3.4. Watershed Runoff Models	112
3.3.5. Food-Chain Models	114
3.3.6. Multimedia Models	115
3.3.7. Exposure-Route Models	116
3.3.8. Population Models	121
3.3.9. Strengths	123
3.3.10. Limitations	123
CHAPTER 4	
CONSEQUENCE ASSESSMENT	127
4.1. Effects of Risk Agents on Human Health	127
4.1.1. Cancer	129
4.1.2. Reproductive and Developmental Effects	130
4.1.3. Clinical Effects	131
4.1.4. Subclinical Effects	131
4.2. Monitoring Methods for Assessing Health Consequences	132
4.2.1. Strengths	133
4.2.2. Limitations	134
4.3. Screening Methods for Assessing Health Consequences	134

4.3.1.	Strengths	136
4.3.2.	Limitations	137
4.4.	Animal Research for Assessing Health Consequences	137
4.4.1.	Strengths	140
4.4.2.	Limitations	140
4.5.	Epidemiological Methods for Assessing Health Consequences	144
4.5.1.	Strengths	146
4.5.2.	Limitations	147
4.6.	Controlled Human Exposure Studies	149
4.6.1.	Strengths	149
4.6.2.	Limitations	150
4.7.	Modeling Methods for Assessing Health Consequences	150
4.7.1.	Dose-Response Models	151
4.7.1.1.	Simple Dose-Response Models	154
4.7.1.2.	Tolerance Distribution Models	155
4.7.1.3.	Mechanistic Models	160
4.7.1.4.	Time-to-Response Models	164
4.7.1.5.	Differences among Dose-Response Models	165
4.7.2.	Pharmacokinetic Models	168
4.7.3.	Strengths	172
4.7.4.	Limitations	172
4.8.	Effects of Risk Agents on the Environment	179
4.9.	Monitoring Methods for Assessing Environmental Consequences	182
4.9.1.	Strengths	184
4.9.2.	Limitations	185
4.10.	Testing for Assessing Environmental Consequences	185
4.10.1.	Strengths	190
4.10.2.	Limitations	190
4.11.	Modeling Methods for Assessing Environmental Consequences	192
4.11.1.	Simple Environmental Dose-Response Models	193
4.11.2.	Dynamic Models	194
4.11.3.	Matrix Models	195
4.11.4.	Stochastic Models	196

4.11.5.	Markov Models	196
4.11.6.	Models of the Impact of Harvesting on Biological Populations	197
4.11.7.	Pollution-Response Models	198
4.11.8.	Strengths	198
4.11.9.	Limitations	199
CHAPTER 5		
RISK ESTIMATION		203
5.1.	The Composite Risk Model	205
5.2.	Methods for Estimating and Analyzing Uncertainty	207
5.2.1.	Classical versus Bayesian Methods for Quantifying Uncertainties	208
5.2.2.	Methods Based on a Classical Perspective	212
5.2.3.	Methods Based on the Bayesian Perspective	213
5.2.3.1.	Probability Encoding Methods	214
5.2.3.2.	Methods for Aggregating Expert Opinions	216
5.2.4.	Methods for Propagating Uncertainty through Risk Models	217
5.2.4.1.	Method of Moments	217
5.2.4.2.	Monte Carlo Methods	218
5.2.4.3.	Response-Surface and Related Methods	219
5.2.4.4.	Probability Trees	220
5.2.5.	Model Uncertainty	224
5.3.	Outputs of Risk Assessment	225
5.3.1.	Probability Distributions for Characterizing Risk	225
5.3.2.	Risk Indices	230
5.3.3.	Analyzing the Sources of Uncertainty	234
5.3.4.	Qualitative Uncertainty Analysis	235
CHAPTER 6		
AN EVALUATION OF THE STATE OF THE ART		239
6.1.	The Logical Soundness of Risk Assessment	241
6.2.	The Completeness of Risk Assessment	242

6.3.	The Accuracy of Risk Assessment	243
6.4.	The Acceptability of Risk Assessment	246
6.4.1.	Limitations Related to Risk Assessment Data, Models, and Methods	246
6.4.2.	Limitations Related to Risk Assessment Experts and Others Who Provide Risk Information	247
6.4.2.1.	Lack of Credibility	247
6.4.2.2.	Limited Understanding of Public Concerns and the Multidimensional Character of Risk	249
6.4.2.3.	Failure to Disclose Limitations of Risk Assess- ments	251
6.4.3.	Limitations Related to Potential Users of Risk Assessment Information	251
6.5.	The Practicality of Risk Assessment	252
6.6.	The Effectiveness of Risk Assessment	253
6.7.	Some Recommendations	257
6.7.1.	Attempts to Standardize Risk Assessment	257
6.7.2.	Accounting for Uncertainties	258
6.7.3.	Dealing with Value Judgments	260
6.7.4.	Conservatism	262
6.8.	Concluding Remarks	263
	REFERENCES	267
	GLOSSARY	289
	INDEX	311
