LIST OF CONTRIBUTORS	ix	The menopause	29
PREFACE	x	Climacteric symptoms	30
DISEASES OF WOMEN BY TEN TEACHERS, A HISTORY	xi	Management	32
		The benefits of hormone replacement therapy	33
1. GYNAECOLOGICAL ANATOMY AND PHYSIOLOGY	1	2. ASSESSMENT OF THE PATIENT	35
Anatomy of the pelvic organs	1	History and examination	35
The external genitalia	1	History	35
The internal reproductive organs	2	Examination of the patient	36
The bladder, urethra and ureter	8	Imaging in gynaecology	42
The rectum	9	Ultrasound	42
Pelvic muscles, ligaments and fascia	9	Computed tomography (CT)	44
Arteries supplying the pelvic organs	12	Magnetic resonance imaging (MRI)	45
The pelvic veins	12	Lymphography	46
The pelvic lymphatics	13	Hysterosalpingography	47
Nerves of the pelvis	15	3. DEVELOPMENTAL EMBRYOLOGY	48
Development of the female pelvic organs	16	Determination of sex	48
The internal genitalia	16	Chromosomal or genetic sex	48
The external genitalia	18	Development of genital organs	50
The menstrual cycle and its hormone control	19	Differentiation of the gonads	50
The endocrine control of ovarian function	19	Secondary sexual differentiation	51
The endometrial cycle	21	Intersex	51
Clinical features of menstruation	23	Chromosomal abnormalities	52
Toxic shock syndrome	24	Testicular failure	53
The relevant hormones	25	Masculinization of a genetic female	54
Puberty	27	Management of cases of intersex	55
		Deformities of the vulva	56
		Deformities of the vagina	56
		Deformities of the uterus	58

Abnormalities of the fallopian tubes	60	Genital warts	99
Developmental cysts of the broad ligament	60	Gonorrhoea	99
4. MECHANICAL PROBLEMS	62	Herpes genitalis	100
Genital injuries and fistulae	62	Syphilis	101
Injuries to the vulva	62	Chancroid	103
Injuries to the vagina	62	Lymphogranuloma venereum	103
Injuries to the uterus	62	Granuloma inguinale	103
Fistulae	63	HIV infection and AIDS	103
Genital prolapse	66	Pathology	104
Supporting structures	67	Mode of transmission of the virus	105
Causes of prolapse	68	Clinical management	106
Retroversion and inversion of the uterus	73	Prevention of spread	106
Retroversion	73	6. GYNAECOLOGICAL TUMOURS	108
Inversion	75	Cysts of the vulva, urethra and vagina	108
5. INFLAMMATION	76	Vulval cysts	108
Inflammation and infection of the vulva	76	Benign tumours of the vulva	108
Vulvitis	76	Malignant tumours of the vulva	109
Bartholinitis	79	Lesions of the urethra	111
Pruritus vulvae	79	Vaginal cysts	111
Inflammation and infection of the vagina	80	Vaginal tumours	111
Vaginal discharge	80	Benign tumours of the uterus and cervix	112
Infective vaginitis and vaginal discharge	81	Fibromyoma of the uterus	112
Non-specific vaginitis	83	Cervical adenomatous polypi	121
Other causes of vaginitis and vaginal discharge	84	Endometrial adenomatous polypi	122
Investigation of vaginal discharge	84	Placental or fibrinous polyp	122
Inflammation of the cervix	84	Premalignant disease of the cervix	122
Acute cervicitis	84	Invasive carcinoma of the cervix	129
Chronic cervicitis	84	Invasive carcinoma of the body of the uterus	136
Inflammation and infection of the uterus	86	Endometrial carcinoma	136
Endometritis	86	Sarcoma and mixed mesodermal tumours of the uterus	140
Inflammation and infection of fallopian tubes and ovaries	87	Carcinoma of the fallopian tube	141
Pelvic inflammatory disease	87	Primary carcinoma of the fallopian tube	141
Tuberculosis of the genital tract	92	Secondary carcinoma of the fallopian tube	141
Non-inflammatory conditions of the genital tract	93	Gestational trophoblastic disease	142
Vulval dystrophies	93	Cysts and neoplasms of the ovary	143
Cervical erosion	95	Cysts of the ovarian follicle and corpus luteum	143
Haematometra	98	Tumours arising from the surface epithelium	144
Sexually transmitted diseases	98	Germ cell tumours	148
Chlamydial infection and non-specific genital infection	99	Benign cystic teratoma (dermoid cyst)	148
		Sex cord and gonadal stromal tumours	150
		Metastatic tumours	151
		Malignant disease of the ovary	152

Clinical features	153	Treatment	207
Differential diagnosis	158	Rarer ectopic pregnancies	207
Treatment	159	Termination of pregnancy	208
Management of terminal complications	160	Methods used for legal termination of pregnancy	210
7. ENDOMETRIOSIS	162	Complications	211
8. MENSTRUAL DISORDERS	168	Criminal abortion	212
Amenorrhoea	168	11. SEXUAL AND REPRODUCTIVE HEALTH	213
Physiological amenorrhoea	168	Psychosomatic problems and sexual difficulties in gynaecology	213
Pathological amenorrhoea	169	Change, loss, anxiety and depression	214
Investigation and treatment	171	Infertility	222
Abnormally increased and irregular uterine bleeding (during menstrual life)	173	Requirements for normal fertility	222
Dysfunctional uterine bleeding	174	Treatment	230
Intermenstrual bleeding	176	Artificial insemination	238
Dysmenorrhoea and premenstrual tension	177	The Human Fertilisation and Embryology Act	238
Dysmenorrhoea caused by pelvic disease	177	Contraception and sterilization	239
Dysmenorrhoea without evident pelvic disease	177	Methods not requiring medical consultation	239
Premenstrual tension	178	Systemic contraceptives	240
9. PELVIC PAIN AND BACKACHE	180	Intrauterine contraceptive devices	244
Pelvic pain	180	Occlusive diaphragms and caps	247
Innervation of the pelvic organs	180	Permanent methods – sterilization	247
Gynaecological causes of acute pelvic pain	181	Methods under investigation	250
Gynaecological causes of chronic pelvic pain	183	Appendix	251
Non-gynaecological causes of acute and chronic pelvic pain	186	12. UROGYNAECOLOGY	252
Diagnosis of pelvic pain	189	Investigations	252
Investigation of pelvic pain	190	Clinical conditions	256
Backache	192	13. THERAPY	261
10. EARLY PREGNANCY	194	Hormone therapy in gynaecology	261
Abortion and miscarriage	194	Ovarian steroids	261
Causes of miscarriage	194	Antiprogestogens	266
Morbid anatomy	196	Androgens	266
Clinical varieties of abortion	196	Prostaglandins	266
Counselling	201	Pituitary protein hormones	266
Mortality after abortion	201	Hypothalamic gonadotrophin-releasing hormone and its analogues	267
Extrauterine pregnancy	201	Operations	268
Aetiology	202	Changing patterns	268
Anatomy of tubal pregnancy	202	Preoperative assessment and consent	268
Course and outcome	202	Vulval operations	269
Diagnosis	205		
Investigation	206
