

# Contents

Preface.....	xiii
Acknowledgements .....	xvii
Author .....	xix
Acronyms.....	xxi
<b>Chapter 1</b> Overview of GNSS.....	1
1.1 Introduction .....	1
1.2 Definition of GNSS .....	1
1.3 Navigation and Positioning.....	2
1.4 Points of Reference.....	2
1.5 History of Navigation Systems.....	5
1.5.1 The Celestial Age .....	5
1.5.2 The Radio Age .....	8
1.5.3 The Satellite Age.....	12
1.6 Satellite-Based Navigation and Positioning Systems .....	16
<b>Chapter 2</b> Functional Segments of GNSS.....	19
2.1 Introduction .....	19
2.2 Space Segment.....	19
2.2.1 GPS Space Segment .....	21
2.2.2 GLONASS Space Segment .....	24
2.2.3 Galileo Space Segment .....	26
2.2.4 BeiDou Space Segment.....	28
2.3 Control Segment.....	29
2.3.1 GPS Control Segment .....	31
2.3.2 GLONASS Control Segment.....	32
2.3.3 Galileo Control Segment.....	32
2.3.4 BeiDou Control Segment .....	33
2.4 User Segment.....	33
2.5 Summary and Comparison of the Four Systems.....	35
<b>Chapter 3</b> Working Principle of GNSS.....	39
3.1 Introduction .....	39
3.2 Triangulation and Trilateration .....	39
3.3 Almanac and Ephemeris .....	43
3.4 Time and Range.....	44
3.5 Number of Satellites .....	46
3.6 Time Synchronisation.....	46

3.7	Satellite Orbit and Location .....	49
3.8	Signal-Related Parameters .....	51
<b>Chapter 4</b>	<b>GNSS Signals and Range Determination.....</b>	<b>55</b>
4.1	Introduction .....	55
4.2	Concepts of Radio Waves .....	55
4.2.1	Electromagnetic Wave.....	55
4.2.2	Electromagnetic Spectrum.....	57
4.2.3	Source of Radio Waves .....	57
4.2.4	Strength of Radio Waves.....	58
4.2.5	Radio Transmitter and Receiver.....	59
4.3	GNSS Signals—Carriers and Codes .....	60
4.4	Information Carried by GNSS Signal .....	61
4.5	Navigation Message.....	63
4.5.1	GNSS Time .....	64
4.5.2	Satellite Clocks.....	66
4.5.3	Broadcast Ephemeris.....	66
4.5.4	Atmospheric Correction.....	67
4.5.5	Broadcast Almanac .....	67
4.5.6	Satellite Health.....	67
4.6	Ranging Codes .....	67
4.7	Modulated Carrier Wave and Phase Shift.....	69
4.8	Observables—Pseudorange and Carrier Phase .....	71
4.8.1	Encoding by Phase Modulation.....	72
4.9	Pseudorange Measurement.....	77
4.9.1	Autocorrelation.....	77
4.9.2	Lock and Time Shift .....	79
4.9.3	Pseudorange Equation.....	79
4.10	Carrier Phase Measurement .....	80
4.10.1	Doppler Effect.....	81
4.10.2	Carrier Phase Measurement Equation.....	82
<b>Chapter 5</b>	<b>Errors and Accuracy Issues.....</b>	<b>87</b>
5.1	Introduction .....	87
5.2	Impacts of Errors in Pseudoranges.....	88
5.3	Satellite Clock Error.....	89
5.3.1	Relativistic Effects on the Satellite Clock.....	89
5.3.2	Satellite Clock Drift .....	90
5.4	Atmospheric Effects .....	91
5.4.1	Ionospheric Delay.....	91
5.4.2	Tropospheric Delay .....	95
5.5	Multipath Signal .....	96
5.6	Receiver Clock Error .....	98

5.7	Receiver Noise .....	99
5.8	Orbital/Ephemeris Errors .....	100
5.8.1	Orbital Characteristics of Satellites .....	100
5.9	Other Accuracy Related Issues.....	102
5.9.1	Number of Satellites .....	102
5.9.2	Dilution of Precision .....	104
5.9.3	SA and AS .....	110
5.10	Estimation of Error Budget .....	111
<b>Chapter 6</b>	<b>Positioning Methods.....</b>	<b>115</b>
6.1	Introduction .....	115
6.2	Classification of Positioning .....	115
6.3	Point Positioning and Autonomous Positioning .....	116
6.4	Differential Positioning and Relative Positioning .....	118
6.4.1	Code-Based Differential Technique.....	120
6.4.1.1	Position Domain and Measurement Domain Differential Strategies.....	122
6.4.1.2	Real-Time and Post-Processed Techniques .....	123
6.4.1.3	Autonomous and Inverted Techniques .....	123
6.4.2	Carrier-Based Relative Technique.....	125
6.4.2.1	Single Difference .....	126
6.4.2.2	Double Difference.....	128
6.4.2.3	Triple Difference.....	129
6.5	Autonomous Positioning.....	132
6.6	Differential and Relative Correction Sources .....	134
6.6.1	Communication (Radio) Link .....	135
6.7	Processing Algorithms, Operational Mode and Other Enhancements.....	136
6.7.1	Software Enhancements.....	138
6.7.1.1	Clock-Aiding and Height-Aiding.....	138
6.7.1.2	Using Carrier Phase Data to Smooth Pseudorange Data .....	139
6.7.1.3	Kalman Filter.....	139
6.7.2	Hardware Enhancements: GNSS and Other Sensors .....	141
6.8	Miscellaneous Discussion .....	144
6.8.1	Online Data Processing Services .....	145
6.9	Summary of Positioning Methods.....	148
<b>Chapter 7</b>	<b>GNSS Augmentations and Other Navigation Satellite Systems .....</b>	<b>151</b>
7.1	Introduction .....	151
7.2	GNSS-1 and GNSS-2.....	151

7.3	GNSS Augmentations.....	152
7.3.1	Satellite-Based Augmentation Systems.....	152
7.3.1.1	EGNOS .....	153
7.3.1.2	WAAS.....	155
7.3.1.3	MSAS.....	156
7.3.1.4	GAGAN.....	156
7.3.1.5	SDCM.....	157
7.3.1.6	Other Government SBAS Systems .....	157
7.3.1.7	Commercial SBAS Systems .....	157
7.3.2	Ground-Based Augmentation Systems .....	158
7.3.2.1	LAAS.....	159
7.3.2.2	DGPS .....	159
7.3.2.3	Augmentation Services from Trimble, Leica, and Others.....	159
7.4	Regional Navigation Satellite Systems .....	160
7.4.1	Quasi-Zenith Satellite System .....	160
7.4.2	Indian Regional Navigational Satellite System (NavIC) .....	161
7.5	Inertial Navigation System .....	163
7.6	Pseudolite.....	164
7.7	Interoperability and Integrity of GNSS.....	165
<b>Chapter 8</b>	<b>GNSS Receivers .....</b>	<b>169</b>
8.1	Introduction .....	169
8.2	Receiver Architecture.....	169
8.2.1	Receiver Antenna .....	169
8.2.2	RF Section.....	172
8.2.3	Microprocessor.....	174
8.2.4	Control and Display Unit.....	174
8.2.5	Storage Unit.....	175
8.2.6	Power Unit.....	175
8.2.7	Radio Modem.....	176
8.3	Signal Acquisition and Positioning .....	177
8.3.1	Doppler Shift.....	178
8.3.2	Time Shift.....	179
8.3.3	Integer Ambiguity .....	180
8.4	Classification of GNSS Receivers .....	181
8.5	Receiver Independent Exchange Format.....	186
8.6	Choosing a GNSS Receiver.....	186
8.7	GNSS Receiver Manufacturers .....	193
8.8	Smartphone for Survey.....	193
<b>Chapter 9</b>	<b>Geodesy .....</b>	<b>199</b>
9.1	Introduction .....	199

9.2	Coordinate System.....	200
9.2.1	Celestial Equatorial Coordinate System .....	200
9.2.2	Earth-Centered Inertial Coordinate System .....	200
9.2.3	Geographical Coordinate System.....	201
9.2.4	Earth-Centered Earth-Fixed Coordinate System.....	203
9.3	Shape of the Earth .....	204
9.4	Datum .....	206
9.4.1	WGS 1984 Datum .....	208
9.4.2	Indian Geodetic Datum .....	209
9.4.3	International Terrestrial Reference System.....	209
9.5	Ellipsoids and Datums Used in GNSS .....	210
9.5.1	GNSS and Height Measurement .....	213
9.6	Projection.....	214
9.6.1	Selection of Projection .....	215
9.6.2	Classification of Projections .....	216
9.6.2.1	Cylindrical Projections .....	216
9.6.2.2	Conical Projections.....	218
9.6.2.3	Azimuthal Projections .....	219
9.6.2.4	Miscellaneous Projections .....	220
9.6.3	Projection Parameters .....	220
9.6.3.1	Linear Parameters.....	221
9.6.3.2	Angular Parameters .....	221
9.6.4	Common Projections .....	222
9.6.4.1	Polyconic Projection .....	222
9.6.4.2	Lambert's Azimuthal Equal-Area Projection.....	223
9.6.4.3	UTM Projection.....	223
9.6.4.4	Latitude/Longitude Geographic Coordinates.....	224
<b>Chapter 10</b>	<b>Applications of GNSS .....</b>	<b>227</b>
10.1	Introduction .....	227
10.2	Classification of GNSS Applications.....	227
10.3	Surveying and Mapping .....	231
10.3.1	Geodetic Control Survey .....	232
10.3.2	GIS Mapping .....	233
10.3.3	Structural Deformation Survey .....	233
10.3.4	Construction Stakeout and Grading.....	235
10.3.5	Coastal Engineering Surveys .....	236
10.3.6	Photogrammetric Mapping Control .....	236
10.3.7	Remote Sensing Applications Control Survey .....	237
10.3.8	Geophysics, Geology, and Archaeological Survey.....	238
10.4	Navigation.....	239
10.4.1	Automobile Navigation.....	240
10.4.2	Aircraft/UAV Navigation .....	241

10.4.3	Maritime Navigation.....	242
10.4.4	Machine Control and Navigation.....	242
10.4.5	Navigation for Bicyclers, Hikers, Climbers, and Pedestrians .....	242
10.4.6	Space Flight and Satellite Navigation.....	243
10.5	Tracking.....	243
10.5.1	Fleet Management.....	244
10.5.2	Parking Automation.....	245
10.5.3	Tracking of Spacecraft.....	245
10.5.4	Tracking of People .....	246
10.6	Time-Related Applications.....	247
10.7	Geodesy .....	247
10.8	Civil Engineering .....	248
10.9	Location-Based Services .....	248
10.10	Scientific and Research Applications .....	250
10.10.1	Atmospheric Study.....	251
10.10.2	Tectonics and Seismology.....	251
10.11	Animal Surveillance and Wildlife Applications.....	252
10.12	Military Applications .....	253
10.13	Precision Agriculture.....	255
10.14	Other Applications.....	256
<b>Chapter 11</b>	<b>Surveying with GNSS .....</b>	<b>259</b>
11.1	Introduction .....	259
11.2	Surveying Techniques .....	259
11.3	Equipment.....	262
11.4	Planning the Survey .....	268
11.5	General Factors for GNSS Surveying.....	269
11.5.1	Accuracy .....	269
11.5.2	Obstructions .....	269
11.5.3	Length of Baselines .....	270
11.5.4	Occupation Time.....	271
11.5.5	Recording Rate .....	271
11.5.6	Measurement Redundancy.....	273
11.5.7	Satellite Geometry .....	273
11.5.8	Control Requirements.....	274
11.5.9	Loop Closures and Baseline Differences.....	275
11.5.10	Network Adjustment .....	277
11.5.10.1	Minimally Constrained Adjustment .....	278
11.5.10.2	Constrained Adjustment .....	278
11.5.10.3	Error Ellipses.....	278
11.5.10.4	Independent Baselines .....	278
11.5.11	Independent Reoccupation of Stations.....	279
11.5.12	Point or Line Offset .....	279
11.5.13	Float Solution.....	280

11.6	Observation Methods.....	281
11.6.1	Classic Static Technique.....	282
11.6.2	Rapid Static Technique.....	284
11.6.3	Pseudokinematic Technique.....	286
11.6.4	Stop-and-Go Technique .....	286
11.6.5	Continuous Kinematic Technique .....	288
11.6.6	Real-Time Kinematic (RTK) Techniques .....	289
11.7	Initialisation Techniques .....	292
11.7.1	On-the-Fly .....	293
11.7.2	Static Survey of New Point .....	293
11.7.3	Known Baseline or Known Point.....	294
11.7.4	Antenna Swap.....	294
11.7.5	Recommended RTK Initialisation Procedure.....	295
11.8	Personnel Management.....	296
<b>Chapter 12</b>	<b>Mapping with GNSS .....</b>	<b>301</b>
12.1	Introduction .....	301
12.2	Integration of Surveying Tools.....	301
12.2.1	Achieving Instrument Independence .....	302
12.2.2	GNSS Technology .....	302
12.2.3	Optical Total Station Technology.....	302
12.2.4	Servo-Driven and Robotic Optical Total Stations.....	303
12.2.5	Impact on Surveying Operations.....	303
12.3	Accuracy Standards and Specifications for Survey.....	304
12.3.1	Class/Order of Survey .....	305
12.3.2	Positional Accuracy.....	306
12.4	Remote Sensing and Photogrammetric Control Point.....	307
12.5	Intelligent Map and GNSS .....	308
12.6	Map-aided Positioning and Navigation .....	311
12.7	Scale, Detail, Accuracy, and Resolution of Map.....	313
	<b>Glossary .....</b>	<b>317</b>
	<b>References.....</b>	<b>349</b>
	<b>Index.....</b>	<b>357</b>
